The monthly Labour Force Report, Malaysia, presents statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS) through a household approach. The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes, particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for January 2026 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

KONSEP DAN DEFINISI

Apa itu Survei Tenaga Buruh (STB)?

Survei Tenaga Buruh (STB) dilaksanakan untuk mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran dari aspek penawaran tenaga buruh.

STB meliputi kedua-dua kawasan bandar dan luar bandar bagi semua daerah pentadbiran di semua negeri di Malaysia menggunakan pendekatan *multi-modal data collection* melalui temu ramah bersemuka dan *Computer-Assisted Telephone Interview* (CATI)

STB dilaksanakan berdasarkan garis panduan dan syor oleh *International Labour Organization* (ILO).

Populasi penyiasatan merangkumi penduduk yang tinggal di tempat kediaman persendirian dan tidak termasuk mereka yang tinggal di institusi-institusi seperti hotel, hospital, asrama, penjara dan pekerja yang tinggal di rumah kongsi.

Umur bekerja bagi analisis STB di Malaysia merujuk kepada ahli isi rumah yang berumur 15 hingga 64 tahun semasa minggu rujukan, sama ada berada di dalam tenaga buruh atau di luar tenaga buruh.

TENAGA BURUH

- Penduduk dalam kumpulan umur bekerja 15 hingga 64 tahun (dalam tahun genap pada hari lahir terakhir).
- Sama ada bekerja atau menganggur semasa minggu rujukan.

BEKERJA

- Orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji).
- Mereka yang tidak bekerja semasa minggu rujukan disebabkan sakit, kecederaan, cuaca buruk, bercuti, pertelingkahan buruh dan sebab-sebab sosial atau keagamaan tetapi mempunyai pekerjaan, ladang, perusahaan atau perusahaan keluarga lain untuk kembali bekerja.
- Mereka yang tidak bekerja buat sementara waktu tetapi bergaji dan pasti akan dipanggil bekerja semula.

PENGANGGUR

- Mereka yang tidak mempunyai pekerjaan tetapi berminat untuk bekerja dan sedang mencari kerja.
- Dikelaskan kepada dua kumpulan iaitu penganggur aktif dan penganggur tidak aktif.

LUAR TENAGA BURUH

- Penduduk yang tidak dikelaskan sebagai bekerja atau menganggur.
- Contoh: suri rumah, pelajar, mereka yang telah bersara atau tidak berkeupayaan dan mereka yang tidak berminat untuk mencari pekerjaan.

KADAR PENGANGGURAN

- Perkadaran penduduk yang menganggur (tidak bekerja) kepada jumlah penduduk di dalam tenaga buruh.
- Peratus penduduk di dalam tenaga buruh yang tidak bekerja.

KADAR PENYERTAAN TENAGA BURUH

- Aktiviti ekonomi penduduk pada keseluruhannya bergantung kepada ciri-ciri demografi sesuatu populasi.
- Pecahan mereka yang aktif secara ekonomi berbeza di antara kumpulan-kumpulan kecil penduduk tersebut.
- Perbezaan ini diukur dengan kadar aktiviti tertentu yang dikenali sebagai kadar penyertaan tenaga buruh.
- Kadar penyertaan tenaga buruh ditakrifkan sebagai perkadaran penduduk dalam tenaga buruh kepada jumlah penduduk dalam umur bekerja (15 hingga 64 tahun) yang dipersempakan dalam bentuk peratus.

PELARASAN MUSIM

- Data siri masa adalah amat berguna untuk ahli ekonomi, pembuat dasar & keputusan serta penganalisis siri masa untuk mengenal pasti ciri-ciri penting siri ekonomi seperti arah aliran, *turning point* dan konsistensi antara penunjuk ekonomi yang lain. Kadangkala ciri ini sukar untuk diperhatikan kerana pergerakan bermusim. Oleh itu, sekiranya kesan bermusim boleh disingkirkan, arah aliran data siri ini dapat dilihat dengan lebih baik. Anggaran dan penyingkiran kesan bermusim dipanggil pelarasan bermusim.
- Pelarasan bermusim adalah satu proses untuk mengenal pasti dan menyingkirkan bentuk pola bermusim yang biasa berlaku dalam tempoh satu tahun, yang mungkin juga merangkumi pengaruh dari kesan cuti yang bergerak dan hari bekerja/ berdagang bagi suatu tempoh. Objektif utama proses ini adalah untuk menyerlahkan arah aliran dan pergerakan-pergerakan jangka pendek dalam siri ini.
- Di Malaysia, kebanyakan data siri masa dipengaruhi oleh kesan bermusim. Oleh itu, untuk menghapus dan melaras kesan bermusim data siri masa ekonomi Malaysia, pakej standard pelarasan bermusim, X-12 ARIMA telah digunakan oleh Jabatan Perangkaan Malaysia.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

