Pemakluman

Jabatan Perangkaan Malaysia (DOSM) sedang melaksanakan **Banci Ekonomi 2026 (BE2026)**, bertemakan “**Data Nadi Ekonomi Rakyat**”. Pelaksanaan Banci Ekonomi kali keenam ini berlangsung dari **5 Januari hingga 31 Oktober 2026**. BE2026 bertujuan untuk mengumpul data yang menyeluruh dan berstruktur daripada semua pertubuhan perniagaan berdaftar dan tidak berdaftar di Malaysia, bagi menilai prestasi, struktur serta ciri-ciri ekonomi negara secara komprehensif dan berasaskan bukti.

Malaysia buat julung kalinya telah menduduki **tangga pertama (1)** di peringkat global dalam laporan dwi-tahunan **Open Data Inventory (ODIN) 2024/25** yang dikeluarkan oleh *Open Data Watch* (ODW), mengatasi 197 negara lain. Pencapaian ini merupakan lonjakan ketara daripada kedudukan ke-67 dalam penilaian ODIN 2022/23.

OpenDOSM NextGen adalah medium yang menyediakan katalog data dan visualisasi bagi memudahkan pengguna menganalisis pelbagai data dan boleh diakses melalui portal <https://open.dosm.gov.my>.

MyLabourHub ialah platform komprehensif yang mengintegrasikan institusi, data dan teknologi bagi menyediakan maklumat pasaran buruh yang relevan, tepat dan mudah diakses. Dapatkan data pasaran buruh Malaysia melalui *MyLabourHub* di <https://mylabourhub.dosm.gov.my>.

Announcement

*The Department of Statistics Malaysia (DOSM) is conducting the **Economic Census 2026 (BE2026)**, themed “**Data Nadi Ekonomi Rakyat**”. The sixth Economic Census, running from **5th January to 31st October 2026**. BE2026 aims to collect comprehensive, structured data from all registered and unregistered business establishments in Malaysia to assess the nation’s economic performance, structure and characteristics in an evidence-based manner.*

***Malaysia** has, for the first time, successfully secured the **top position** globally in the biennial **Open Data Inventory (ODIN) 2024/25** report released by *Open Data Watch* (ODW), surpassing 197 other countries. This achievement marks a significant leap from its 67th position in the ODIN 2022/23 assessment.*

***OpenDOSM NextGen** is a medium that provides data catalogue and visualisations to facilitate users’ analysis and can be accessed through <https://open.dosm.gov.my>.*

***MyLabourHub** is a comprehensive platform that integrates institutions, data and technology to deliver relevant, accurate and accessible labour market information. Access the labour market data for Malaysia at <https://mylabourhub.dosm.gov.my>.*

Laporan Tenaga Buruh, Malaysia, bulanan membentangkan statistik berkaitan tenaga buruh, guna tenaga dan pengangguran yang diperoleh daripada Survei Tenaga Buruh (STB) melalui pendekatan isi rumah. Pelaksanaan STB adalah berdasarkan garis panduan dan syor oleh *International Labour Organization* (ILO) dengan merujuk kepada *Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods*.

Statistik tenaga buruh merupakan input penting untuk menganalisis pasaran buruh, menggubal dasar serta merancang, melaksana dan memantau program terutamanya berkaitan pembangunan sumber manusia. Statistik ini juga menjadi rujukan penting kepada penyelidik, ahli ekonomi, ahli akademik, pihak swasta dan individu yang terlibat dalam kajian berkaitan guna tenaga dan pasaran buruh.

Laporan Tenaga Buruh bagi Mei 2026 memperihalkan kedudukan penawaran tenaga buruh berdasarkan situasi semasa. Laporan ini juga menghuraikan perubahan bulan ke bulan untuk mengkaji kesan langsung daripada peristiwa terkini.

Jabatan Perangkaan Malaysia merakamkan setinggi-tinggi penghargaan dan terima kasih atas kerjasama dan sumbangan yang diberikan oleh semua pihak dalam menjayakan penerbitan ini. Setiap maklum balas dan cadangan ke arah penambahbaikan laporan ini pada masa hadapan amat dihargai.

JABATAN PERANGKAAN MALAYSIA

Julai 2026

The monthly Labour Force Report, Malaysia, presents statistics of the labour force, employment and unemployment obtained from the Labour Force Survey (LFS) through a household approach. The implementation of the LFS is based on the guidelines and recommendations of the International Labour Organization (ILO) with reference to the Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods.

The labour force statistics are vital input for labour market analysis, policy formulation, as well as planning, implementing, and monitoring programmes, particularly related to human resource development. These statistics also serve as essential references for researchers, economists, academicians, the private sector, and individuals involved in research related to employment and the labour market.

