PREFACE

The monthly Labour Force Report, Malaysia, presents the statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS). The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for December 2024 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events. In addition, annual changes from the same month of the previous year are also reported.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN

GLOSSARY

Actively unemployed	:	Persons who were available for work and were actively looking for a job during the reference week.
Category of skills	:	For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as below: <p>Skilled workers:</p> <ol style="list-style-type: none"> 1. Managers; 2. Professionals; and 3. Technicians and associate professionals. <p>Semi-skilled workers:</p> <ol style="list-style-type: none"> 4. Clerical support workers; 5. Services and sales workers; 6. Skilled agricultural, forestry, livestock, and fishery workers; 7. Craft and related trades workers; and 8. Plant and machine operators and assemblers. <p>Low-skilled workers:</p> <ol style="list-style-type: none"> 9. Elementary occupations. <p>Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with the addition of group 0 - Armed Forces occupations.</p>
Economic activity	:	Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors: Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.
Employed	:	All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker or unpaid family worker.
Employee	:	A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.
Employer	:	A person who operates a business, a plantation or other trade and employs one or more workers to help him.
Employment-to-population ratio	:	The proportion of the employed population to working-age population.
Inactively unemployed	:	Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.

GLOSSARY

Labour force participation rate	:	The ratio of the labour force to the working-age population, expressed as a percentage.
Outside labour force	:	All persons not classified as employed or unemployed are classified as outside the labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.
Own-account worker	:	A person who operates his own farm, business or trade without employing any paid workers to conduct his farm, trade or business.
Skill-related underemployment	:	Those with tertiary education and working in the semi-skilled and low-skilled categories.
Time-related underemployment	:	A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.
Unemployed	:	Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.
Unemployment rate	:	The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.
Unpaid family worker	:	A person who works without pay or wages on a farm, business or trade operated by another member of the family.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

INCLUSIVITY AND SUSTAINABILITY

KEY REVIEWS

- During the month, the number of **employed persons** continued its positive trend, increasing by **0.2 per cent (+28.4 thousand persons)**, reaching **16.78 million persons** (November 2024: 16.75 million persons). The **employment-to-population ratio**, which indicates the ability of an economy to create employment, was unchanged at **68.3 per cent** as in the previous month.
- In terms of economic sector, the number of employed persons in the **Services** sector steadily increased, largely in **Wholesale & retail trade; Art, entertainment & recreation; and Accommodation and food & beverage services** activities. On the same note, the **Manufacturing, Construction** and **Agriculture** sectors also registered positive employment growth, while employment in **Mining & quarrying** sector decreased during the month.
- Most of the employed persons were categorised as **employees'**, making up **74.9 per cent** of the total employments in December 2024. This group rose by **0.1 per cent (+14.5 thousand persons)** to **12.56 million persons** (November 2024: 12.54 million persons). Likewise, the number of **own-account workers** also showed an upward trend, increasing by **0.4 per cent (+11.4 thousand persons)** to **3.12 million persons** (November 2024: 3.11 million persons).
- During the month, the number of **unemployed persons** was declining further, with a reduction of **0.4 per cent** or equivalent to **2.4 thousand persons**, registering a lower number of unemployed at **544.3 thousand persons** (November 2024: 546.7 thousand persons). The **unemployment rate** in December 2024 edged down by **0.1 percentage points** to **3.1 per cent**, reaching the lowest rate almost in a decade (May 2015: 3.1%; November 2024: 3.2%).
- The number of **labour force** in December 2024 remained on an upward trend, with a rise of **0.1 per cent (+25.9 thousand persons)** to **17.32 million persons** (November 2024: 17.29 million persons). Accordingly, a higher **labour force participation rate (LFPR)** was recorded during the month at **70.6 per cent** compared to 70.5 per cent in the previous month.
- In December 2024, the number of persons **outside the labour force** further decreased, falling slightly by **0.04 per cent (-2.7 thousand persons)** to **7.22 million persons** (November 2024: 7.23 million persons). **Housework/ family responsibilities** were the main reason for the outside labour force, which contributed **43.1 per cent** of the total, while the **schooling/ training** category ranked second at **42.3 per cent**.
- Malaysia's labour market performed well throughout the year, with unemployment remaining low while employment saw a steady expansion. The positive country's labour market in 2024 was partly contributed by a sustained labour demand across various sectors, particularly in the private sector, which saw an increase in job opportunities. The anticipation for Malaysia's labour force in 2025 is comparatively favourable, whereby employment was observed to rise consistently, while unemployment is expected to remain low. Key sectors such as Manufacturing particularly electrical and electronics, and Services will propel job creation.