SITUASI TENAGA BURUH MALAYSIA PADA JANUARI 2026 KEKAL BERDAYA TAHAN, MENCERMINKAN KESTABILAN EKONOMI YANG BERTERUSAN DAN PERTUMBUHAN PROGRESIF

Ekonomi Malaysia terus menunjukkan daya tahan yang kukuh pada Januari 2026, disokong oleh dasar monetari yang stabil serta permintaan domestik yang berterusan. Menurut laporan media, Kadar Dasar Semalaman (OPR) dikekalkan pada paras semasa oleh Bank Negara Malaysia, mencerminkan kedudukan inflasi yang stabil serta pertumbuhan ekonomi yang mampan¹. Keputusan untuk mengekalkan OPR ini menunjukkan keyakinan terhadap kekuatan permintaan domestik serta keteguhan sektor-sektor ekonomi utama. Persekitaran makroekonomi yang stabil ini telah menyumbang secara positif kepada sentimen perniagaan, peluang pekerjaan serta prestasi keseluruhan pasaran buruh pada awal bulan 2026.

Di samping itu, sektor pelancongan menjadi antara pemacu utama kepada perkembangan ekonomi, dengan negeri Johor menyasarkan ketibaan dua belas juta pelancong pada tahun 2026 serta sumbangan ekonomi yang diunjurkan melebihi RM42 bilion. Menurut Mohd Jafni Md Shukor yang merupakan Pengerusi Jawatankuasa Perumahan dan Kerajaan Tempatan Negeri, kerajaan negeri telah mempergiat pelaksanaan Tahun Melawat Johor 2026 dengan menganjurkan lebih daripada seratus program dan acara pelancongan dalam pelbagai skala termasuk berskala besar, sederhana dan berasaskan komuniti di kesemua sepuluh daerah, dengan kerjasama agensi negeri dan persekutuan, pihak berkuasa tempatan serta penggiat industri pelancongan². Inisiatif ini, termasuk penganjuran festival utama dan tarikan eko-pelancongan, bertujuan memperkukuh daya tarikan pelancongan Johor serta merangsang aktiviti ekonomi yang lebih luas di seluruh negeri, sekali gus memberikan impak positif terhadap aktiviti berkaitan pelancongan.

Selain itu, pelaksanaan program SARA bulanan yang bermula Januari 2026 mencerminkan komitmen berterusan kerajaan dalam memperkukuh perlindungan sosial serta membantu meringankan tekanan kos sara hidup³. Inisiatif ini dijangka menyokong perbelanjaan isi rumah serta merangsang pertumbuhan ekonomi domestik melalui kesan limpahan positif, terutamanya dalam sektor runcit dan perkhidmatan. Secara keseluruhannya, perkembangan ini dilihat menjana lebih banyak pendapatan kepada perniagaan, sekali gus mewujudkan lebih banyak peluang pekerjaan. Selaras dengan situasi positif semasa, ia menyumbang kepada tenaga buruh Malaysia yang stabil dan progresif pada Januari 2026, disokong oleh pengurusan monetari yang berhemat, aktiviti pelancongan yang rancak serta langkah sokongan domestik yang berterusan.

Tambahan pula, ekonomi Malaysia dijangka terus kekal berdaya tahan berdasarkan prestasi Indeks Pelopor (IP) pada Disember 2025, yang mencatatkan peningkatan 0.1 peratus kepada 114.0 mata berbanding 113.9 mata pada bulan yang sama tahun sebelumnya. Sementara itu, prestasi bulanan IP naik sebanyak 0.5 peratus pada Disember 2025 berbanding bulan sebelumnya. Melihat kepada arah aliran jangka panjang terlicin pada Disember 2025, IP terus berada di bawah paras 100.0 mata. Walau bagaimanapun, ekonomi Malaysia dijangka terus kekal berdaya tahan, disokong oleh kecairan kewangan domestik yang stabil serta permintaan berterusan terhadap komponen elektronik. Pada masa yang sama, indikator perdagangan luar bulanan bagi Januari 2025, kedua-dua eksport dan import merekodkan pertumbuhan negatif bulan ke bulan, masing-masing sebanyak 3.9 peratus (Disember 2025: +13.4%) dan -4.0 peratus (Disember 2025: -9.0%), berbanding pertumbuhan positif pada bulan sebelumnya.

6 MENUJU KE HADAPAN

Prospek pasaran buruh Malaysia pada awal 2026 kekal positif dan berdaya tahan, disokong oleh asas ekonomi yang kukuh, kedudukan guna tenaga yang stabil dan permintaan berterusan bagi buruh mahir

Menjelang awal tahun 2026, ekonomi Malaysia menunjukkan momentum yang kukuh dan pasaran buruh yang stabil. Ini adalah berikutan daripada sokongan permintaan domestik, eksport barangan teknologi tinggi dan pemulihan sektor pelancongan, meskipun berdepan ketidaktentuan global dan pergolakan geopolitik.

