Merumuskan keseluruhan situasi tenaga buruh, Ketua Perangkawan berkata, "Negara masih memerangi peningkatan kes baharu harian COVID-19 dan sekiranya krisis kesihatan ini berterusan, ekonomi dan pasaran buruh akan terus mengalami momentum pemulihan yang tidak menentu. Justeru, imuniti kelompok adalah penting ke arah langkah-langkah pengekangan yang lebih longgar sekaligus membolehkan perniagaan meneruskan operasi. Selaras dengan pecutan Program Vaksinasi COVID-19 Nasional, ianya akan meningkatkan keyakinan isi rumah dan perniagaan bagi merangsang kegiatan ekonomi. Tambahan pula, pelbagai inisiatif turut

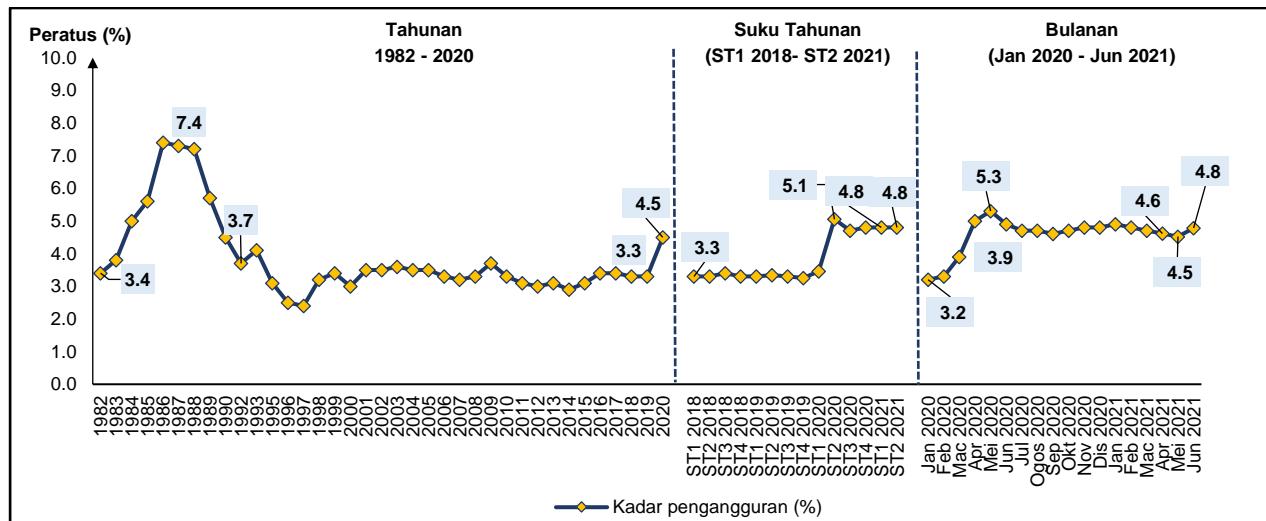

dilaksanakan bagi menyokong kelangsungan perniagaan melalui Pakej Pelindungan Rakyat dan Pemulihan Ekonomi (PEMULIH). Dengan kedua-dua program ini, aktiviti ekonomi dan pasaran buruh akan pulih, tidak mengambil kira situasi jangkitan varian baharu COVID-19 yang lebih berbahaya”.

Concluding the overall labour force situation, the Chief Statistician said, “The country is still combatting the rising number of new daily COVID-19 cases and if the current health crisis persists, the economy and labour market will continue experiencing uneven recovery momentum. Therefore, herd immunity is essential towards loosening up the containment measures, thus allowing businesses to resume their operation. The National COVID-19 Vaccination Programme is speeding up the pace hence it may boost the households and businesses confidence to stimulate economic activity. Moreover, various initiatives are also implemented to support business continuity through Pakej Pelindungan Rakyat dan Pemulihhan Ekonomi (PEMULIH). With these programmes, the economy and labour market activities may rebound, not considering the new and more lethal COVID-19 variants”.