Note: The monthly Labour Force Survey indicators are still using the estimated population data of the Malaysia Population and Housing Census, 2010

THE LABOUR MARKET REMAINED STABLE IN DECEMBER, ALIGNED WITH THE ECONOMY'S EXPANSION, SHOWING A HIGHER NUMBER OF EMPLOYMENTS WHILE UNEMPLOYMENT IS DECLINING

In 2024, the global economy experienced a mix of challenges and modest growth. The International Monetary Fund (IMF) projected global growth at 3.2 per cent for the year, with a slight increase to 3.3 per cent in 2025. However, this growth was uneven across regions and faced several headwinds, such as persistent inflation in the Services sector, complicated monetary policy normalisation, escalating trade tensions and policy uncertainties that posed risks to global growth and geopolitical instability¹. Despite these challenges, the global economy showed signs of resilience, particularly in advanced economies where growth was expected to slow but remain positive. As for Malaysia's economy, it reflected a positive trajectory, supported by strong domestic demand, strategic investments, and a recovering external sector². In line with the healthier economic growth, various initiatives have been implemented by the government to enhance the economy and the labour market. Therefore, it had escalated the business and employment opportunities, which thus led to the well performance of the country's labour market during the year.

As in the earlier month of 2024, Malaysia's labour force proved sturdy, bolstered by an improvement in the business and economic situation, which generated various opportunities as the country's economy flourished. The improvement in economic activities encouraged companies' expansions, creating more job opportunities and increased labour demand to meet the industrial requirements. Malaysia's economy was much greater in the initial three months of 2024 due to export expansion, particularly in electrical and electronic (E&E) sub-sectors. As the country's labour market remained stable in February 2024, the women's labour force participation rate surpassed pre-COVID-19 levels and continues to trend upwards. New technologies also facilitate the rise of flexible working arrangements, which encouraged higher labour force participation, particularly among females, and promote greater labour mobility.

During March 2024, amidst the world's faced uncertainties and geopolitical tensions, the global economy improved and Malaysia's economic stability persisted. This situation propelled by increased tourism activities, robust domestic demand, and favourable external conditions. Thus, this had positively contributed to the country's labour market during the month. Additionally, the holy month of Ramadan spurred economic activity, with both Muslims and non-Muslims leveraging business opportunities to support their livelihoods, fostering a positive economic outlook, and stimulating further growth in Malaysia's labour market. Therefore, in the first quarter of 2024, the continued expansion of Malaysia's labour force, reflecting the nation's stable economic trajectory, was denoted by an increasing number of employment and reducing unemployment.

Apart from that, Malaysians were celebrating Eid al-Fitr in early April 2024. This celebration seems to have partly sustained the country's economy and further supported the improvement of the labour market due to higher demands in various types of food and beverage (F&B) businesses, especially in bakeries, pastries, cookies, and other traditional Malay foods. Many new and existing entrepreneurs took the opportunity to be more creative by creating various innovations and quality foods that could attract buyers, further launching their online businesses or opening stalls in Aidilfitri bazaars. Thus, many businesses have commenced their activities particularly for Micro, Small, and Medium Enterprises (MSMEs), leading to a healthier economic situation. Therefore, a vibrant labour force situation was observed during the month.

