Pemakluman

Jabatan Perangkaan Malaysia (DOSM) sedang melaksanakan **Banci Ekonomi 2026 (BE2026)**, bertemakan “**Data Nadi Ekonomi Rakyat**”. Pelaksanaan Banci Ekonomi kali keenam ini berlangsung dari **5 Januari hingga 31 Oktober 2026**. BE2026 bertujuan untuk mengumpul data yang menyeluruh dan berstruktur daripada semua pertubuhan perniagaan berdaftar dan tidak berdaftar di Malaysia, bagi menilai prestasi, struktur serta ciri-ciri ekonomi negara secara komprehensif dan berasaskan bukti.

Malaysia buat julung kalinya telah menduduki **tangga pertama (1)** di peringkat global dalam laporan dwi-tahunan **Open Data Inventory (ODIN) 2024/25** yang dikeluarkan oleh *Open Data Watch (ODW)*, mengatasi 197 negara lain. Pencapaian ini merupakan lonjakan ketara daripada kedudukan ke-67 dalam penilaian ODIN 2022/23.

OpenDOSM NextGen adalah medium yang menyediakan katalog data dan visualisasi bagi memudahkan pengguna menganalisis pelbagai data dan boleh diakses melalui portal <https://open.dosm.gov.my>.

MyLabourHub ialah platform komprehensif yang mengintegrasikan institusi, data dan teknologi bagi menyediakan maklumat pasaran buruh yang relevan, tepat dan mudah diakses. Dapatkan data pasaran buruh Malaysia melalui *MyLabourHub* di <https://mylabourhub.dosm.gov.my>.

Announcement

*The Department of Statistics Malaysia (DOSM) is conducting the **Economic Census 2026 (BE2026)**, themed “**Data Nadi Ekonomi Rakyat**”. The sixth Economic Census, running from **5th January to 31st October 2026**. BE2026 aims to collect comprehensive, structured data from all registered and unregistered business establishments in Malaysia to assess the nation’s economic performance, structure and characteristics in an evidence-based manner.*

***Malaysia** has, for the first time, successfully secured the **top position** globally in the biennial **Open Data Inventory (ODIN) 2024/25** report released by *Open Data Watch (ODW)*, surpassing 197 other countries. This achievement marks a significant leap from its 67th position in the ODIN 2022/23 assessment.*

***OpenDOSM NextGen** is a medium that provides data catalogue and visualisations to facilitate users' analysis and can be accessed through <https://open.dosm.gov.my>.*

***MyLabourHub** is a comprehensive platform that integrates institutions, data and technology to deliver relevant, accurate and accessible labour market information. Access the labour market data for Malaysia at <https://mylabourhub.dosm.gov.my>.*

Laporan Tenaga Buruh, Malaysia, bulanan membentangkan statistik berkaitan tenaga buruh, guna tenaga dan pengangguran yang diperoleh daripada Survei Tenaga Buruh (STB) melalui pendekatan isi rumah. Pelaksanaan STB adalah berdasarkan garis panduan dan syor oleh *International Labour Organization* (ILO) dengan merujuk kepada *Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods*.

Statistik tenaga buruh merupakan input penting untuk menganalisis pasaran buruh, menggubal dasar serta merancang, melaksana dan memantau program terutamanya berkaitan pembangunan sumber manusia. Statistik ini juga menjadi rujukan penting kepada penyelidik, ahli ekonomi, ahli akademik, pihak swasta dan individu yang terlibat dalam kajian berkaitan guna tenaga dan pasaran buruh.

Laporan Tenaga Buruh bagi April 2026 memperihalkan kedudukan penawaran tenaga buruh berdasarkan situasi semasa. Laporan ini juga menghuraikan perubahan bulan ke bulan untuk mengkaji kesan langsung daripada peristiwa terkini.

Jabatan Perangkaan Malaysia merakamkan setinggi-tinggi penghargaan dan terima kasih atas kerjasama dan sumbangan yang diberikan oleh semua pihak dalam menjayakan penerbitan ini. Setiap maklum balas dan cadangan ke arah penambahbaikan laporan ini pada masa hadapan amat dihargai.

DATO' SRI DR. MOHD UZIR MAHIDIN

Ketua Perangkawan Malaysia

Jun 2026

The monthly Labour Force Report, Malaysia, presents statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS) through a household approach. The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes, particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for April 2026 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN
Chief Statistician Malaysia

Aktiviti ekonomi	: Klasifikasi industri mengikut Piawaian Klasifikasi Industri Malaysia (MSIC) 2018 Versi 1.0 kepada lima sektor utama iaitu Pertanian, Perlombongan & Pengkuarian, Pembuatan, Pembinaan dan Perkhidmatan. Manakala, sektor Pembuatan dan Perkhidmatan dibahagikan kepada subsektor.
Bekerja	: Semua orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga sama ada sebagai majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji.
Bekerja sendiri	: Seorang yang mengusahakan ladang, perniagaan atau perusahaan sendiri tanpa menggaji pekerja di ladang, perniagaan atau perusahaannya.
Guna tenaga tidak penuh berkaitan kemahiran	: Mereka yang mempunyai pendidikan tertiar dan bekerja dalam kategori separuh mahir dan berkemahiran rendah.
Guna tenaga tidak penuh berkaitan masa	: Kumpulan yang bekerja kurang daripada 30 jam seminggu semasa minggu rujukan disebabkan keadaan kerja atau kerja yang tidak mencukupi dan berkeupayaan serta sanggup menerima tambahan bilangan jam bekerja. Mereka yang bekerja lebih daripada 30 jam seminggu semasa minggu rujukan merupakan guna tenaga penuh.
Kadar pengangguran	: Perkadaran penduduk yang menganggur kepada jumlah penduduk di dalam tenaga buruh dalam bentuk peratusan.
Kadar penyertaan tenaga buruh	: Perkadaran penduduk dalam tenaga buruh kepada penduduk dalam umur bekerja dalam bentuk peratusan.
Kategori kemahiran	: Untuk tujuan pelaporan, kategori pekerjaan dikelaskan kepada tiga tahap kemahiran mengikut Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 2013 seperti berikut: Pekerja mahir: 1. Pengurus; 2. Profesional; dan 3. Juruteknik dan profesional bersekutu. Pekerja separuh mahir: 4. Pekerja sokongan perkeranian; 5. Pekerja perkhidmatan dan penjualan; 6. Pekerja mahir pertanian, perhutanan, penternakan dan perikanan; 7. Pekerja kemahiran dan pekerja pertukangan yang berkaitan; dan 8. Operator loji dan mesin, dan pemasang. Pekerja berkemahiran rendah: 9. Pekerja asas.

Bermula Januari 2022, kategori pekerjaan adalah mengikut Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 2020 dengan tambahan kumpulan 0 - Angkatan Tentera.

Luar tenaga buruh	: Penduduk yang tidak dikelaskan sebagai bekerja atau menganggur dikategorikan sebagai luar tenaga buruh. Kategori ini terdiri daripada suri rumah, pelajar (termasuk mereka yang akan melanjutkan pelajaran), mereka yang telah bersara, tidak berkeupayaan dan mereka yang tidak berminat untuk mencari pekerjaan.
Majikan	: Seorang yang menjalankan sesuatu perniagaan, aktiviti ladang atau perusahaan lain dan menggaji sekurang-kurangnya seorang pekerja dalam perniagaan atau perusahaannya.
Nisbah guna tenaga kepada penduduk	: Perkadaran penduduk yang bekerja kepada jumlah penduduk dalam kumpulan umur bekerja.
Pekerja	: Seorang yang bekerja untuk majikan sektor awam atau swasta dan menerima ganjaran tetap seperti upah, gaji, komisen, tip atau ganjaran berbentuk mata benda.
Pekerja keluarga tanpa gaji	: Seorang yang bekerja tanpa menerima sebarang bayaran atau upah di ladang, perniagaan atau perusahaan yang dijalankan oleh ahli keluarganya yang lain.
Penganggur	: Mereka yang tidak bekerja semasa minggu rujukan dan dikelaskan kepada dua kumpulan iaitu penganggur aktif dan penganggur tidak aktif.
Penganggur aktif	: Mereka yang bersedia untuk bekerja dan aktif mencari pekerjaan dalam minggu rujukan.
Penganggur tidak aktif	: Tidak mencari pekerjaan dalam minggu rujukan kerana percaya tidak terdapat pekerjaan atau pun tidak berkeelayakan; mungkin mencari pekerjaan jika tidak kerana sakit atau keadaan cuaca; dan telah mencari pekerjaan sebelum minggu rujukan dan sedang menunggu jawapan permohonan pekerjaan.
Tenaga buruh	: Tenaga buruh merujuk kepada penduduk dalam kumpulan umur bekerja (15 - 64 tahun) sama ada bekerja atau menganggur.

