Sementara itu, Jualan runcit di kedai pengkhususan meningkat 7.4 peratus kepada RM14.8 bilion pada Februari 2026 disokong oleh permintaan yang lebih kukuh terhadap barangan farmaseutikal, perubatan & ortopedik dan barang kemas. MEDIA STATEMENT

PERFORMANCE OF WHOLESALE & RETAIL TRADE, MALAYSIA, FEBRUARY 2026

Malaysia's Wholesale and retail trade recorded sales of RM156.3 billion, expanding by 5.3 per cent in February 2026

PUTRAJAYA, 10TH APRIL 2026 – The Department of Statistics, Malaysia (DOSM) today released the **Performance of Wholesale & Retail Trade, February 2026**, recording total monthly sales of RM156.3 billion, reflecting a year-on-year growth of 5.3 per cent.

In a statement today, the Chief Statistician Malaysia, Dato' Sri Dr. Mohd Uzir Mahidin, said, "The sales growth recorded in February was mainly driven by the Retail trade and Wholesale trade sub-sectors. Retail trade posted total sales of RM70.1 billion, an increase of RM5.0 billion, representing a year-on-year growth of 7.7 per cent. Similarly, Wholesale trade recorded sales of RM69.5 billion, rising by RM3.7 billion, which translates to a year-on-year growth of 5.7 per cent. However, the Motor vehicles sub-sector experienced a decline of RM0.9 billion, resulting in total sales of RM16.7 billion."

Elaborating on the Retail trade sub-sector, Dato' Sri Dr. Mohd Uzir Mahidin stated that the performance was primarily driven by Retail sales in non-specialised stores, which grew by 10.4 per cent to RM27.6 billion. This expansion was largely supported by increased sales in provision stores, supermarkets and mini markets. The growth in retail activity was bolstered by seasonal festive spending during Chinese New Year, the one-off Sumbangan Asas Rahmah (SARA) disbursement, the upward revision in civil servants' salaries, and early preparations for the Ramadan season. Meanwhile, Retail sales in specialised stores rose by 7.4 per cent to RM14.8 billion in February 2026, underpinned by stronger demand for pharmaceuticals, medical & orthopaedic goods, clothing, and jewellery. In addition, Retail sales of automotive fuels increased by 6.2 per cent to RM6.3 billion. Retail sales of food, beverages & tobacco also registered a 7.7 per cent rise to RM4.5 billion, driven by higher purchases of meat and fish & other seafood.

"The Wholesale trade sub-sector continued to demonstrate steady performance in February, led by the Wholesale of household goods, which expanded by 9.6 per cent to RM15.0 billion. This growth was driven by stronger sales of pharmaceutical &

medical goods, perfumeries, cosmetics & toiletries, as well as household furniture. Meanwhile, the Other specialised wholesale group increased by 3.7 per cent to RM25.6 billion, supported by higher demand for fertilisers & agrochemical products, alongside ferrous & non-ferrous metal ores & metals. In addition, the Wholesale of food, beverages & tobacco rose by 5.7 per cent, underpinned by increased sales of dairy products, fish & other seafood, as well as vegetables," said the Chief Statistician.

The decline in the Motor vehicles sub-sector during the month was primarily attributed to a 17.1 per cent contraction in the Sales of motor vehicle, which amounted to RM7.3 billion. This trend is in line with data from the Malaysian Automotive Association (MAA), which reported total vehicles sales of 52,414 units, while the Road Transport Department Malaysia (JPJ) recorded 56,690 vehicle registrations during the same period. Nevertheless, other groups within the sub-sector continued to register positive growth, including Sales of motor vehicle parts & accessories (6.6%), Maintenance and repair of motor vehicles (9.5%), as well as Sales, maintenance and repair of motorcycles (0.7%), reflecting sustained demand for vehicle servicing and aftermarket components.

Meanwhile, online retail sales continued to record positive growth in February, with the sales index increasing by 5.8 per cent year-on-year, slightly moderating from 5.9 per cent in the previous month. This trend indicates sustained strong demand within the e-commerce segment.

Digital payment activities continued to strengthen in February. E-money transactions surged by 74.8 per cent year-on-year, reaching RM30.2 billion, reflecting the rising adoption of cashless payment methods. The Real-time Retail Payments Platform (RPP) also maintained strong performance, with total transactions amounting to RM323.8 billion, registering a growth of 29.4 per cent. Meanwhile, FPX transactions grew by 23.3 per cent to RM40.6 billion. Credit card and debit card transactions were recorded at RM18.2 billion and RM13.5 billion, respectively.

In terms of the volume index, Wholesale & retail trade recorded a year-on-year increase of 4.4 per cent, mainly supported by the Wholesale trade and Retail trade sub-sectors, which grew by 6.2 per cent and 5.4 per cent, respectively. However, on a seasonally adjusted basis, the volume index declined by 1.8 per cent month-on-month.