¹ <https://www.imf.org/en/Publications/WEO/Issues/2024/07/16/world-economic-outlook-update-july-2024>

² <https://theedgemalaysia.com/node/723469>

In addition, the increasing tourism activity in May 2024 and its positive spillover effects on tourism-related industries such as Wholesale & retail trade, Food and beverages services, Accommodation activities and the implementation of national projects are also seen to benefit the country's labour market in terms of labour demand and supply. In relation to the encouraging economic and labour market situation in May 2024, the labour force position further strengthened with a continuous increase in the number of employed persons, while the unemployed were much lower. To address the labour force concern, the Malaysian government had implemented an assortment of initiatives to strengthen employment during the first half of 2024. To ensure the stability of Malaysia's economy and the labour market, the government took the initiative to carry out many programs by organising career carnivals, skills development programs, and other initiatives to improve employment opportunities, providing job information to seekers and contributing to better labour force growth.

Entering July until September 2024, the Malaysian government placed a strong focus on Micro, Small and Medium Enterprises (MSMEs), which seems to have sustained the country's economy and further supported the improvement of the labour force in July 2024, by allocating a budget for programs promoting business and entrepreneurship. This initiative led to greater participation in MSMEs, which in turn bolstered the labour market. According to Aminuddin Zulkipili, Chairman of the Federal Agricultural Marketing Authority (FAMA), Malaysia Fest 2024 in Singapore featured approximately 300 booths showcasing a wide range of Malaysian products across industries such as agriculture, agro-food, tourism, health, fashion, and beauty items³. These efforts enhanced the productivity and profitability of MSME entrepreneurs, resulting in job creation, improved economic prospects, a rise in employment, and a continued decline in unemployment.

In the meantime, the continued increasing demand for Malaysian products has driven exports and attracted various investment activities, particularly in the semiconductor sector of the manufacturing firm. Yang Berhormat Tuan Lee Ting Han, a member of the Johor State Executive Council (EXCO) and Chairman of Investment, Trade, Consumer Affairs, and Human Resources, highlighted that the establishment of new factories from Singapore has created employment opportunities and bolstered the supply chain to meet global market demands⁴. The opening of companies from other countries to invest in Malaysia not only contributed to Malaysia's economic growth but also helped to nourish the labour market in August 2024. During September 2024, the government actively promoted tourism-related activities with various initiatives and programs, especially in the Agricultural sector. Yang Berhormat Datuk Seri Haji Mohamad bin Sabu stated that the Malaysia Agriculture, Horticulture, and Agro-Tourism Exhibition (MAHA) 2024 has successfully attracted international tourists and created around 5,556 job opportunities during the Agro Job Fair⁵. This initiative not only expanded the tourism industry but also created more job opportunities in the Services sector and further attracted more labour participation in the market during the month.

A healthier Malaysian economy continued its better outlook in October and November 2024, despite global economic uncertainties and geopolitical tensions. The encouraging country's economic growth has attracted many investors globally, such as the US company that invest in Pulau Pinang, which has created 3,000 job opportunities, thus contributing to a positive impact on employment and lives worldwide⁶. A higher number of tourist arrivals has brought a variety of tourism-related activities, which led to the creation of more MSMEs businesses that are related to those activities. This contributed to the dynamic Malaysian labour force position with more job opportunities and further encouraged the job seekers to fulfil the employment needs. Thus, a better outlook for the labour force was observed in October 2024. The Malaysian labour market continued to thrive in November 2024, supported by

⁵ <https://www.utusan.com.my/pilihan-utusan/2024/09/5556-peluang-kerjaya-menanti-belia-di-maha-2024/>

⁶ <https://www.bharian.com.my/amp/bisnes/korporat/2024/11/1322930/firma-dexcom-labur-rm283-bilion-buka-kilang-di-pulau-pinang>

increasing tourism-related activities, strong investments, and increased export activity. The higher global demand for goods had improved the nation's exports and this provided more advantages to the Manufacturing industry to increase their production and fulfil the export demand. Therefore, many new employment opportunities were created to meet the demand for labour, which boosted the production of goods.