Actively unemployed : Persons who were available for work and were actively looking for a job during the reference week.

Category of skills : For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as follows:

Skilled workers:

1. Managers;
2. Professionals; and
3. Technicians and associate professionals.

Semi-skilled workers:

4. Clerical support workers;
5. Services and sales workers;
6. Skilled agricultural, forestry, livestock, and fishery workers;
7. Craft and related trades workers; and
8. Plant and machine operators and assemblers.

Low-skilled workers:

9. Elementary occupations.

Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with the addition of group 0 - Armed Forces occupations.

Economic activity : Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors: Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.

Employed : All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker, or unpaid family worker.

Employee : A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.

Employer : A person who operates a business, a plantation or other trade and employs at least one employee in his business or trade.

Employment-to-population ratio : The proportion of the employed population to the working-age population.

• GLOSSARY •

<i>Inactively unemployed</i>	<i>: Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.</i>
<i>Labour force participation rate</i>	<i>: The ratio of the labour force to the working-age population, expressed as a percentage.</i>
<i>Outside labour force</i>	<i>: All persons not classified as employed or unemployed are classified as outside the labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.</i>
<i>Own-account worker</i>	<i>: A person who operates his own farm, business or trade without employing any paid workers to conduct his farm, trade or business.</i>
<i>Skill-related underemployment</i>	<i>: Those with tertiary education and working in the semi-skilled and low-skilled categories.</i>
<i>Time-related underemployment</i>	<i>: A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.</i>
<i>Unemployed</i>	<i>: Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.</i>
<i>Unemployment rate</i>	<i>: The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.</i>
<i>Unpaid family worker</i>	<i>: A person who works without pay or wages on a farm, business or trade operated by another member of the family.</i>

KONSEP DAN DEFINISI

Apa itu Survei Tenaga Buruh (STB)?

Survei Tenaga Buruh (STB) dilaksanakan untuk mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran dari aspek penawaran tenaga buruh.

STB meliputi kedua-dua kawasan bandar dan luar bandar bagi semua daerah pentadbiran di semua negeri di Malaysia menggunakan pendekatan *multi-modal data collection* melalui temu ramah bersemuka dan *Computer-Assisted Telephone Interview (CATI)*

STB dilaksanakan berdasarkan garis panduan dan syor oleh *International Labour Organization (ILO)*.

Populasi penyiasatan merangkumi penduduk yang tinggal di tempat kediaman persendirian dan tidak termasuk mereka yang tinggal di institusi-institusi seperti hotel, hospital, asrama, penjara dan pekerja yang tinggal di rumah kongsi.

Umur bekerja bagi analisis STB di Malaysia merujuk kepada ahli isi rumah yang berumur 15 hingga 64 tahun semasa minggu rujukan, sama ada berada di dalam tenaga buruh atau di luar tenaga buruh.

TENAGA BURUH

- Penduduk dalam kumpulan umur bekerja 15 hingga 64 tahun (dalam tahun genap pada hari lahir terakhir).
- Sama ada bekerja atau menganggur semasa minggu rujukan.

BEKERJA

- Orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji).
- Mereka yang tidak bekerja semasa minggu rujukan disebabkan sakit, kecederaan, cuaca buruk, bercuti, pertelingkahan buruh dan sebab-sebab sosial atau keagamaan tetapi mempunyai pekerjaan, ladang, perusahaan atau perusahaan keluarga lain untuk kembali bekerja.
- Mereka yang tidak bekerja buat sementara waktu tetapi bergaji dan pasti akan dipanggil bekerja semula.

PENGANGGUR

- Mereka yang tidak mempunyai pekerjaan tetapi berminat untuk bekerja dan sedang mencari kerja.
- Dikelaskan kepada dua kumpulan iaitu penganggur aktif dan penganggur tidak aktif.

LUAR TENAGA BURUH

- Penduduk yang tidak dikelaskan sebagai bekerja atau menganggur.
- Contoh: suri rumah, pelajar, mereka yang telah bersara atau tidak berkeupayaan dan mereka yang tidak berminat untuk mencari pekerjaan.

KADAR PENGANGGURAN

- Perkadaran penduduk yang menganggur (tidak bekerja) kepada jumlah penduduk di dalam tenaga buruh.
- Peratus penduduk di dalam tenaga buruh yang tidak bekerja.

KADAR PENYERTAAN TENAGA BURUH

- Aktiviti ekonomi penduduk pada keseluruhannya bergantung kepada ciri-ciri demografi sesuatu populasi.
- Pecahan mereka yang aktif secara ekonomi berbeza di antara kumpulan-kumpulan kecil penduduk tersebut.
- Perbezaan ini diukur dengan kadar aktiviti tertentu yang dikenali sebagai kadar penyertaan tenaga buruh.
- Kadar penyertaan tenaga buruh ditakrifkan sebagai perkadaran penduduk dalam tenaga buruh kepada jumlah penduduk dalam umur bekerja (15 hingga 64 tahun) yang dipersempakan dalam bentuk peratus.

PELARASAN MUSIM

- Data siri masa adalah amat berguna untuk ahli ekonomi, pembuat dasar & keputusan serta penganalisis siri masa untuk mengenal pasti ciri-ciri penting siri ekonomi seperti arah aliran, *turning point* dan konsistensi antara penunjuk ekonomi yang lain. Kadangkala ciri ini sukar untuk diperhatikan kerana pergerakan bermusim. Oleh itu, sekiranya kesan bermusim boleh disingkirkan, arah aliran data siri ini dapat dilihat dengan lebih baik. Anggaran dan penyingkiran kesan bermusim dipanggil pelarasan bermusim.
- Pelarasan bermusim adalah satu proses untuk mengenal pasti dan menyingkirkan bentuk pola bermusim yang biasa berlaku dalam tempoh satu tahun, yang mungkin juga merangkumi pengaruh dari kesan cuti yang bergerak dan hari bekerja/ berdagang bagi suatu tempoh. Objektif utama proses ini adalah untuk menyerlahkan arah aliran dan pergerakan-pergerakan jangka pendek dalam siri ini.
- Di Malaysia, kebanyakan data siri masa dipengaruhi oleh kesan bermusim. Oleh itu, untuk menghapus dan melaraskan kesan bermusim data siri masa ekonomi Malaysia, pakej standard pelarasan bermusim, X-12 ARIMA telah digunakan oleh Jabatan Perangkaan Malaysia.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

NOTA PENERANGAN

EXPLANATORY NOTES

Statistik Survei Tenaga Buruh (STB) bulanan bagi tahun 2026 dianggar menggunakan data unjuran berdasarkan anggaran penduduk semasa terkini.

Pada masa yang sama, pelarasan semula dilaksanakan bagi data STB bulanan secara berperingkat bermula dengan data Disember 2025 berdasarkan data anggaran penduduk semasa yang terkini.

The monthly Labour Force Survey (LFS) statistics for 2026 are estimated using projection data based on the latest current population estimates.

On the same note, revisions are carried out on monthly LFS data in stages beginning with December 2025 data based on the latest current population estimates.