Pada tahun 2026, Malaysia dijangka merekodkan pertumbuhan KDNK sekitar 4.0 peratus hingga 5.0 peratus, setelah berakhirnya tahun 2025 dengan momentum yang stabil. Ini disokong oleh permintaan domestik dan eksport teknologi elektronik dan semikonduktor yang kukuh⁵. Berdasarkan indikator IP juga menunjukkan ekonomi negara kekal berada dalam landasan pertumbuhan yang lebih tinggi, dengan IP mencatatkan sedikit peningkatan menjelang suku kedua 2026. Selain itu, kajian oleh bank dan institusi kewangan juga melihat ekonomi Malaysia kekal stabil pada tahun 2026, disokong oleh eksport elektrik dan elektronik (E&E) dan semikonduktor yang kukuh, pasaran buruh yang semakin

kukuh, peningkatan pelaburan langsung asing (FDI) dan pemulihan pelancongan yang berterusan, walaupun terdapat tekanan daripada dasar perdagangan global dan kos input⁶.

Selaras dengan itu, kedudukan pasaran buruh negara dilihat terus stabil dengan bilangan penduduk bekerja yang terus merekodkan peningkatan, manakala kadar pengangguran kekal rendah. Ekonomi Malaysia pada akhir 2025 juga menyaksikan produktiviti buruh meningkat, mencerminkan output yang lebih tinggi per pekerja, sekali gus memberi isyarat positif terhadap pasaran tenaga buruh pada awal 2026⁷. Di samping itu, permintaan pekerjaan juga kekal kukuh, terutamanya dalam sektor Perkhidmatan, Pembuatan dan Pembinaan, dengan peluang pekerjaan dijangka berkembang seiring usaha pemulihan pelancongan seperti *Visit Malaysia 2026*⁸.

Justeru, pasaran buruh Malaysia pada bulan-bulan seterusnya dijangka kekal utuh dengan kadar pengangguran yang terus rendah, mencerminkan kedudukan tenaga buruh yang kukuh. Penyertaan tenaga buruh juga diramal kekal stabil berikutan pemulihan seimbang sektor Perkhidmatan, pelancongan dan eksport teknologi. Peluang pekerjaan juga dilihat akan meningkat dalam subsektor teknologi tinggi dan perkhidmatan, didorong oleh automasi, AI, digital dan pelaburan asing.

Walau bagaimanapun, ketidaktentuan ekonomi global dan pergolakan geopolitik berpotensi memberi kesan kepada Malaysia melalui fluktuasi harga global komoditi, kos tenaga dan gangguan rantai bekalan yang boleh menjejaskan prestasi sektor eksport⁹. Selain itu, risiko terhadap permintaan luar negara terutamanya di Asia Barat juga boleh memberi kesan terhadap aktiviti perdagangan Malaysia. Ini secara tidak langsung mungkin memberi kesan tidak langsung kepada pasaran buruh dalam sektor Pembuatan dan eksport jika pelaburan global perlahan akibat ketidaktentuan geopolitik¹⁰.

Secara keseluruhan, prospek pasaran buruh Malaysia pada awal 2026 kekal positif dan berdaya tahan, disokong oleh asas ekonomi yang kukuh, kedudukan guna tenaga yang stabil dan permintaan berterusan bagi buruh mahir. Meskipun terdapat ketidaktentuan global, asas ekonomi domestik yang kukuh dan permintaan serta penawaran buruh yang stabil dijangka akan terus menyokong pertumbuhan pasaran buruh negara.

- Malaysia's labour market in the coming months is anticipated to remain favourable, with the unemployment rate remaining low, reflecting a strong labour market. Employment opportunities are also seen to increase in the high-tech and services subsectors, driven by automation, AI, digital and foreign investment. Despite global uncertainty, strong domestic economic fundamentals and stable labour demand and supply are expected to continue to support the growth of the country's labour market.

MALAYSIA'S LABOUR FORCE SITUATION IN JANUARY 2026 REMAINED RESILIENT, REFLECTING SUSTAINED ECONOMIC STABILITY AND PROGRESSIVE GROWTH

Malaysia's economy continued to demonstrate resilience in January 2026, supported by stable monetary policy and sustained domestic demand. According to media reports, the Overnight Policy Rate (OPR) was maintained at its current level by Bank Negara Malaysia, reflecting stable inflationary conditions and sustainable economic growth¹. The decision to retain the OPR indicates confidence in the strength of domestic demand and the robustness of key economic sectors. This stable macroeconomic environment has contributed positively to business sentiment, employment opportunities, and overall labour market performance in the early months of 2026.

