

**e-MSIC 2008<sub>ver 1.0</sub>**

**USER MANUAL**

## **1. INTRODUCTION:**

The Malaysia Standard Industrial Classification (MSIC) is used in the collection, compilation and publication of statistics. The MSIC is intended to be a standard classifications of productive economic activities. Its main purpose is to provide a set of activity categories that can be utilized for the collection and presentation of statistics according to such activities. The MSIC 2008 version 1.0 is an update of industry classification developed based on International Standard of Industrial Classification of All Economic Activities (ISIC) Revision 4.

The MSIC book (both Bahasa Melayu and English version) is widely used by the Department of Statistics Malaysia and related agencies as a source of reference for the classification of industry or economic activity.

The MSIC search engine system or e-MISC was developed by Methodology and Research Division (BMP) in collaboration with Information Management Division (BPM). The system was developed to ease the users in finding industrial code through the system compared to using MSIC book manually. The development of the system started in 2011 with continuous improvement since then.

## **2. THE PURPOSE OF e-MSIC**

The system was developed to ease and help the user in finding MSIC code faster. The system also help the user in finding a correct and accurate industry code.

The e-MSIC system is provided for internal and external user of the Department. The internal user is the Subject Matter Divisions and the Department State Offices. The potential external user are Companies Commission of Malaysia, Royal Malaysian Customs, Employees Provident Fund (EPF) and Sosial Security Organization (SOCSSO).