1 Ringkasan Penemuan

Summary of Findings

SOROTAN UTAMA

- Bilangan **penduduk bekerja** pada April 2026 terus merekodkan pertumbuhan sederhana, naik **0.1 peratus (+11.8 ribu orang)** kepada **16.82 juta orang**, berbanding bulan sebelumnya (Mac 2026: 16.80 juta orang). **Nisbah guna tenaga kepada penduduk**, yang mencerminkan keupayaan ekonomi untuk mewujudkan pekerjaan, kekal **68.8 peratus** pada April 2026, tidak berubah daripada bulan sebelumnya.
- Dari perspektif sektor ekonomi, sektor Perkhidmatan kekal sebagai penyumbang utama kepada jumlah penduduk bekerja, dengan majoritinya terlibat dalam aktiviti Perdagangan borong & runcit; aktiviti Penginapan dan perkhidmatan makanan & minuman; serta Maklumat & komunikasi. Bilangan penduduk bekerja dalam sektor Pembuatan, Pembinaan, Pertanian, dan Perlombongan & pengkuarian turut merekodkan pertumbuhan positif pada bulan tersebut.
- Kategori **pekerja** merangkumi **75.0 peratus** daripada jumlah penduduk bekerja pada April 2026. Bilangan pekerja meningkat secara marginal sebanyak **0.05 peratus (+6.3 ribu orang)** kepada **12.61 juta orang**, berbanding 12.60 juta orang pada Mac 2026. Begitu juga, bilangan **penduduk bekerja sendiri** terus mencatatkan peningkatan dan naik **0.2 peratus (+6.2 ribu orang)** kepada **3.15 juta orang** daripada 3.14 juta orang sebulan sebelumnya.
- Pada April 2026, **bilangan penganggur** berada dalam trend meningkat, naik **0.6 peratus (+2.9 ribu orang)** kepada **511.8 ribu orang** daripada **509.0 ribu orang** pada bulan sebelumnya. Sehubungan itu, **kadar pengangguran** pada bulan tersebut naik **0.1 mata peratus** kepada **3.0 peratus** (Mac 2026: 2.9%), sekali gus kembali kepada paras yang pernah direkodkan pada Oktober 2025.
- **Tenaga buruh** terus meningkat pada April 2026, bertambah **0.1 peratus**, atau bersamaan **14.6 ribu orang** kepada **17.33 juta orang** (Mac 2026: 17.31 juta orang). **Kadar penyertaan tenaga buruh (KPTB)** kekal **70.9 peratus**, tidak berubah daripada bulan sebelumnya.
- Bilangan penduduk di **luar tenaga buruh** pada April 2026 menurun sedikit **0.01 peratus (-0.4 ribu orang)** kepada **7.10 juta orang**, berbanding bulan sebelumnya (Mac 2026: 7.10 juta orang). **Kerja rumah/ tanggungjawab keluarga** kekal sebagai sebab utama berada di luar tenaga buruh, merangkumi **43.3 peratus**, diikuti oleh sebab **bersekolah/ latihan** dengan **40.5 peratus**.
- Prospek ekonomi dan pasaran buruh Malaysia dijangka kekal positif dalam jangka masa terdekat, disokong oleh asas ekonomi domestik yang kukuh, momentum pelaburan yang berterusan serta pelaksanaan pelbagai inisiatif pembangunan. Walau bagaimanapun, ketidakpastian yang berpunca daripada krisis tenaga global, perkembangan geopolitik dan kedudukan permintaan luaran dijangka akan terus mempengaruhi momentum pertumbuhan ekonomi serta prestasi pasaran buruh. Dalam tempoh yang akan datang, usaha memperkukuh keyakinan perniagaan, meningkatkan kebolehsuaian tenaga kerja dan merangsang pertumbuhan produktiviti akan terus memainkan peranan penting dalam memastikan ekonomi dan pasaran buruh negara kekal berdaya tahan.

PASARAN BURUH MALAYSIA KEKAL BERDAYA TAHAN PADA APRIL 2026 DI SEBALIK KETIDAKTENTUAN GLOBAL YANG BERTERUSAN

Pasaran buruh Malaysia terus mencatatkan pertumbuhan sederhana pada April 2026 meskipun berdepan ketidaktentuan dalam persekitaran ekonomi global yang berterusan. Cabaran luaran kekal tinggi susulan ketegangan geopolitik yang berlarutan di Asia Barat, yang menjelaskan rantai bekalan tenaga global serta seterusnya memberi tekanan peningkatan kos kepada pelbagai industri hiliran¹. Walau bagaimanapun, kesan terhadap pasaran buruh domestik secara keseluruhannya kekal stabil, disokong oleh struktur ekonomi Malaysia yang pelbagai serta permintaan dalam negeri yang berdaya tahan.

Sementara itu, aktiviti ekonomi domestik terus disokong oleh prestasi kukuh dalam sektor Pembuatan serta sektor berkaitan penggunaan. Jualan automotif yang mencatatkan paras tertinggi dalam tempoh beberapa dekad mencerminkan peningkatan keyakinan pengguna dan menyumbang kepada kestabilan guna tenaga dalam industri berkaitan². Di samping itu, prestasi kukuh sub-sektor makanan dan minuman turut mencerminkan permintaan dalam negeri yang berdaya tahan, sekali gus menyokong guna tenaga merentasi aktiviti pengeluaran, pengedaran dan peruncitan³.

Sektor Perkhidmatan turut memainkan peranan penting dalam menyokong aktiviti ekonomi dan pertumbuhan guna tenaga, khususnya dalam aktiviti pelancongan dan industri berkaitan peruncitan. Penganjuran *MATTA Fair 2026* yang diadakan pada 3 hingga 5 April 2026 telah merencanakan aktiviti pelancongan dan perbelanjaan domestik, di samping mewujudkan peluang pekerjaan sementara dalam sektor peruncitan, pengangkutan dan perkhidmatan sokongan, seterusnya menyumbang secara positif kepada kedudukan pasaran buruh⁴. Secara keseluruhannya, pasaran buruh Malaysia kekal berdaya tahan pada April 2026, disokong oleh permintaan domestik yang stabil, pertumbuhan berterusan sektor Pembuatan serta pengembangan aktiviti berkaitan perkhidmatan meskipun berdepan ketidaktentuan luaran yang berpanjangan.

Sementara itu, prospek ekonomi Malaysia bagi suku ketiga dijangka berkembang pada kadar yang lebih sederhana, dengan Indeks Pelopor (IP) pada Mac 2026 meningkat secara marginal sebanyak 0.5 peratus kepada 113.3 mata berbanding 112.7 mata pada bulan yang sama tahun sebelumnya. Walau bagaimanapun, berdasarkan perbandingan bulan ke bulan, IP menurun sebanyak 0.1 peratus pada Mac 2026 berbanding Februari 2026. Sementara itu, trend jangka panjang terlicin IP pada Mac 2026 kekal di bawah paras 100.0 mata, mencerminkan momentum pertumbuhan yang semakin sederhana dalam suasana ketidaktentuan global, termasuk tekanan inflasi yang masih berterusan. Walau bagaimanapun, aktiviti ekonomi domestik yang kukuh serta pelaburan yang terus berkembang kekal menyokong daya tahan ekonomi negara dalam mendepani cabaran luaran.

Melengkapi prospek domestik yang positif, prestasi perdagangan luar Malaysia terus mengukuh pada April 2026, dengan kedua-dua eksport dan import merekodkan pertumbuhan bulan ke bulan yang kukuh. Eksport meningkat sebanyak 22.8 peratus (Mac 2026: 13.6%), manakala import bertambah 23.9 peratus (Mac 2026: 8.8%), berbanding bulan sebelumnya.

2 PENDUDUK BEKERJA

Bilangan penduduk bekerja pada April 2026 terus merekodkan pertumbuhan sederhana

Bilangan **penduduk bekerja** pada April 2026 terus merekodkan pertumbuhan sederhana, naik **0.1 peratus (+11.8 ribu orang)** kepada **16.82 juta orang**, berbanding bulan sebelumnya (Mac 2026: 16.80 juta orang). Sementara itu, anggaran pelarasan bermusim merekodkan peningkatan marginal bulan ke bulan sebanyak 0.03 peratus.

Dari perspektif sektor ekonomi, sektor Perkhidmatan kekal sebagai penyumbang utama kepada jumlah penduduk bekerja, dengan majoritinya terlibat dalam aktiviti Perdagangan borong & runcit; aktiviti Penginapan dan perkhidmatan makanan & minuman; serta Maklumat & komunikasi. Bilangan penduduk bekerja dalam sektor Pembuatan, Pembinaan, Pertanian, dan Perlombongan & pengkuarian turut merekodkan pertumbuhan positif pada bulan tersebut.

Nisbah guna tenaga kepada penduduk, yang mencerminkan keupayaan ekonomi untuk mewujudkan pekerjaan, kekal **68.8 peratus** pada April 2026, tidak berubah daripada bulan sebelumnya [**Paparan 1**].

Paparan 1: Penduduk bekerja dan nisbah guna tenaga kepada penduduk, Mac dan April 2026

Kategori **pekerja** merangkumi **75.0 peratus** daripada jumlah penduduk bekerja pada April 2026. Bilangan pekerja meningkat secara marginal sebanyak **0.05 peratus (+6.3 ribu orang)** kepada **12.61 juta orang**, berbanding 12.60 juta orang pada Mac 2026. Begitu juga, bilangan **penduduk bekerja sendiri** terus mencatatkan peningkatan dan naik **0.2 peratus (+6.2 ribu orang)** kepada **3.15 juta orang** daripada 3.14 juta orang sebulan sebelumnya. Kategori ini terutamanya adalah terdiri daripada penerima pendapatan harian yang terlibat dalam aktiviti berskala kecil termasuk peruncitan, penjaja, perdagangan pasar dan gerai, serta pekebun kecil [**Carta 1**].