In addition, the tourism sector has emerged as a key driver of economic expansion, with Johor targeting twelve million tourist arrivals in 2026 and projected economic contributions exceeding RM42 billion. According to Mohd Jafni Md Shukor, who serves as the Chairman of the State Housing and Local Government Committee, the state government has intensified the implementation of Visit Johor Year 2026 by organising more than a hundred tourism programmes and events of various scales, including large-scale, medium, and community-based activities across all ten districts, in collaboration with state and federal agencies, local authorities, and tourism industry stakeholders². These initiatives, including major festivals and eco-tourism attractions, are aimed at strengthening Johor's tourism attractiveness and stimulating broader economic activities throughout the state, as well as having a positive impact on tourism-related activities.

Apart from that, the implementation of the SARA monthly programme beginning January 2026 reflects the government's continued commitment to enhancing social protection and alleviating cost of living pressures³. The initiative is anticipated to support household consumption and stimulate domestic economic growth through positive spillover effects, particularly in the retail and services sectors. Collectively, these developments seem to generate more income for the businesses, thus creating more job opportunities. In line with the current positive situation, it contributed to the stable and progressive Malaysia's labour force situation in January 2026, underpinned by thorough monetary management, vibrant tourism activities, and sustained domestic support measures.

Additionally, the Malaysian economic indicator portrayed that the country's economy is expected to remain resilient, supported by the performance of the Leading Index (LI) in December 2025, which registered a rise of 0.1 per cent to 114.0 points as against 113.9 points in the same month last year. Meanwhile, the monthly LI's performance edged up by 0.5 per cent in December 2025 compared to the previous month. Looking at the smoothed long-term trend in December 2025, the LI continued below 100.0 points. Nevertheless, Malaysia's economy is expected to remain resilient, supported by stable domestic financial liquidity as well as sustained demand for electronic components. In the meantime, the monthly external trade indicators for January 2025, both exports and imports, recorded a negative month-on-month growth of 3.9 per cent (December 2025: +13.4%) and -4.0 per cent (December 2025: -9.0%), respectively, compared to positive growth last month.

6 LOOKING AHEAD

Malaysia's labour market outlook for early 2026 remains positive and resilient, supported by strong economic fundamentals, stable employment conditions, and continued demand for skilled labour

Heading into early 2026, Malaysia's economy portrays resilient performance and a stable labour market. This strength is underpinned by solid domestic demand, strong exports of high-tech goods, and a rebound in tourism, despite ongoing global economic uncertainty and geopolitical tensions.

In 2026, Malaysia's GDP growth is projected at around 4.0 per cent to 5.0 per cent, building on robust momentum from late-2025. This is supported by strong domestic demand and exports of electronics and semiconductor technologies⁵. Based on the LI indicator, it also signals that the country's economy remains on a higher growth trajectory, with LI recording a slight improvement ahead of the second quarter of 2026. In addition, studies by banks and financial institutions also saw Malaysia's economy remaining stable in 2026, supported by strong exports of electrical and electronics (E&E) and semiconductors, a stronger labour market, an increase in foreign direct investment (FDI) and a continued recovery in tourism, despite pressures from global trade policies and input costs⁶.

⁶ https://www.thestar.com.my/business/business-news/2026/03/02/malaysias-economy-remains-on-a-resilient-footing?utm_source

Accordingly, the country's labour market position is seen to remain stable with the number of employed persons continuing to record an increase, while the unemployment rate remains low. The Malaysian economy at the end of 2025 also saw labour productivity increase, reflecting higher output per employee, thus giving a positive signal for the labour market in early 2026⁷. In addition, job demand also remains strong, particularly in the Services, Manufacturing and Construction sectors, with job opportunities expected to expand in line with tourism recovery efforts such as Visit Malaysia 2026⁸.

Hence, Malaysia's labour market in the coming months is anticipated to remain favourable, with the unemployment rate remaining low, reflecting a strong labour market. Labour force participation is also foreseen to remain stable following a balanced recovery in the Services, tourism and technology export sectors. Employment opportunities are also seen to increase in the high-tech and services subsectors, driven by automation, AI, digital and foreign investment.

However, global economic uncertainty and geopolitical turmoil have the potential to impact Malaysia through fluctuations in global commodity prices, energy costs and supply chain disruptions that could affect the performance of the export sector⁹. In addition, risks to overseas demand, especially in West Asia, which could affect Malaysia's trade activities. This may indirectly impact the labour market in the Manufacturing and export sectors if global investment slows down due to geopolitical uncertainty¹⁰.

Overall, Malaysia's labour market outlook for early 2026 remains positive and resilient, supported by strong economic fundamentals, stable employment conditions, and continued demand for skilled labour. Despite global uncertainty, robust domestic economic fundamentals and stable labour demand and supply are expected to continue to support the growth of the country's labour market.