The Labour Force Report for May 2026 describes the labour supply condition based on the current situation. The report also elaborates on the month-on-month changes to examine the immediate effects of recent events.

The Department of Statistics Malaysia gratefully acknowledges the cooperation and contribution rendered by all parties in making this publication a success. Every piece of feedback and suggestion towards improving future reports is highly appreciated.

Aktiviti ekonomi	: Klasifikasi industri mengikut Piawaian Klasifikasi Industri Malaysia (MSIC) 2018 Versi 1.0 kepada lima sektor utama iaitu Pertanian, Perlombongan & Pengkuarian, Pembuatan, Pembinaan dan Perkhidmatan. Manakala, sektor Pembuatan dan Perkhidmatan dibahagikan kepada subsektor.
Bekerja	: Semua orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga sama ada sebagai majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji.
Bekerja sendiri	: Seorang yang mengusahakan ladang, perniagaan atau perusahaan sendiri tanpa menggaji pekerja di ladang, perniagaan atau perusahaannya.
Guna tenaga tidak penuh berkaitan kemahiran	: Mereka yang mempunyai pendidikan tertiar dan bekerja dalam kategori separuh mahir dan berkemahiran rendah.
Guna tenaga tidak penuh berkaitan masa	: Kumpulan yang bekerja kurang daripada 30 jam seminggu semasa minggu rujukan disebabkan keadaan kerja atau kerja yang tidak mencukupi dan berkeupayaan serta sanggup menerima tambahan bilangan jam bekerja. Mereka yang bekerja lebih daripada 30 jam seminggu semasa minggu rujukan merupakan guna tenaga penuh.
Kadar pengangguran	: Perkadaran penduduk yang menganggur kepada jumlah penduduk di dalam tenaga buruh dalam bentuk peratusan.
Kadar penyertaan tenaga buruh	: Perkadaran penduduk dalam tenaga buruh kepada penduduk dalam umur bekerja dalam bentuk peratusan.
Kategori kemahiran	: Untuk tujuan pelaporan, kategori pekerjaan dikelaskan kepada tiga tahap kemahiran mengikut Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 2013 seperti berikut: Pekerja mahir: 1. Pengurus; 2. Profesional; dan 3. Juruteknik dan profesional bersekutu. Pekerja separuh mahir: 4. Pekerja sokongan perkeranian; 5. Pekerja perkhidmatan dan penjualan; 6. Pekerja mahir pertanian, perhutanan, penternakan dan perikanan; 7. Pekerja kemahiran dan pekerja pertukangan yang berkaitan; dan 8. Operator loji dan mesin, dan pemasang. Pekerja berkemahiran rendah: 9. Pekerja asas.

Bermula Januari 2022, kategori pekerjaan adalah mengikut Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 2020 dengan tambahan kumpulan 0 - Angkatan Tentera.

Luar tenaga buruh	: Penduduk yang tidak dikelaskan sebagai bekerja atau menganggur dikategorikan sebagai luar tenaga buruh. Kategori ini terdiri daripada suri rumah, pelajar (termasuk mereka yang akan melanjutkan pelajaran), mereka yang telah bersara, tidak berkeupayaan dan mereka yang tidak berminat untuk mencari pekerjaan.
Majikan	: Seorang yang menjalankan sesuatu perniagaan, aktiviti ladang atau perusahaan lain dan menggaji sekurang-kurangnya seorang pekerja dalam perniagaan atau perusahaannya.
Nisbah guna tenaga kepada penduduk	: Perkadaran penduduk yang bekerja kepada jumlah penduduk dalam kumpulan umur bekerja.
Pekerja	: Seorang yang bekerja untuk majikan sektor awam atau swasta dan menerima ganjaran tetap seperti upah, gaji, komisen, tip atau ganjaran berbentuk mata benda.
Pekerja keluarga tanpa gaji	: Seorang yang bekerja tanpa menerima sebarang bayaran atau upah di ladang, perniagaan atau perusahaan yang dijalankan oleh ahli keluarganya yang lain.
Penganggur	: Mereka yang tidak bekerja semasa minggu rujukan dan dikelaskan kepada dua kumpulan iaitu penganggur aktif dan penganggur tidak aktif.
Penganggur aktif	: Mereka yang bersedia untuk bekerja dan aktif mencari pekerjaan dalam minggu rujukan.
Penganggur tidak aktif	: Tidak mencari pekerjaan dalam minggu rujukan kerana percaya tidak terdapat pekerjaan atau pun tidak berkeelayakan; mungkin mencari pekerjaan jika tidak kerana sakit atau keadaan cuaca; dan telah mencari pekerjaan sebelum minggu rujukan dan sedang menunggu jawapan permohonan pekerjaan.
Tenaga buruh	: Tenaga buruh merujuk kepada penduduk dalam kumpulan umur bekerja (15 - 64 tahun) sama ada bekerja atau menganggur.