Carta 1: Penduduk bekerja mengikut taraf pekerjaan, Mac dan April 2026

Bilangan **penduduk bekerja yang tidak bekerja buat sementara waktu** pada April 2026, menurun **2.4 peratus (-2.2 ribu orang)** kepada **90.5 ribu orang**, berbanding 92.7 ribu orang yang direkodkan pada Mac 2026. Kumpulan ini merangkumi individu yang tidak bekerja buat sementara waktu namun tidak diklasifikasikan sebagai penganggur, kerana mereka mempunyai pekerjaan untuk kembali bekerja.

3 PENGANGGURAN

Kadar pengangguran April naik kepada 3.0 peratus, kembali kepada paras yang pernah direkodkan pada Oktober 2025

Pada April 2026, **bilangan penganggur** berada dalam trend meningkat, naik **0.6 peratus (+2.9 ribu orang)** kepada **511.8 ribu orang** daripada **509.0 ribu orang** pada bulan sebelumnya. Sehubungan itu, **kadar pengangguran** pada bulan tersebut naik **0.1 mata peratus** kepada **3.0 peratus** (Mac 2026: 2.9%), sekali gus kembali kepada paras yang pernah direkodkan pada Oktober 2025 [Paparan 2]. Berdasarkan pelarasan bermusim, bilangan penganggur turut meningkat sebanyak 0.6 peratus, dengan kadar pengangguran direkodkan pada 2.9 peratus.

Paparan 2: Pengangguran, Mac dan April 2026

Mengikut kategori pengangguran, **penganggur aktif** merangkumi **79.5 peratus** daripada jumlah penganggur. Kumpulan ini, yang terdiri daripada mereka yang bersedia untuk bekerja dan sedang aktif mencari pekerjaan meningkat **0.3 peratus (+1.3 ribu orang)** kepada **407.1 ribu orang** (Mac 2026: 405.8 ribu orang). Dalam kalangan penganggur aktif, **63.9 peratus** telah **menganggur kurang daripada tiga bulan**, manakala **5.0 peratus** merupakan mereka yang berada dalam **pengangguran jangka panjang melebihi setahun**⁵.

Sementara itu, **penganggur tidak aktif**, atau mereka yang percaya bahawa tiada pekerjaan tersedia bertambah **1.5 peratus (+1.5 ribu orang)** kepada **104.7 ribu orang**, berbanding 103.2 ribu orang pada Mac 2026 [Carta 2].

⁵ Merujuk kepada orang yang menganggur selama setahun atau lebih (Sumber: KILM: Long-term unemployment) https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

Carta 2: Kategori penganggur dan tempoh menganggur bagi penganggur aktif, Mac dan April 2026

Pada April 2026, kadar pengangguran bagi belia berumur **15 hingga 24 tahun** tidak berubah iaitu pada **10.2 peratus** mencatatkan sejumlah **290.8 ribu penganggur belia** (Mac 2026: 290.0 ribu orang). Manakala, kadar pengangguran dalam kalangan belia berumur **15 hingga 30 tahun** meningkat **0.1 mata peratus** kepada **6.3 peratus**, dengan bilangan penganggur belia direkodkan seramai **394.7 ribu orang** (Mac 2026: 6.2%; 390.9 ribu orang), seperti yang ditunjukkan dalam **Carta 3**.

Carta 3: Bilangan penganggur dan kadar pengangguran mengikut kumpulan umur terpilih, Mac dan April 2026

4 TENAGA BURUH

KPTB kekal 70.9 peratus pada April 2026

Tenaga buruh terus meningkat pada April 2026, bertambah **0.1 peratus**, atau bersamaan **14.6 ribu orang** kepada **17.33 juta orang** (Mac 2026: 17.31 juta orang). **Kadar penyertaan tenaga buruh (KPTB)** kekal **70.9 peratus**, tidak berubah daripada bulan sebelumnya [Paparan 3]. Dalam terma pelarasan bermusim, tenaga buruh turut mencatatkan peningkatan 0.1 peratus, manakala KPTB kekal pada 70.9 peratus.

Paparan 3: Tenaga buruh dan KPTB, Mac dan April 2026

Kedua-dua tenaga buruh lelaki dan perempuan mencatatkan peningkatan marginal pada April 2026. Bilangan **tenaga buruh lelaki** naik kepada **10.78 juta orang** (Mac 2026: 10.77 juta orang), dan **tenaga buruh perempuan** bertambah kepada **6.55 juta orang** (Mac 2026: 6.54 juta orang).

Pada masa yang sama, KPTB bagi kedua-dua jantina kekal tidak berubah, dengan **KPTB lelaki** kekal pada **82.9 peratus**, manakala **KPTB perempuan** pada **57.3 peratus**, konsisten dengan kadar yang direkodkan pada Mac 2026 [Paparan 4].

Paparan 4: Tenaga buruh dan KPTB mengikut jantina, Mac dan April 2026

5 LUAR TENAGA BURUH

Kerja rumah/ tanggungjawab keluarga kekal sebagai sebab utama berada di luar tenaga buruh

Bilangan penduduk di **luar tenaga buruh** pada April 2026 menurun sedikit **0.01 peratus (-0.4 ribu orang)** kepada **7.10 juta orang**, berbanding bulan sebelumnya (Mac 2026: 7.10 juta orang).

Kerja rumah/ tanggungjawab keluarga kekal sebagai sebab utama berada di luar tenaga buruh, merangkumi **43.3 peratus**, diikuti oleh sebab **bersekolah/ latihan** dengan **40.5 peratus** [Carta 4].

Carta 4: Peratus sumbangan luar tenaga buruh mengikut sebab tidak mencari pekerjaan, Mac dan April 2026

6 MENUJU KE HADAPAN

Prospek ekonomi dan pasaran buruh Malaysia dijangka kekal positif dalam jangka masa terdekat, disokong oleh asas ekonomi domestik yang kukuh, momentum pelaburan yang berterusan serta pelaksanaan pelbagai inisiatif pembangunan, dengan mengambil kira keadaan global semasa

Menjelang separuh kedua tahun 2026, hala tuju ekonomi Malaysia semakin dipengaruhi oleh keupayaan negara untuk mengekalkan momentum pertumbuhan domestik dalam suasana ekonomi global yang masih tidak menentu. Walaupun perdagangan antarabangsa dan pasaran kewangan terus berdepan pelbagai ketidakpastian geopolitik, penggunaan domestik, pelaburan sektor swasta serta pelaksanaan projek pembangunan kekal sebagai pemacu penting yang membantu mengurangkan impak cabaran luaran⁶.

Indikator ekonomi terkini juga menunjukkan bahawa asas ekonomi negara kekal utuh, dicerminkan oleh Keluaran Dalam Negeri Kasar (KDNK) Malaysia bagi suku pertama 2026 yang merekodkan pertumbuhan kukuh 5.4 peratus. Prestasi ini mengatasi unjuran awal 5.3 peratus dan lebih tinggi berbanding 4.9 peratus yang dicatatkan pada suku keempat 2025⁷. Aktiviti berkaitan pengguna terus berkembang, komitmen pelaburan masih berada pada tahap yang memberangsangkan manakala aktiviti perniagaan dalam kebanyakan sektor perkhidmatan kekal stabil. Dalam masa yang sama, kedudukan pasaran buruh terus menunjukkan perkembangan positif dengan penambahan bilangan guna tenaga yang disokong oleh permintaan pekerja dalam sektor berorientasikan perkhidmatan dan teknologi⁸.

Bagi tempoh yang akan datang, pertumbuhan ekonomi Malaysia dijangka kekal didorong oleh penggunaan swasta yang berdaya tahan, pengembangan aktiviti pelaburan serta permintaan yang berterusan terhadap aktiviti pembuatan bernilai tinggi, khususnya dalam sub-sektor elektrik dan elektronik (E&E), semikonduktor dan ekonomi digital. Di samping itu, pelaksanaan projek infrastruktur

⁶ <https://www.thestar.com.my/business/business-news/2026/04/09/world-bank-raises-malaysia-2026-growth-forecast-to-44-on-strong-domestic-demand>

⁷ <https://www.bharian.com.my/luminare/1556240/pertumbuhan-kdnk-malaysia-54-peratus-suku-pertama-2026-sokong-sentimen-jangka-panjang>

⁸ <https://www.thestar.com.my/news/nation/2026/05/12/malaysias-unemployment-rate-holds-steady-at-29-in-march-2026>

yang berterusan serta aliran masuk pelaburan langsung asing (FDI) dijangka terus menyokong momentum pertumbuhan ekonomi secara keseluruhan⁹.

