Moving on to performance across sub-sectors, Wholesale trade continued to expand steadily in July 2025, with Other specialised wholesale trade recording a 4.0 per cent year-on-year increase, reaching RM25.8 billion. This growth was mainly supported by higher sales of petrol, diesel, lubricants, construction materials, hardware, and plumbing supplies. The Wholesale of household goods also posted solid growth, rising 6.7 per cent to RM14.7 billion, driven by stronger demand for pharmaceutical and medical products, clothing, and lighting equipment. Similarly, the Wholesale of food, beverages, and tobacco advanced 6.6 per cent to RM14.1 billion, supported by higher sales of dairy products, meat, poultry, eggs, and vegetables. Meanwhile, the Wholesale of machinery, equipment, and supplies grew 5.9 per cent to RM5.7 billion, reflecting sustained business and industrial activity across key sectors.

Elaborating on the performance of the Retail trade sub-sector, Dato' Sri Dr. Mohd. Uzir Mahidin highlighted that Retail sales in non-specialised stores grew by 5.5 per cent year-on-year, reaching RM25.8 billion. This growth was mainly supported by higher sales in provision stores, mini markets, as well as department stores & supermarket. Likewise, Retail sales in specialised stores also recorded a strong performance, rising by 7.6 per cent to RM14.0 billion, driven by

increased demand for clothing, perfumery, cosmetics, jewellery, and footwear. Nevertheless, on a monthly comparison, this group remained the largest contributor, recording double-digit growth of 23.8 per cent to RM9.9 billion, up from RM8.0 billion in June 2025. This upward trend was consistent with motorcar registrations reported by the Road Transport Department (JPJ), which stood at 75,663 units in July, compared to 58,115 units in the previous month.

Meanwhile, online retail sales also demonstrated encouraging growth during the month. The online retail sales index rose by 5.8 per cent year-on-year, reflecting continued consumer preference for digital shopping platforms. After seasonal adjustment, the index increased 1.2 per cent month-on-month.