Actively unemployed : Persons who were available for work and were actively looking for a job during the reference week.

Category of skills : For reporting purposes, the category of occupation is regrouped into three levels of skills based on the Malaysia Standard Classification of Occupation (MASCO) 2013 as follows:

Skilled workers:

1. Managers;
2. Professionals; and
3. Technicians and associate professionals.

Semi-skilled workers:

4. Clerical support workers;
5. Services and sales workers;
6. Skilled agricultural, forestry, livestock, and fishery workers;
7. Craft and related trades workers; and
8. Plant and machine operators and assemblers.

Low-skilled workers:

9. Elementary occupations.

Starting in January 2022, the category of occupation is based on the Malaysia Standard Classification of Occupation (MASCO) 2020 with the addition of group 0 - Armed Forces occupations.

Economic activity : Classification of industries according to the Malaysia Standard Industrial Classification (MSIC) 2008 version 1.0 into five main sectors: Agriculture, Mining & quarrying, Manufacturing, Construction and Services. In the meantime, Manufacturing and Services are further disaggregated into sub-sectors.

Employed : All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain either as an employer, employee, own-account worker, or unpaid family worker.

Employee : A person who works for a public or private employer and receives regular remuneration in wages, salary, commission, tips or payment in kind.

Employer : A person who operates a business, a plantation or other trade and employs at least one employee in his business or trade.

Employment-to-population ratio : The proportion of the employed population to the working-age population.

• GLOSSARY •

<i>Inactively unemployed</i>	<i>: Did not look for work because they believed no work was available or that they were not qualified; Would have looked for work if they had not been temporarily ill or had it not been for weather conditions; and had looked for work prior to the reference week and were waiting for the result of job applications.</i>
<i>Labour force participation rate</i>	<i>: The ratio of the labour force to the working-age population, expressed as a percentage.</i>
<i>Outside labour force</i>	<i>: All persons not classified as employed or unemployed are classified as outside the labour force. This category consists of housewives, students (including those going for further studies), retired, disabled persons and those not interested in looking for a job.</i>
<i>Own-account worker</i>	<i>: A person who operates his own farm, business or trade without employing any paid workers to conduct his farm, trade or business.</i>
<i>Skill-related underemployment</i>	<i>: Those with tertiary education and working in the semi-skilled and low-skilled categories.</i>
<i>Time-related underemployment</i>	<i>: A group of people who were employed less than 30 hours per week during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work. Persons who were employed more than 30 hours per week during the reference week are considered to be in full employment.</i>
<i>Unemployed</i>	<i>: Those who did not work during the reference week were classified into two groups, which are actively and inactively unemployed.</i>
<i>Unemployment rate</i>	<i>: The proportion of the unemployed population to the total population in the labour force, expressed as a percentage.</i>
<i>Unpaid family worker</i>	<i>: A person who works without pay or wages on a farm, business or trade operated by another member of the family.</i>

KONSEP DAN DEFINISI

Apa itu Survei Tenaga Buruh (STB)?

Survei Tenaga Buruh (STB) dilaksanakan untuk mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran dari aspek penawaran tenaga buruh.

STB meliputi kedua-dua kawasan bandar dan luar bandar bagi semua daerah pentadbiran di semua negeri di Malaysia menggunakan pendekatan *multi-modal data collection* melalui temu ramah bersemuka dan *Computer-Assisted Telephone Interview (CATI)*

STB dilaksanakan berdasarkan garis panduan dan syor oleh *International Labour Organization (ILO)*.

Populasi penyiasatan merangkumi penduduk yang tinggal di tempat kediaman persendirian dan tidak termasuk mereka yang tinggal di institusi-institusi seperti hotel, hospital, asrama, penjara dan pekerja yang tinggal di rumah kongsi.

Umur bekerja bagi analisis STB di Malaysia merujuk kepada ahli isi rumah yang berumur 15 hingga 64 tahun semasa minggu rujukan, sama ada berada di dalam tenaga buruh atau di luar tenaga buruh.

TENAGA BURUH

- Penduduk dalam kumpulan umur bekerja 15 hingga 64 tahun (dalam tahun genap pada hari lahir terakhir).
- Sama ada bekerja atau menganggur semasa minggu rujukan.

BEKERJA

- Orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji).
- Mereka yang tidak bekerja semasa minggu rujukan disebabkan sakit, kecederaan, cuaca buruk, bercuti, pertelingkahan buruh dan sebab-sebab sosial atau keagamaan tetapi mempunyai pekerjaan, ladang, perusahaan atau perusahaan keluarga lain untuk kembali bekerja.
- Mereka yang tidak bekerja buat sementara waktu tetapi bergaji dan pasti akan dipanggil bekerja semula.