Walau bagaimanapun, risiko luaran dilihat semakin ketara berikutan ketegangan geopolitik yang berterusan di Asia Barat serta gangguan yang masih berlaku dalam rantai bekalan tenaga global. Peningkatan harga minyak mentah, kos pengangkutan yang lebih tinggi dan kekangan logistik yang berpanjangan dijangka memberi tekanan kepada kos pengeluaran dan perbelanjaan operasi perniagaan merentasi pelbagai sektor ekonomi¹⁰.

Bagi Malaysia, kesan krisis tenaga global dijangka berkemungkinan bersifat bercampur mengikut sektor ekonomi. Sebagai pengeksport bersih tenaga, negara berpotensi memperoleh manfaat daripada peningkatan hasil eksport berkaitan tenaga. Namun, syarikat yang bergantung kepada input import, perkhidmatan pengangkutan dan proses pengeluaran yang berintensifkan tenaga berkemungkinan berdepan tekanan kos yang lebih tinggi. Sekiranya ketidaktentuan pasaran tenaga berterusan sehingga separuh kedua tahun 2026, perkembangan ini dilihat boleh mempengaruhi margin keuntungan, keputusan pelaburan serta momentum pengambilan pekerja dalam sektor tertentu¹¹.

Dari perspektif pasaran buruh, pertumbuhan guna tenaga dijangka berterusan namun pada kadar yang lebih sederhana. Sektor Perkhidmatan dijangka akan terus menjadi penyumbang utama kepada peluang pekerjaan baharu, terutamanya dalam aktiviti pelancongan, perdagangan runcit, makanan dan minuman, logistik, penjagaan kesihatan serta industri berkaitan digital. Pada masa yang sama, guna tenaga dalam sektor Pembuatan mungkin lebih terdedah kepada perubahan permintaan luar dan situasi perdagangan global, manakala sektor Pembinaan dijangka akan terus mendapat sokongan daripada pelaksanaan projek pembangunan awam dan swasta¹².

Pada masa yang sama, transformasi struktur dalam ekonomi dilihat akan terus mengubah keperluan tenaga kerja. Penggunaan automasi, pendigitalan dan kecerdasan buatan (AI) yang semakin meluas dijangka akan meningkatkan permintaan terhadap tenaga kerja berkemahiran tinggi dan berasaskan pengetahuan, di samping mengurangkan kebergantungan terhadap pekerjaan berkemahiran rendah dalam industri tertentu secara beransur-ansur. Oleh itu, usaha berterusan dalam peningkatan kemahiran, latihan semula dan pembangunan bakat akan terus memainkan peranan penting dalam memastikan kebolehsuaian tenaga kerja serta daya tahan pasaran buruh dalam jangka panjang.

Secara keseluruhan, prospek ekonomi dan pasaran buruh Malaysia dijangka kekal positif dalam jangka masa terdekat, disokong oleh asas ekonomi domestik yang kukuh, momentum pelaburan yang berterusan serta pelaksanaan pelbagai inisiatif pembangunan. Walau bagaimanapun, ketidaktentuan yang berpunca daripada krisis tenaga global, perkembangan geopolitik dan kedudukan permintaan luaran dijangka akan terus mempengaruhi momentum pertumbuhan ekonomi serta prestasi pasaran buruh. Dalam tempoh yang akan datang, usaha memperkukuh keyakinan perniagaan, meningkatkan kebolehsuaian tenaga kerja dan merangsang pertumbuhan produktiviti akan terus memainkan peranan penting dalam memastikan ekonomi dan pasaran buruh negara kekal berdaya tahan.

KEY REVIEWS

- The number of **employed persons** in April 2026 continued to record modest growth, rising by **0.1 per cent (+11.8 thousand persons)** to **16.82 million persons**, compared to the prior month (March 2026: 16.80 million persons). The **employment-to-population ratio**, which reflects the economy's capacity to create jobs, remained at **68.8 per cent** in April 2026, unchanged from the preceding month.
- From an economic sector perspective, the Services sector remained the primary contributor to total employed persons, with the majority engaged in the Wholesale and retail trade; Accommodation and food & beverage service activities; and Information & communication. The number of employed persons in the Manufacturing, Construction, Agriculture, and Mining & quarrying sectors likewise recorded positive growth during the month.
- The **employees'** category constituted **75.0 per cent** of the total employed persons in April 2026. The number of employees' increased marginally by **0.05 per cent (+6.3 thousand persons)** to **12.61 million persons**, compared with 12.60 million persons in March 2026. Likewise, the number of **own-account workers** continued to trend upward and rose by **0.2 per cent (+6.2 thousand persons)** to **3.15 million persons** from 3.14 million persons a month earlier.
- In April 2026, the number of **unemployed persons** was on an uptrend, increasing by **0.6 per cent (+2.9 thousand persons)** to **511.8 thousand persons** from **509.0 thousand persons** in the previous month. As a result, the **unemployment rate** during the month rose by **0.1 percentage points** to **3.0 per cent** (March 2026: 2.9%), returning to the level recorded in October 2025.
- The **labour force** continued to trend up in April 2026, rising by **0.1 per cent**, or the equivalent of **14.6 thousand persons** to **17.33 million persons** (March 2026: 17.31 million persons). The **labour force participation rate (LFPR)** stood at **70.9 per cent**, unchanged from last month.
- The number of persons **outside the labour force** in April 2026 declined marginally by **0.01 per cent (-0.4 thousand persons)** to **7.10 million persons**, compared to the previous month (March 2026: 7.10 million persons). **Housework/ family responsibilities** remained the primary reason for being outside the labour force, constituting **43.3 per cent**, followed by the **schooling/ training** reason with **40.5 per cent**.
- Malaysia economic and labour market outlook is expected to remain favourable in the near term, supported by resilient domestic fundamentals, sustained investment momentum and ongoing development initiatives. Nevertheless, uncertainties arising from the global energy crisis, geopolitical developments and external demand conditions may continue to influence the pace of economic expansion and labour market performance. Moving forward, efforts to strengthen business confidence, enhance workforce adaptability and support productivity growth will remain crucial in ensuring the continued resilience of both the economy and the labour market.

1 INTRODUCTION

MALAYSIA'S LABOUR MARKET REMAINED RESILIENT IN APRIL 2026 AMID ONGOING GLOBAL UNCERTAINTIES

Malaysia's labour market continued to exhibit moderate growth in April 2026, despite persistent uncertainties in the global economic landscape. External headwinds remained elevated amid ongoing geopolitical tensions in West Asia, which disrupted global energy supply chains and exerted upward pressure on costs across various downstream industries¹. Nevertheless, the impact on the domestic labour market remained broadly stable, underpinned by Malaysia's diversified economic structure and resilient domestic demand.

Meanwhile, domestic economic activities continued to be supported by strong performance in both the Manufacturing and consumption-related sectors. Robust automotive sales, which reached a multi-decade high, reflected improving consumer confidence and contributed to employment stability across related industries². In addition, the strong corporate performance of the food and beverage subsector underscored resilient domestic demand, thereby sustaining employment throughout production, distribution and retail activities³.

The Services sector also played a significant role in supporting economic activity and employment growth, particularly within tourism and retail-related industries. The MATTA Fair 2026 held from 3 to 5 April 2026 stimulated tourism activity and domestic spending, while generating temporary employment opportunities in retail, transportation, and supporting services, thus contributing positively to the labour market conditions⁴. Overall, Malaysia's labour market remained resilient in April 2026, supported by stable domestic demand, sustained growth Manufacturing sector, and continued expansion in services-related activity, despite persistent external uncertainties.

In the meantime, Malaysia's economic outlook for the third quarter is expected to moderate, with the Leading Index (LI) in March 2026 increased marginally by 0.5 per cent to 113.3 points, compared with 112.7 points in the same month of the preceding year. On a month-on-month basis, however, the LI edged down by 0.1 per cent in March 2026 compared with February 2026. Meanwhile, the smoothed long-term trend of the LI in March 2026 remained below the 100.0 point, indicating a moderation in growth momentum amid global uncertainties, including persistent inflationary pressures. Nevertheless, strong domestic economic activity and sustained investment continued to support the nation's economy resilience against external shocks.