In addition, the government has also implemented various strategic measures to stimulate the country's economic growth throughout 2024 to provide lasting prosperity for the people and the country, including digital economy investments valued at RM254.7 billion to generate 159,000 jobs. Additionally, the RM30.1 billion investment in Kedah's semiconductor sector is set to encourage Malaysia's semiconductor industry and attract international investors. Moreover, several initiatives such as the Bumiputera Economic Transformation Plan 2035 (PuTERA35) and the Public-Private Partnership Master Plan (PIKAS) 2030 aimed to enhance Bumiputera economic participation and promote socio-economic inclusion and balance⁷. Collectively, these efforts underscore Malaysia's economic stability and the government's dedication to maintaining a productive labour market.

In December 2024, Malaysia experienced severe floods that affected the east coast states, especially in Kelantan, Terengganu, and Pahang, further undermining the local economy in Agriculture industry and infrastructure. However, the Malaysian government had implemented several alternatives to support employment and maintain economic stability. According to Human Resources Minister Steven Chee Keong, who highlighted that employers must refrain from arbitrarily reducing wages or enforcing unreasonable conditions on employees unable to report to work due to the disaster⁸. This initiative aimed to protect workers' rights and maintain labour force stability as well as the nation's economy during the month.

Furthermore, at the end of 2024, festive celebrations and the year-end school holidays have significantly increased foot traffic at malls and shopping outlets, indicating steady progress in Malaysia's economy. The holiday season spurred business activity, particularly in the consumption of goods and services. This has led to more stimulation of income for businesses, which may demand more labour to support the business operation. Moreover, government efforts to create more job opportunities and reinforce the labour market have contributed to improving labour market conditions during the month. As a result, the labour market remained stable in December, aligned with the economy's expansion, showing a higher number of employments while unemployment is declining.

As for Malaysia's Leading Index (LI) for November 2024, it rose by 2.5 per cent to 112.6 points (November 2023: 109.8 points). On a monthly basis, LI rebounded by 1.1 per cent after experiencing a decline for three consecutive months. Looking at the smooth long-term trend in November 2024, the LI remains below 100 points. Although the LI is still below the trend, Malaysia's economy is expected to continue growing, supported by strong domestic demand and increasing semiconductor-related exports following a sustained global demand. In terms of monthly external trade indicators, both exports and imports showed a positive sign in December 2024, increasing by 9.7 per cent (November 2024: -1.4%) and 7.3 per cent (November 2024: -4.3%), respectively.

2 The number of employed persons continued its positive trend

During the month, the number of **employed persons** continued its positive trend, increasing by **0.2 per cent (+28.4 thousand persons)**, reaching **16.78 million persons** (November 2024: 16.75 million persons). The seasonally adjusted estimates also reflected a 0.2 per cent rise in the number of employed persons. Year-on-year, the number of employed persons recorded an increase of 1.9 per cent (+317.8 thousand persons) compared to December last year at 16.46 million persons.

In terms of economic sector, the number of employed persons in the Services sector steadily increased, largely in Wholesale & retail trade; Art, entertainment & recreation; and Accommodation and food & beverage services activities. On the same note, the Manufacturing, Construction and Agriculture sectors also registered positive employment growth while employment in Mining & quarrying sector decreased during the month.

The **employment-to-population ratio**, which indicates the ability of an economy to create employment, was unchanged at **68.3 per cent** as in the previous month. Comparing with one year earlier, the ratio went up by 0.5 per cent from 67.8 per cent in December 2023 [**Chart 1**].

Chart 1: Employed persons and employment-to-population ratio, January 2019 - December 2024

Most of the employed persons were categorised as **employees**, making up **74.9 per cent** of the total employments in December 2024. This group rose by **0.1 per cent (+14.5 thousand persons)** to **12.56 million persons** (November 2024: 12.54 million persons). Likewise, the number of **own-account workers** also showed an upward trend, increasing by **0.4 per cent (+11.4 thousand persons)** to **3.12 million persons** (November 2024: 3.11 million persons). This category mainly includes daily income earners working as small business operators, such as retailers, hawkers, market and stall vendors, as well as smallholders [**Chart 2**].

