MSU, Statistics Dept sign pact

THE Management & Science University (MSU) and the Department of Statistics Malaysia have signed a Memorandum of Understanding.

This brings real-world acumen to number crunching for students and researchers.

Mathematics is best used to solve real-world problems, and engaging the world beyond the realm of the numerical is the specialty of statistics.

In a world of proliferating information, statistics is the critical tool providing the data organisation and analysis backing informed decisions.

MSU was represented by its president, Prof Tan Sri Dr Mohd Shukri Ab Yajid, and

vice president of Industrial Linkages, Dr Abdul Jalil Ghazali and the Department of Statistics Malaysia by chief statistician, Dr Mohd Uzir Mahidin and deputy chief statistician (Economy), Azahari Mohd Raslan at the signing of the MoU. Also present were senior management staff of both organisations and students.

Subjects of study at MSU fall into the general clusters of medical and health sciences, business and social sciences, and also engineering and technology.

The university was rated 5 Stars by the QS Stars for excellence in Teaching, Facilities, and Graduate Employability as well as Social Responsibility and Inclusiveness.