Complementing the positive domestic outlook, Malaysia's external trade performance strengthened in April 2026, with both exports and imports recording strong month-on-month growth. Exports expanded by 22.8 per cent (March 2026: 13.6%), while imports increased by 23.9 per cent (March 2026: 8.8%), compared to the previous month.

2 EMPLOYED PERSONS

The number of employed persons in April 2026 continued to record modest growth

The number of **employed persons** in April 2026 continued to record modest growth, rising by **0.1 per cent (+11.8 thousand persons)** to **16.82 million persons**, compared to the prior month

⁴ MATTA Fair April 2026 buka tirai pengangkutan terbesar - Sinar Harian

(March 2026: 16.80 million persons). Meanwhile, seasonally adjusted estimates recorded a marginal month-on-month rise of 0.03 per cent.

From an economic sector perspective, the Services sector remained the primary contributor to total employed persons, with the majority engaged in the Wholesale and retail trade; Accommodation and food & beverage service activities; and Information & communication. The number of employed persons in the Manufacturing, Construction, Agriculture, and Mining & quarrying sectors likewise recorded positive growth during the month.

The **employment-to-population ratio**, which reflects the economy's capacity to create jobs, remained at **68.8 per cent** in April 2026, unchanged from the preceding month [Exhibit 1].

Exhibit 1: Employed persons and employment-to-population ratio, March and April 2026

The **employees'** category constituted for **75.0 per cent** of the total employed persons in April 2026. This number of employees' increased marginally by **0.05 per cent (+6.3 thousand persons)** to **12.61 million persons**, compared with 12.60 million persons in March 2026. Likewise, the number of **own-account workers** continued to trend upward and rose by **0.2 per cent (+6.2 thousand persons)** to **3.15 million persons** from 3.14 million persons a month earlier. This category primarily consists of daily income earners engaged in small-scale activities including retailing, hawking, market and stall trading, and smallholders [Chart 1].

Chart 1: Employed persons by status in employment, March and April 2026

The number of **employed persons who were temporarily not working** in April 2026, declined by **2.4 per cent (-2.2 thousand persons)** to **90.5 thousand persons**, compared with 92.7 thousand persons recorded in March 2026. This group comprises of individuals who were temporarily not working but were not classified as unemployed, as they had jobs to return to.

3 UNEMPLOYMENT

April's unemployment rate rose to 3.0 per cent, returning to the level recorded in October 2025

In April 2026, the number of **unemployed persons** was on an uptrend, increasing by **0.6 per cent (+2.9 thousand persons)** to **511.8 thousand persons** from **509.0 thousand persons** in the previous month. As a result, the **unemployment rate** during the month rose by **0.1 percentage points** to **3.0 per cent** (March 2026: 2.9%), returning to the level recorded in October 2025 [Exhibit 2]. On a seasonally adjusted basis, the number of unemployed persons also rose by 0.6 per cent, with the unemployment rate recorded at 2.9 per cent.

Exhibit 2: Unemployed and unemployment rate, March and April 2026

Examining unemployment by category, the **actively unemployed** accounted for **79.5 per cent** of the total unemployed persons. This group, which comprises those who were available for work and were actively seeking jobs increased by **0.3 per cent (+1.3 thousand persons)** to **407.1 thousand persons** (March 2026: 405.8 thousand persons). Among the actively unemployed, **63.9 per cent** had been **unemployed for less than three months**, whereas **5.0 per cent** were those who were **unemployed for more than a year**⁵.

In the meantime, the **inactively unemployed**, or those who believed that no jobs were available rose by **1.5 per cent (+1.5 thousand persons)** to **104.7 thousand persons**, compared to 103.2 thousand persons in March 2026 [Chart 2].

⁵ Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment)

Chart 2: Unemployed category and duration of unemployment for the actively unemployed, March and April 2026

In April 2026, the unemployment rate for youth aged **15 to 24 years** was unchanged at **10.2 per cent**, registering **290.8 thousand unemployed youths** (March 2026: 290.0 thousand persons). Meanwhile, the unemployment rate among youth aged **15 to 30 years** increased by **0.1 percentage points** to **6.3 per cent**, with the number of unemployed youths recorded at **394.7 thousand persons** (March 2026: 6.2%; 390.9 thousand persons), as shown in **Chart 3**.

Chart 3: The number of unemployed persons and unemployment rate by selected age groups, March and April 2026

4 LABOUR FORCE

The LFPR stood at 70.9 per cent in April 2026

The **labour force** continued to trend up in April 2026, rising by **0.1 per cent**, or the equivalent of **14.6 thousand persons** to **17.33 million persons** (March 2026: 17.31 million persons). The **labour force participation rate (LFPR)** stood at **70.9 per cent**, unchanged from last month [**Exhibit 3**]. On seasonally adjusted terms, the labour force also recorded a 0.1 per cent increase, while the LFPR held steady at 70.9 per cent.

Exhibit 3: Labour force and LFPR, March and April 2026

Both male and female labour force registered marginal increases in April 2026. The **male labour force** rose to **10.78 million persons** (March 2026: 10.77 million persons), and the **female labour force** increased to **6.55 million persons** (March 2026: 6.54 million persons).

At the same time, the LFPR for both genders remained unchanged, with the **male LFPR** at **82.9 per cent**, while the **female LFPR** at **57.3 per cent**, consistent with the rates recorded in March 2026 [Exhibit 4].

Exhibit 4: Labour force and LFPR by sex, March and April 2026

5 OUTSIDE LABOUR FORCE

Housework/ family responsibilities remained the primary reason for being outside the labour force

The number of persons **outside the labour force** in April 2026 declined marginally by **0.01 per cent (-0.4 thousand persons)** to **7.10 million persons**, compared to the previous month (March 2026: 7.10 million persons).

Housework/ family responsibilities remained the primary reason for being outside the labour force, constituting **43.3 per cent**, followed by the **schooling/ training** reason with **40.5 per cent** [Chart 4].

Chart 4: Share of outside labour force by reasons for not seeking work, March and April 2026

6 LOOKING AHEAD

Malaysia's economic and labour market outlook is expected to remain favourable in the near term, supported by resilient domestic fundamentals, sustained investment momentum and ongoing development initiatives, given prevailing global conditions

Approaching the second half of 2026, Malaysia's economic trajectory is increasingly shaped by its ability to balance strong domestic activity with a rapidly evolving global environment. While global trade and financial markets remain exposed to geopolitical uncertainties, domestic consumption, private sector investment and ongoing development project continue to provide an important cushion against external volatility⁶.

Recent economic indicators also indicates that that the country's economic fundamentals remain robust, reflected by Malaysia's Gross Domestic Product (GDP) for the first quarter of 2026 which recorded a strong growth of 5.4 per cent. This performance exceeded the initial projection of 5.3 per cent and was higher than the 4.9 per cent recorded in the fourth quarter of 2025⁷. Consumer-related activities continue to expand; investment commitments remain encouraging and business activity across several services-related industries have remained relatively steady. At the same time, labour market fundamentals continue to reflect stable employment conditions, supported by sustained hiring demand in both consumer-facing and knowledge-based sectors⁸.

Looking ahead to the coming months, Malaysia's economic growth is expected to remain supported by private consumption, investment expansion and continued demand for higher-value manufacturing activities, especially within the electrical and electronics (E&E) subsector, semiconductors and the digital economy. Ongoing infrastructure development and foreign direct investment inflows are also anticipated to provide additional support to overall economic activity⁹.

Nevertheless, external risks have become more pronounced following the escalation of geopolitical tensions in West Asia and the prolonged disruptions affecting global energy supply chains. Higher crude

⁷ <https://www.bharian.com.my/luminate/1556240/pertumbuhan-kdnk-malaysia-54-peratus-suku-pertama-2026-sokong-sentimen-jangka-panjang>

⁸ <https://www.thestar.com.my/news/nation/2026/05/12/malaysias-unemployment-rate-holds-steady-at-29-in-march-2026>

⁹ <https://www.reuters.com/world/asia-pacific/malaysia-lifts-2026-growth-forecast-slightly-despite-trade-disruptions-rising-2026-03-31/>

oil prices, rising transportation costs and continued logistical bottlenecks are expected to place upward pressure on production costs and business operating expenses across many industries¹⁰.

