STATISTIK ALAM SEKITAR, 2025

Kejadian Bencana Kecil Meningkat 34.1 Peratus kepada 228 Kejadian pada Tahun 2024, dengan Seramai 259,841 Individu Terjejas

PUTRAJAYA, 31 DISEMBER 2025 – Jabatan Perangkaan Malaysia (DOSM) menerbitkan **Statistik Alam Sekitar 2025** yang memaparkan statistik alam sekitar meliputi enam (6) komponen iaitu Keadaan & Kualiti Alam Sekitar; Sumber Alam Sekitar & Kegunaannya; Sisa; Kejadian Ekstrem & Bencana; Penempatan Penduduk & Kesihatan Persekitaran; dan Penglibatan, Pengurusan & Perlindungan Alam Sekitar. Penyusunan statistik ini adalah berdasarkan *Framework for the Development of Environment Statistics (FDES), United Nations 2013*.

Perubahan iklim terus memberi kesan kepada negara pada tahun 2024, mengakibatkan pelbagai impak alam sekitar serta peningkatan kejadian bencana seperti banjir, ribut, tanah runtuh dan kebakaran.

Ketua Perangkawan Malaysia, Dato' Sri Dr. Mohd Uzir Mahidin menyatakan bahawa jumlah keseluruhan kejadian bencana kecil pada tahun 2024 meningkat kepada 228 kejadian berbanding 170 kejadian yang direkodkan pada tahun

sebelumnya. Antara negeri yang merekodkan bilangan kejadian bencana tertinggi adalah Terengganu dan Perak, masing-masing mencatatkan 28 kejadian diikuti Pahang dan Selangor dengan 24 kejadian. Banjir kekal sebagai bencana utama dengan mencatatkan 218 kejadian atau 95.6 peratus daripada keseluruhan kejadian bencana di Malaysia. Seiring dengan peningkatan ini, bilangan Pusat Pemindahan Sementara (PPS) turut meningkat kepada 1,520 buah (2023: 1,218). Sementara itu, jumlah mangsa bencana yang terjejas akibat banjir, ribut, tanah runtuh dan kebakaran meningkat sebanyak 28.8 peratus kepada 259,841 orang berbanding 201,712 orang pada tahun 2023.

Walau bagaimanapun, bilangan kes demam denggi yang direkodkan pada tahun 2024 menunjukkan penurunan. Dato' Sri Dr. Mohd Uzir Mahidin menyatakan, "Kes demam denggi di Malaysia menurun sebanyak 0.6 peratus kepada 122,423 kes pada tahun 2024 berbanding 123,133 kes pada tahun 2023. Antara negeri yang merekodkan penurunan kes demam denggi ialah Pulau Pinang yang menurun kepada 4,370 kes (2023: 7,346 kes), diikuti oleh W.P Kuala Lumpur (termasuk W.P Putrajaya) dengan 11,133 kes serta Kedah sebanyak 4,452 kes. Selain itu, bilangan kes malaria di semua negeri turut menurun kepada 2,384 kes berbanding 3,629 kes pada tahun sebelumnya. Antara negeri yang merekodkan pengurangan kes malaria ialah Sabah (1,254 kes), Sarawak (599 kes) dan Kelantan (124 kes)."

Selain itu, kualiti udara pada tahun 2024 menunjukkan bilangan hari yang merekodkan bacaan kualiti udara berstatus sederhana bagi 65 stesen adalah antara 56 hingga 364 hari. Tambah beliau lagi "terdapat juga stesen yang merekodkan status tidak sihat pada tahun 2024. Stesen tersebut adalah stesen Bukit Rambai, Melaka (35 hari), Tanjung Malim, Perak (22 hari) serta Rompin, Pahang dan Kimanis, Sabah masing-masing 18 hari".

Malaysia buat julung kalinya telah menduduki tangga pertama (1) di peringkat global dalam laporan dwi-tahunan Open Data Inventory (ODIN) 2024/25 yang dikeluarkan oleh Open Data Watch (ODW), mengatasi 197 negara lain. Pencapaian ini merupakan lonjakan ketara daripada kedudukan ke-67 dalam penilaian ODIN 2022/23.

ENVIRONMENT STATISTICS, 2025

Minor Disaster Incidents Increased by 34.1 Per Cent to 228 Incidents in 2024, with 259,841 Individuals Affected

PUTRAJAYA, 31st DECEMBER 2025 – The Department of Statistics Malaysia (DOSM) has published the **Environmental Statistics 2025**, presenting environmental statistics covering six (6) components, namely Environmental Conditions & Quality; Environmental Resources & Their Use; Waste; Extreme Events & Disasters; Human Settlements & Environmental Health; and Environmental Engagement, Management & Protection. The compilation of these statistics is based on the Framework for the Development of Environment Statistics (FDES), United Nations, 2013.

Climate change continued to affect the country in 2024, resulting in various environmental impacts and an increase in disaster events such as floods, storms, landslides and fires.

The Chief Statistician of Malaysia, Dato' Sri Dr. Mohd Uzir Mahidin stated that the total number of minor disaster events in 2024 increased to 228, compared to 170 events recorded in the previous year. Among the states that recorded the highest number of disaster incidents were Terengganu

and Perak, reporting 28 incidents respectively, followed by Pahang and Selangor with 24 incidents. Floods remained the predominant disaster, accounting for 218 cases or 95.6 per cent of all disaster events in Malaysia. In line with this increase, the number of Temporary Evacuation Centres also rose to 1,520 (2023: 1,218). Meanwhile, the total number of disaster victims affected by floods, storms, landslides and fires increased by 28.8 per cent to 259,841 persons, compared to 201,712 persons in 2023.

However, the number of dengue fever cases recorded in 2024 showed a decline. Dato' Sri Dr. Mohd Uzir Mahidin mentioned, "Dengue fever cases in Malaysia decreased by 0.6 per cent to 122,423 cases in 2024 compared to 123,133 cases in 2023. Among the states that recorded a decline in dengue cases were Penang, which decreased to 4,370 cases (2023: 7,346 cases), followed by W.P Kuala Lumpur (including W.P Putrajaya), which recorded 11,133 cases and Kedah (4,452 cases). Additionally, the number of malaria cases in all states declined to 2,384 cases, compared to 3,629 cases in the previous year. Among the states that recorded a reduction in malaria cases were Sabah (1,254 cases), Sarawak (599 cases) and Kelantan (124 cases)."

Furthermore, air quality in 2024 showed that the number of days with moderate air quality readings recorded at 65 stations ranged from 56 to 364 days. He further added that "there were also stations that recorded unhealthy air quality status in 2024. These stations were Bukit Rambai, Melaka (35 days), Tanjung Malim, Perak (22 days), as well as Rompin, Pahang and Kimanis, Sabah each recording 18 days respectively."

Malaysia, for the first time, ranked as number one (1) globally in the biennial Open Data Inventory (ODIN) 2024/25 report released by Open Data Watch (ODW), surpassing 197 other countries. This achievement marks a significant leap from its 67th position in the ODIN 2022/23 assessment.