Chart 2: Employed person by status in employment, November 2024 and December 2024

The number of **employed persons who were temporarily not working** rose to **80.5 thousand persons**, reflecting an increase of **14.6 per cent** or equivalent to **10.3 thousand persons** (November 2024: 70.2 thousand persons). However, on a year-on-year basis, this figure decreased by 16.0 per cent (-15.3 thousand persons) compared to 95.8 thousand persons in December 2023. This group consists of individuals who were likely unable to work temporarily but were not classified as unemployed, as they had jobs to return to.

3 The unemployment rate in December 2024 edged down to 3.1 per cent

During the month, the number of **unemployed persons** was declining further, with a reduction of **0.4 per cent** or equivalent to **2.4 thousand persons**, registering a lower number of unemployed at **544.3 thousand persons** (November 2024: 546.7 thousand persons). The **unemployment rate** in December 2024 edged down by **0.1 percentage points** to **3.1 per cent**, reaching the lowest rate almost in a decade (May 2015: 3.1%; November 2024: 3.2%). In the meantime, in seasonally adjusted terms, the number of unemployed decreased by 0.8 per cent, with 3.2 per cent of the unemployment rate.

Similarly, the number of unemployed persons reduced further by 4.1 per cent (-23.5 thousand persons) as against to the same month of the previous year (December 2023: 567.8 thousand persons). The unemployment rate also declined by 0.2 percentage points as compared to 3.3 per cent in December 2023 [Chart 3].

Chart 3: Unemployed and unemployment rate, 1982 - 2023 and January 2021 - December 2024

Looking at the unemployment category, the **actively unemployed** or those who were available for work and were actively seeking jobs, comprised **79.5 per cent** of the total unemployed persons in December 2024. This category posted a decrease of **0.8 per cent (-3.4 thousand persons)** to **432.8 thousand persons** (November 2024: 436.2 thousand persons). From the total actively unemployed, **62.7 per cent** were those who were **unemployed for less than three months**, while **5.8 per cent** were those who were in **long-term unemployment for more than a year**⁹ [Chart 4].

On the other hand, those who believed that there were no jobs available or were **inactively unemployed** registered an increase of **0.8 per cent (+0.9 thousand persons)** to **111.5 thousand persons** (November 2024: 110.6 thousand persons).

Chart 4: Unemployed category and duration of unemployment for the actively unemployed, November 2024 and December 2024

The unemployment rate for youth aged **15 to 24 years** in December 2024 fell to **10.3 per cent**, a decline of **0.1 percentage points**, with **299.7 thousand unemployed youths** (November 2024: 10.4%; 300.6 thousand persons), as illustrated in **Chart 5**. On the same note, the unemployment rate for youth aged **15 to 30 years** also declined by **0.1 percentage points** to **6.1 per cent**, registering **410.8 thousand unemployed youths** (November 2024: 6.2%; 415.6 thousand persons).

https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

The number of **labour force** in December 2024 remained on an upward trend, with a rise of **0.1 per cent (+25.9 thousand persons)** to **17.32 million persons** (November 2024: 17.29 million persons). Accordingly, a higher **labour force participation rate (LFPR)** was recorded during the month at **70.6 per cent** compared to 70.5 per cent in the previous month. In terms of seasonally adjusted data the number of labour force showed a 0.2 per cent increase with the LFPR remained at 70.5 per cent.

By comparing to December last year, the number of labour force improved by 1.7 per cent or equivalent to 294.2 thousand persons (December 2023: 17.03 million persons). Subsequently, the LFPR went up by 0.4 percentage points from 70.2 per cent in December 2023 [Chart 6].

Chart 6: Labour force and LFPR, 1982 - 2023 and January 2021 - December 2024

In December 2024, both male and female labour forces posted increases. The **male labour force** reached **10.57 million persons**, up from 10.56 million persons in November 2024, while the **female labour force** went up to **6.74 million persons**, compared to 6.73 million persons in the previous month. Subsequently, both **male** and **female LFPR** rose by **0.1 percentage points** to **83.4 per cent** and **56.9 per cent**, respectively.