For Malaysia, the impact of the global energy crisis is likely to be mixed across economic sectors. As a net energy exporter, the country may benefit from higher energy-related export earnings. However, businesses that depend heavily on imported inputs, transportation services and energy-intensive production processes could face increasing cost pressures. If energy market volatility persists into the second half of 2026, these developments may affect profit margins, investment decisions and hiring momentum in certain sectors¹¹.

From a labour market perspective, employment growth is expected to continue, albeit at a more moderate pace. The Services sector are likely to remain as the main contributor to job creation, particularly in tourism, retail trade, food and beverage services, logistics, healthcare and digital-related industries. In the meantime, employment in the Manufacturing sector may become more sensitive to fluctuations in external demand and global trade conditions, while the construction sector is expected to remain supported by ongoing public and private sector projects¹².

At the same time, structural transformation within the economy continues to reshape workforce requirements. The increasing adoption of automation, digitalisation and artificial intelligence (AI) is expected to strengthen demand for skilled and knowledge-based workers, while gradually reducing reliance on lower-skilled occupations in selected industries. As a result, continuous upskilling, reskilling and talent development initiatives will remain important in ensuring workforce adaptability and long-term labour market resilience.

Overall, Malaysia's economic and labour market outlook is expected to remain favourable in the near term, supported by resilient domestic fundamentals, sustained investment momentum and ongoing development initiatives. Nevertheless, uncertainties arising from the global energy crisis, geopolitical developments and external demand conditions may continue to influence the pace of economic expansion and labour market performance. Moving forward, efforts to strengthen business confidence, enhance workforce adaptability and support productivity growth will remain crucial in ensuring the continued resilience of both the economy and the labour market.

1. Pengenalan

- 1.1 Statistik yang diterbitkan dalam laporan ini adalah berdasarkan Survei Tenaga Buruh (STB) yang dilaksanakan oleh Jabatan Perangkaan Malaysia (DOSM). STB dilaksanakan berdasarkan garis panduan dan syor **International Labour Organization (ILO)** dengan merujuk kepada ***Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods***.
- 1.2 Survei yang dijalankan setiap bulan melalui pendekatan isi rumah ini menyediakan statistik tenaga buruh, guna tenaga dan pengangguran di peringkat nasional.
- 1.3 Pengumpulan dan prosesan data mengekalkan pendekatan yang menyeluruh dan sistematik dari semasa ke semasa untuk mendapatkan perbandingan statistik siri masa.
- 1.4 Maklumat yang dikumpul melalui STB adalah mengikut peruntukan **Akta Perangkaan 1965 (Disemak 1989)**. **Seksyen 6** dibawah Akta ini mengkehendaki mana-mana individu perlu memberikan butiran maklumat sebenar atau anggaran terbaik kepada DOSM. Sementara itu, **Seksyen 7** dalam Akta yang sama memperuntukan denda kepada responden yang gagal memberi kerjasama dalam pelaksanaan penyiasatan oleh DOSM. Mengikut Akta ini, maklumat terperinci yang dikumpul adalah sulit dan hanya angka agregat diterbitkan.
- 1.5 Nota teknikal ini menyediakan penerangan terperinci mengenai metodologi yang digunakan dalam pelaksanaan STB bagi membantu pengguna untuk memahami dengan lebih mendalam berkaitan maklumat pasaran buruh yang dipungut melalui pendekatan isi rumah.

2. Objektif survei

- 2.1 Objektif utama STB ialah:
 - i. Mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran; dan
 - ii. Menyediakan statistik terkini berkaitan situasi pasaran buruh dari aspek penawaran tenaga buruh
- 2.2 Statistik daripada survei ini digunakan terutamanya oleh kerajaan sebagai input dalam merangka strategi pembangunan negara; begitu juga ahli ekonomi, ahli akademik, sektor swasta dan individu sebagai tujuan penyelidikan dan analisis.

3. Kaedah pengumpulan data

- 3.1 STB menggunakan kaedah temu ramah bersemuka dengan responden. Dalam tempoh survei, penemuramah terlatih melawat isi rumah di tempat kediaman (TK) yang terpilih untuk memperolehi maklumat demografi semua ahli isi rumah dan maklumat terperinci berkaitan butir-butir tenaga buruh bagi ahli isi rumah yang berumur 15 tahun dan lebih.

- 3.2 Semakan kerja luar dibuat untuk mengesan dan memperbaiki kemungkinan maklumat yang salah atau tertinggal semasa penyiasatan ini dijalankan. Di samping itu, isi rumah terpilih juga ditemuramah semula untuk menyemak kualiti operasi pungutan data.
- 3.3 Sebanyak 25 peratus daripada panel ulangan terpilih ditemuramah menggunakan **kaedah Temuramah Melalui Telefon**.

4. Skop dan liputan

- 4.1 STB meliputi kedua-dua kawasan bandar dan luar bandar bagi daerah pentadbiran dalam semua negeri di Malaysia.
- 4.2 Definisi populasi survei meliputi penduduk yang tinggal di TK persendirian dan **tidak termasuk** mereka yang tinggal di TK institusi seperti hotel, asrama, hospital, penjara, rumah tumpangan dan pekerja yang tinggal di rumah kongsi.
- 4.3 Tiada penyelarasan dilakukan kepada penduduk yang tinggal di TK institusi untuk diasingkan daripada anggaran penduduk pertengahan tahun selepas banci walaupun STB tidak meliputi penduduk tersebut. Berdasarkan Banci Penduduk dan Perumahan semasa, penduduk yang tinggal di TK institusi adalah kurang daripada empat peratus daripada jumlah penduduk. Peratusan ini adalah kecil dan tidak mempengaruhi anggaran statistik tenaga buruh.
- 4.4 STB merangkumi penduduk yang aktif dan tidak aktif dalam ekonomi yang berumur **15 hingga 64 tahun**¹. Penduduk yang aktif dalam ekonomi terdiri daripada mereka yang bekerja atau menganggur, manakala mereka yang tidak aktif dikelaskan sebagai di luar tenaga buruh.

5. Rangka dan pensampelan

- 5.1 Rangka yang digunakan bagi pemilihan sampel STB bulanan adalah berdasarkan Rangka Pensampelan Isi Rumah yang terdiri daripada blok penghitungan (BP) yang diwujudkan untuk pelaksanaan Banci Penduduk dan Perumahan 2020 dan dikemas kini dari semasa ke semasa.
- 5.2 BP merupakan suatu kawasan muka bumi yang diwujudkan untuk tujuan pelaksanaan operasi pungutan data yang secara puratanya mengandungi antara 80 hingga 120 TK. Semua BP dibentuk dalam lingkungan sempadan yang diwartakan iaitu di dalam mukim atau kawasan majlis tempatan.
- 5.3 BP dalam rangka pensampelan dikelaskan mengikut kawasan bandar dan luar bandar².

- i. **Kawasan bandar**

Kawasan yang diwartakan serta kawasan tepu bina yang bersempadan dengannya dan gabungan kedua-dua kawasan ini mempunyai penduduk seramai 10,000 orang atau lebih semasa Banci Penduduk dan Perumahan 2020.

1. Had umur bekerja bagi sesebuah negara ditentukan berdasarkan struktur umur penduduk negara tersebut.

2. Taburan Penduduk dan Ciri-Ciri Asas Demografi, Banci Penduduk dan Perumahan 2020.

- **Kawasan tepu bina**

Kawasan yang terletak bersebelahan kawasan yang diwartakan dan mempunyai sekurang-kurangnya 60 peratus penduduk (berumur 15 tahun dan lebih) yang terlibat dalam aktiviti bukan pertanian.

Definisi kawasan bandar juga mengambil kira kawasan pembangunan khusus iaitu kawasan pembangunan yang tidak diwartakan dan boleh dikenal pasti serta terpisah dari kawasan yang diwartakan atau kawasan tepu bina melebihi 5 km dan mempunyai penduduk sekurang-kurangnya 10,000 orang dengan 60 peratus penduduk (berumur 15 tahun dan lebih) terlibat dalam aktiviti bukan pertanian.

- ii. **Kawasan luar bandar**

Kawasan selain yang diwartakan dan mempunyai jumlah penduduk kurang daripada 10,000 orang serta kawasan yang tidak diwartakan.

