Engagement in the development of SDG indicators (Session 5: Building Capacities: What do we need?)

11 November 2022 - The meeting discussed ways to harness data generated by citizens to make an impact on public policy including SDG monitoring. More specifically, the meeting has discussed different ways and types that citizens can be engaged in producing data and making an impact on policies; discussed the possibility of a conceptual framework on ways of citizens being engaged in data production and use and in filling SDG data gap; reviews challenges of integrating these data into official statistics and policy processes and discussed how the international community could support the engagement with citizens in various ways through sharing of and documenting experiences and providing guidance.