In a year-on-year comparison, the male labour force edged up by 1.6 per cent (December 2023: 10.41 million persons), while the female labour force rose by 2.0 per cent from 6.61 million persons in December last year. As a result, both male and female LFPR registered a rise of 0.4 percentage points, with the male LFPR increasing from 83.0 per cent and the female LFPR from 56.5 per cent in December 2023 [Chart 7].

Chart 7: Labour force and LFPR by sex, 1982 - 2023 and January 2021 - December 2024

5 Housework/ family responsibilities were the main reason for the outside labour force

In December 2024, the number of persons **outside the labour force** further decreased, falling slightly by **0.04 per cent (-2.7 thousand persons)** to **7.22 million persons** (November 2024: 7.23 million persons). Compared to the same month of the prior year, the number of persons outside the labour force fell by 0.1 per cent or equivalent to 10.3 thousand persons (December 2023: 7.23 million persons). **Housework/ family responsibilities** were the main reason for the outside labour force, which contributed **43.1 per cent** of the total, while the **schooling/ training** category ranked second at **42.3 per cent** [Chart 8].

Chart 8: Share of outside labour force by reasons for not seeking work, November 2024 and December 2024

6 LABOUR FORCE PARTICIPATION RATE AND UNEMPLOYMENT RATE IN 2024 (PRELIMINARY)

In the global trend, labour force participation rates are rising in high-income nations, particularly among women and older workers. This has allowed individuals of all age groups, especially women, to return to the labour force. The strong growth in participation rates across various age groups in 2024 has more than offset the impact of demographic changes, such as the increasing share of older individuals, which typically lowers the overall labour force participation rate for those aged 15 and above.

Based on the monthly average data, the preliminary assessment of the country's labour force performance for 2024 signifies a rise in the LFPR. In 2024, the LFPR increased by 0.4 percentage points, reaching 70.4 per cent, compared to 70.0 per cent in 2023. The positive shift in the labour market in 2024 reflects strong and steady economic growth throughout the year.

Malaysia's economy is seen to remain on a positive growth trajectory in 2024, driven by strong economic performance despite ongoing uncertainties in the external environment. In line with this performance, the country's labour market position continued to show a healthier growth momentum throughout the year, steered by encouraging economic growth.

As a result, this trend has gradually restored the unemployment rate to the pre-pandemic level. In 2024, the unemployment rate decreased by 0.1 percentage points to 3.3 per cent from 3.4 per cent as recorded in the preceding year [Chart 9].

Chart 9: LFPR and unemployment rate, 1982 - 2024^p

7 LOOKING AHEAD

In 2024, Malaysia's economy showed strong resilience and growth. Based on the advanced Gross Domestic Product (GDP) estimate, Malaysia's economy is estimated to increase 4.8 per cent in the fourth quarter of 2024 compared to 5.3 per cent in the previous quarter. The economy's performance was steered by positive growth in the Services, Manufacturing, and Construction sectors. Nonetheless, the Agriculture and Mining & Quarrying sector is slower during the quarter¹⁰. Overall, Malaysia's

¹⁰ Advanced Gross Domestic (GDP) Estimates, Fourth Quarter of 2024 Report

economy expanded by 5.1 per cent for the full year, edged up from 3.6 per cent in 2023. The Services, Manufacturing, and Construction sector were the main contributors to this growth.

In line with these situations, Malaysia's labour market also performed well throughout the year, with the unemployment rate remaining low beside the number of unemployed decreasing, while employment saw a steady expansion. The positive country's labour market in 2024 was partly contributed by a sustained labour demand across various sectors, particularly in the private sector, which saw an increase in job opportunities. Increased investment activities in infrastructure projects and other key sectors have also led to the creation of more job opportunities; strong domestic consumption supported the growth of businesses, leading to higher employment rates.

Moreover, the recovery in global trade and exports boosted the Manufacturing and export-oriented sectors, leading to job creation, supported by government initiatives with programs aimed at improving workforce skills and bridging the gap between education and industry needs, such as the Madani Economy Framework, played a significant role in enhancing employment opportunities. These factors combined to create a positive momentum in Malaysia's labour market, resulting in a low unemployment rate and increased employment.