- 5.4 Pembandaran merupakan proses yang dinamik dan sentiasa berubah mengikut kemajuan dan pembangunan. Oleh itu, kawasan bandar bagi Banci Penduduk dan Perumahan yang dilaksanakan oleh DOSM tidak semestinya merujuk kepada kawasan yang sama kerana kawasan yang memenuhi kriteria bandar akan terus bertambah dan berkembang mengikut masa.

6. Prosedur penganggaran

- 6.1 Anggaran penduduk semasa mengikut ciri-ciri kumpulan umur, jantina, kewarganegaraan, etnik dan negeri digunakan sebagai penanda aras dalam penyediaan statistik tenaga buruh melalui **kaedah anggaran nisbah bergabung** iaitu *adjusted weight* dan faktor penduduk.

- i. ***Adjusted weight***

Adjusted weight digunakan bagi mengambil kira kes tidak respons.

- ii. **Faktor penduduk**

Dalam reka bentuk pensampelan berperingkat, saiz sampel adalah pembolehubah rawak dan jumlah agregat yang dianggar daripada survei boleh menghasilkan ralat pensampelan yang tinggi. Wajaran *external* digunakan untuk memberikan ralat pensampelan yang minimum. Wajaran *external* yang digunakan dalam Survei Tenaga Buruh ialah faktor penduduk. Faktor penduduk diperoleh melalui anggaran terkini jumlah penduduk yang mana ia digunakan untuk mengubahsuai kadar dan nisbah yang dianggarkan daripada survei.

- 6.2 Dua jenis statistik penduduk disediakan oleh DOSM iaitu:

- i. **unjuran penduduk** bagi menunjukkan saiz dan struktur penduduk jangka panjang berasaskan andaian tertentu mengenai trend kesuburan, mortaliti dan migrasi. Statistik ini digunakan sebagai input dalam membuat perancangan dan penggubalan dasar pada masa hadapan.
- ii. **anggaran penduduk** semasa bagi menggambarkan saiz populasi pada masa kini dan disediakan secara tahunan berasaskan data semasa kelahiran, kematian dan migrasi.

- 6.3 STB Bulanan bagi tahun 2026 dianggar menggunakan data unjuran berdasarkan anggaran penduduk semasa berasaskan Banci Penduduk dan Perumahan Malaysia 2020.

Justeru, semakan semula bagi statistik tenaga buruh bulanan bagi tahun 2020 sehingga 2025 perlu dilaksanakan bagi memastikan statistik tenaga buruh yang diterbitkan selari dengan maklumat demografi dan sosio-ekonomi semasa penduduk Malaysia.

Sehubungan dengan itu, pelaksanaan semakan semula STB bulanan akan dilaksanakan secara berperingkat. Pelarasan semula telah dilaksanakan bagi data STB bulanan bagi tahun 2025 bermula dengan data Disember 2025 berdasarkan anggaran penduduk semasa yang terkini.

1. Introduction

- 1.1 The statistics published in this report is based on the Labour Force Survey (LFS) conducted by Department of Statistics, Malaysia. The implementation of the LFS is based on the guidelines and recommendations of the **International Labour Organization (ILO)** with reference to the **Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Method**.
- 1.2 The survey is carried out every month through a household approach to provide statistics of labour force, employment and unemployment at the national.
- 1.3 The comprehensive and systematic approach in data collection and processing has been maintained over a period of time in order to obtain comparable time series statistics.
- 1.4 The information obtained from LFS is gathered under the provisions of the **Statistics Act 1965 (Revised 1989)**. **Section 6** of this Act requires any individuals to provide actual information or best estimates to DOSM. Meanwhile, **Section 7** of this Act allows respondents whom refuse to cooperate in the undertaking of the survey to be penalised. The Act stipulated that the detailed information gathered is confidential and only aggregated figures are published.
- 1.5 This technical note comprises of detailed explanation on concepts, definition and methodology used to conduct LFS to assist users to better understand labour market information obtained via household approach.

2. Objectives of the survey

- 2.1 The main objectives of LFS are:
 - i. To collect information on the structure and distribution of labour force, employment and unemployment; and
 - ii. To provide the latest statistics in relation to labour market situation from the perspective of labour supply.
- 2.2 The statistics from this survey is utilised especially by the government as input in planning national developments strategies; as well as by economists, academicians, private sector and individuals for the purpose of research and analysis.

3. Method of data collection

- 3.1 The LFS used the personal interview method. During the survey period, trained interviewers visit households in selected living quarters (LQs) to collect demographic information on all household members and labour force particulars of household members aged 15 years and over.
- 3.2 Field checks are undertaken to identify and correct any possibility of errors or omissions at the time when the survey is conducted. In addition to this, selected households are interviewed again to check the quality of data collection operation.

- 3.3 A total of 25 per cent of the selected repeated panels were interviewed using the **Telephone Interviewing** method.

4. Scope and coverage

- 4.1 The LFS covers both urban and rural areas for all administrative districts within all states in Malaysia.
- 4.2 The survey population is defined to cover persons who live in private LQs; hence **excludes** persons residing in institutional LQs such as hotels, hostels, hospitals, prisons, boarding houses, and workers residing in construction work site.
- 4.3 There is no attempt was made to adjust the exclusion of the population living in institutional LQs from the independent mid-year post census population estimates, although the LFS did not cover that population. Based on the current Population and Housing Census, those living in institutional LQs was less than four per cent of the total population. This percentage was small and did not affect the estimates of labour force statistics.
- 4.4 This survey comprises the economically active and inactive population between the age of **15 to 64 years**¹. The economically active population are those who are either employed or unemployed while those who are inactive are classified as outside labour force.

5. Sampling frame

- 5.1 The frame used for the selection of sample for monthly LFS is based on the Household Sampling Frame which is made up of renumeration blocks (EBs) created for the 2020 Population and Housing Census and was updated from time to time.
- 5.2 EBs are geographically contiguous areas of land with identifiable boundaries created for survey operation purposes, which on average contains about 80 to 120 LQs. All EBs are formed within gazetted boundaries, i.e. within mukim or local authority areas.
- 5.3 The EBs in the sampling frame are also classified into urban and rural areas².

i. Urban areas

Gazetted areas with their adjoining built-up areas with combined population of 10,000 or more at the time of the 2020 Population and Housing Census.

- **Built-up areas**

Areas contiguous to a gazetted area with at least 60 per cent of the population (aged 15 years and over) engaged in non-agricultural activities.

The definition of urban areas also takes into account the special development area namely the development area which is not gazetted and can be identified and separated from the gazetted area or built-up area of more than 5 km with

1. Working age limit for a country is determined based on the age structure of the population of the country.

2. Population Distribution and Basic Demographic Characteristics, 2020 Population and Housing Census.

population of at least 10,000 persons where 60 per cent of the population (aged 15 years and over) were involved in non-agricultural activities.

ii. Rural areas

All other gazetted areas with population of less than 10,000 persons and non-gazetted areas.

- 5.4 Urbanisation is a dynamic process and keeps changing in line with progress and development. Thus, the urban areas for the Population and Housing Census conducted by DOSM do not necessarily refer to the same areas, as areas fulfilling the criteria of urban continue to increase or grow with time.

6. Estimation Procedures

- 6.1 Current population estimates by age group, sex, citizenship, ethnicity and state were used as the benchmark to produce labour statistics through **combined ratio estimated method** which are adjusted weight and population factor.

i. Adjusted weight

Adjusted weight is used to take into account the non-response cases.

ii. Population factor

In multi-stage sampling design, the sample size is a random variable and aggregates directly estimated from the survey can have large sampling errors. External weight is used to minimise sampling error. The external weight used in Labour Force Survey is the population factor. The population factor is obtained through up-to-date estimates of population totals which is used to inflate the various rates and ratios estimated from the survey.

- 6.2 Two types of population statistics produced by DOSM are:

- i. population projection** to indicate the size and structure of the population in the long term based on certain assumption on the trend of fertility, mortality and migration. These statistics are used as input to formulate future plans and policies.
- ii. current population** estimates to illustrate the size of the current population and is prepared annually based on the recent data on birth, death and migration.

- 6.3 The monthly LFS statistics for 2026 statistics are estimated using the current population estimates based on the Population and Housing Census of Malaysia 2020.

Therefore, rebasing of the monthly labour force statistics for 2020 until 2025 needs to be implemented to ensure that the published labour force statistics are in line with the current demographic and socio-economic information of the Malaysian population.

In this regard, the implementation of the revision of monthly LFS statistics will be implemented in stages. The revisions are carried out on the monthly LFS data for 2025, beginning with the December 2025 data based on the latest current population estimates.
