PRAKATA

Laporan sulung ini merupakan usaha pertama Jabatan Perangkaan Malaysia dalam menyusun dan menerbitkan Klasifikasi Produk Mengikut Aktiviti Malaysia.

Penyusunan Klasifikasi Produk Mengikut Aktiviti Malaysia adalah berdasarkan kepada Klasifikasi Standard Perindustrian Malaysia 2000 dan *United Nations Central Product Classification*. Perbandingan antarabangsa statistik ekonomi boleh dilaksana apabila negara menggunakan klasifikasi produk mengikut aktiviti yang mempunyai kaitan langsung dengan *United Nations Central Product Classification*. Persamaan asas juga diwujudkan untuk klasifikasi produk mengikut aktiviti apabila peringkat berlainan yang terdiri daripada tajuk dikenal pasti melalui penggunaan kod berangka.

Nota telah disediakan untuk memudahkan pemahaman yang lebih baik tentang klasifikasi ini.

Untuk meningkatkan lagi mutu dan kegunaan penerbitan ini pada masa akan datang, Jabatan akan terus berusaha untuk menambahbaik di mana yang perlu. Oleh itu, pengemaskinian akan dibuat dari semasa ke semasa. Penerbitan ini diharap menjadi panduan yang berguna kepada pengguna-pengguna di sektor awam dan swasta. Ulasan dan cadangan untuk menambahbaik penerbitan akan datang amat dihargai.

Akhirnya, saya ingin merakamkan penghargaan kepada semua pihak yang terlibat, khususnya Bahagian Penunjuk Ekonomi untuk pengeluaran penerbitan ini.

PREFACE

This inaugural report marks the first attempt by the Department of Statistics, Malaysia to compile and publish the Malaysia Classification of Products by Activity.

Compilation of the Malaysia Classification of Products by Activity is based on the Malaysia Standard Industrial Classification 2000 and the United Nations Central Product Classification. International comparability of economic statistics will be achieved when countries use product classifications by activity which are linked directly to the United Nations Central Product Classification. A common basis for the classification of products by activity will also be established when different levels consisting of headings identified by numerical codes are used.

Notes have been provided to facilitate a better understanding of the classification.

To further enhance the quality and usefulness of future publications, the Department will continue to incorporate improvements wherever necessary. Therefore, revisions will be made from time to time. It is hoped that this publication will serve as a useful guide to users both in the public and private sectors. Comments and suggestions towards improving future issues would be greatly appreciated.

Finally, I would like to express my appreciation to all parties concerned, in particular, the Economic Indicators Division for producing this publication.

HAJI AZIZ BIN OTHMAN

*Chief Statistician,

NOTA KLASIFIKASI PRODUK MENGIKUT AKTIVITI MALAYSIA 2005

Pengenalan

1. Klasifikasi Produk Mengikut Aktiviti Malaysia (MCPA) 2005 ialah klasifikasi bagi semua barang dan perkhidmatan dalam ekonomi Malaysia mengikut industri utama produk berkenaan. Klasifikasi komoditi yang terdahulu adalah berasaskan kepada *International Standard Commodity Classification of All Goods and Services, United Nations 1970*, dan selaras dengan terbitnya *Central Product Classification, United Nations 1998*, semua kod komoditi perlu disusun semula bagi memenuhi keperluan semasa.
2. Rangka bagi MCPA ialah Klasifikasi Standard Perindustrian Malaysia (MSIC) 2000 dan *Central Products Classification (CPC) Version 1.0*. Pada prinsipnya, kedua-dua klasifikasi tersebut mematuhi *International Standard Industrial Classification for All Economic Activities (ISIC) Revision 3*. Oleh itu, MCPA juga secara tidak langsung mengikut piawai *ISIC*.

Objektif

3. Objektif MCPA ialah untuk memberi rangka kerja yang standard bagi semua barang dan perkhidmatan sama ada dikeluarkan dalam negeri atau pun yang diimport. Klasifikasi ini boleh digunakan sebagai satu peralatan untuk menjejak aliran komoditi dalam ekonomi (iaitu dari mana komoditi dikeluarkan dan untuk siapa komoditi dikeluarkan) dan ini akan memudahkan lagi kerja-kerja penyusunan Akaun Negara.

Struktur dan Sistem Pengekodan

4. Lima digit pertama MCPA menjelaskan kategori aktiviti atau industri yang mengeluarkan komoditi berkenaan. Ianya adalah sama dengan kategori item

NOTES ON THE MALAYSIA CLASSIFICATION OF PRODUCTS BY ACTIVITY 2005

Introduction

1. *The Malaysia Classification of Products by Activity (MCPA) 2005 is a classification for all goods and services in the Malaysian economy by main products of industries. Previous commodity classification was based on the International Standard Commodity Classification of All Goods and Services, United Nations 1970, and with the publication of the Central Product Classification, United Nations 1998, all commodity codes need to be recompiled to meet the current requirements.*
2. *The frame for the MCPA is the Malaysia Standard Industrial Classification (MSIC) 2000 and the Central Product Classification (CPC) Version 1.0. In principle, both the above classifications comply with the International Standard Industrial Classification for All Economic Activities (ISIC) Revision 3. As such, the MCPA follows indirectly the standard of ISIC.*

Objective

3. *The objective of the MCPA is to provide a standard framework for all goods and services whether produced within the country or that are imported. The classification can also be used as one of the tools for tracking the commodity flow in the economy (i.e. from where the commodities are produced and for whom the commodities are produced) and this will further simplify the compilation of National Accounts.*

Structure and Coding System

4. *The first five digits of MCPA explain the activity categories or the industries which produce the commodities. They are equivalent to the item category in the*

MSIC which represents the economic segments of the Malaysian economy. Items are created when they possess economic significance and are homogeneous in terms of industrial activities within the economy.

5. *The next level which consists of the sixth and seventh digit is the commodity group classification. In principle, it is similar to the subclass in the CPC and has direct link with at least the first six digits in The Harmonized Commodity Description and Coding System (HS) or the first five digits in the Standard International Trade Classification (SITC).*
6. *The last three digits, that is, the eight to tenth digit represent individual commodities. The description of each individual commodity follows the description of HS at nine digits.*
7. *Commodity comparison at international level can be made since each commodity code is linked directly to the CPC.*