As for the year 2025, Malaysia's economic situation is projected to show moderate growth. The GDP growth rate was projected to be around 4.6 per cent, a slight decrease from the estimated 5.1 per cent in 2024. The country's economy was supported by robust investment and resilient consumption, despite facing potential inflationary pressures and global uncertainties¹¹.

In terms of the labour force performance, the anticipation for Malaysia's labour force in 2025 is comparatively favourable. The employment was observed to continue to expand steadily, while the unemployment is expected to remain low. Key sectors such as Manufacturing particularly electrical and electronics, and Services would propel job creation.

Furthermore, with the "Visit Malaysia 2026" campaign, which aims to attract more foreign tourists, the tourism industry is poised for robust growth. However, there are potential risks, including geopolitical tensions and trade disruptions, which could impact the country's labour market. Amidst these uncertainties, the overall outlook remains optimistic, supported by stronger domestic growth and improved trade prospects¹².

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982- 2000, category of occupation are classified according to the "Dictionary of Occupational Classification, 1980" as follows:

- 1: Professional, technical and related workers
- 2: Administrative and managerial workers
- 3: Clerical and related workers
- 4: Sales workers
- 5: Service workers
- 6: Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7: Production and related workers, transport equipment operators and labourers

3. ²For 2001 - 2010, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" as follows:

- 1: Legislators, senior officials and managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural and fishery workers
- 7: Craft and related trade workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

4. ³For 2011 - 2015, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2008" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical support workers
- 5: Service workers and shop and market sales workers
- 6: Skilled agricultural, forestry and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

5. ⁴For 2016 - 2021, category of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2013" as follows:

- 1: Managers
- 2: Professionals
- 3: Technicians and associate professionals
- 4: Clerical workers
- 5: Service and sales workers
- 6: Skilled agricultural, forestry, livestock and fishery workers
- 7: Craft and related trades workers
- 8: Plant and machine-operators and assemblers
- 9: Elementary occupations

6. ⁵For 2022 onwards, categories of occupation are classified according to the "Malaysia Standard Classification of Occupations (MASCO) 2020"7. ^f Revision based on the current population estimates from Population and Housing Census 2020

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

3. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

4. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Other service activities
 T: Activities of households as employers

5. ⁴For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'6. [†] Revision based on the current population estimates from Population and Housing Census 2020

Notes:

1. Labour Force Survey indicators for 2019 and previously still using the estimated population data of the Malaysia Population and Housing Census, 2010

2. ¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Agriculture, forestry, livestock and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas and water
 E: Construction
 F: Wholesale and retail trade, restaurants and hotels
 G: Transport, storage and communications
 H: Finance, insurance, real estate and business services
 I: Community, social and personal services

3. ²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Agriculture, hunting and forestry
 B: Fishing
 C: Mining and quarrying
 D: Manufacturing
 E: Electricity, gas and water supply
 F: Construction
 G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
 H: Hotels and restaurants
 I: Transport, storage and communications
 J: Financial intermediation
 K: Real estate, renting and business activities
 L: Public administration and defence; compulsory social security
 M: Education
 N: Health and social work
 O: Other community, social and personal service activities
 P: Private households with employed persons

4. ³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Agriculture, forestry and fishing
 B: Mining and quarrying
 C: Manufacturing
 D: Electricity, gas, steam and air conditioning supply
 E: Water supply; sewerage, waste management and remediation activities
 F: Construction
 G: Wholesale and retail trade, repair of motor vehicles and motorcycles
 H: Transportation and storage
 I: Accommodation and food service activities
 J: Information and communication
 K: Financial and insurance/takaful activities
 L: Real estate activities
 M: Professional, scientific and technical activities
 N: Administrative and support service activities
 O: Public administration and defence; compulsory social security
 P: Education
 Q: Human health and social work activities
 R: Arts, entertainment and recreation
 S: Others service activities
 T: Activities of households as employers

5. ⁴For year 2011-2019 & 2021-2023, total includes 'Activities of extraterritorial organizations and bodies'6. [†] Revision based on the current population estimates from Population and Housing Census 2020