PENGANGGUR

- Mereka yang tidak mempunyai pekerjaan tetapi berminat untuk bekerja dan sedang mencari kerja.
- Dikelaskan kepada dua kumpulan iaitu penganggur aktif dan penganggur tidak aktif.

LUAR TENAGA BURUH

- Penduduk yang tidak dikelaskan sebagai bekerja atau menganggur.
- Contoh: suri rumah, pelajar, mereka yang telah bersara atau tidak berkeupayaan dan mereka yang tidak berminat untuk mencari pekerjaan.

KADAR PENGANGGURAN

- Perkadaran penduduk yang menganggur (tidak bekerja) kepada jumlah penduduk di dalam tenaga buruh.
- Peratus penduduk di dalam tenaga buruh yang tidak bekerja.

KADAR PENYERTAAN TENAGA BURUH

- Aktiviti ekonomi penduduk pada keseluruhannya bergantung kepada ciri-ciri demografi sesuatu populasi.
- Pecahan mereka yang aktif secara ekonomi berbeza di antara kumpulan-kumpulan kecil penduduk tersebut.
- Perbezaan ini diukur dengan kadar aktiviti tertentu yang dikenali sebagai kadar penyertaan tenaga buruh.
- Kadar penyertaan tenaga buruh ditakrifkan sebagai perkadaran penduduk dalam tenaga buruh kepada jumlah penduduk dalam umur bekerja (15 hingga 64 tahun) yang dipersembahkan dalam bentuk peratus.

PELARASAN MUSIM

- Data siri masa adalah amat berguna untuk ahli ekonomi, pembuat dasar & keputusan serta penganalisis siri masa untuk mengenal pasti ciri-ciri penting siri ekonomi seperti arah aliran, *turning point* dan konsistensi antara penunjuk ekonomi yang lain. Kadangkala ciri ini sukar untuk diperhatikan kerana pergerakan bermusim. Oleh itu, sekiranya kesan bermusim boleh disingkirkan, arah aliran data siri ini dapat dilihat dengan lebih baik. Anggaran dan penyingkiran kesan bermusim dipanggil pelarasan bermusim.
- Pelarasan bermusim adalah satu proses untuk mengenal pasti dan menyingkirkan bentuk pola bermusim yang biasa berlaku dalam tempoh satu tahun, yang mungkin juga merangkumi pengaruh dari kesan cuti yang bergerak dan hari bekerja/ berdagang bagi suatu tempoh. Objektif utama proses ini adalah untuk menyerlahkan arah aliran dan pergerakan-pergerakan jangka pendek dalam siri ini.
- Di Malaysia, kebanyakan data siri masa dipengaruhi oleh kesan bermusim. Oleh itu, untuk menghapus dan melaraskan kesan bermusim data siri masa ekonomi Malaysia, pakej standard pelarasan bermusim, X-12 ARIMA telah digunakan oleh Jabatan Perangkaan Malaysia.

CONCEPTS AND DEFINITIONS

What is Labour Force Survey (LFS)?

Labour Force Survey (LFS) was conducted to collect information on the structure and distribution of labour force, employment and unemployment from the perspective of labour supply.

LFS encompasses both urban and rural areas for all administrative districts within all states in Malaysia using multi-modal data collection approach through the personal interview and a Computer-Assisted Telephone Interview (CATI).

The LFS are conducted based on the standard guidelines and recommendations of the International Labour Organization (ILO).

The survey population comprises persons who live in the private living quarters, hence excludes persons residing in institutions such as hotels, hospitals, hostels, prisons, and workers residing in construction worksite.

The working age for the analysis of LFS in Malaysia refers to household members between the age of 15 to 64 years during the reference week, who are either in the labour force or outside the labour force.

LABOUR FORCE

- The population in the working age group of 15 to 64 years (in completed years at last birthday).
- Either employed or unemployed in the reference week.

EMPLOYED

- Persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).
- Persons who did not work during the reference week because of illness, injury, bad weather, leave, labour dispute and social or religious reasons but had a job, farm, enterprise or other family enterprise to return to.
- Those on temporary lay-off with pay who would definitely be called back to work.

UNEMPLOYED

- Those who did not work during the reference week but are interested to work and seeking for a job.
- Classified into two groups which are actively and inactively unemployed.

OUTSIDE LABOUR FORCE

- All persons not classified as employed or unemployed.
- Example: housewives, students, retirees, disabled persons and those not interested in looking for job.

UNEMPLOYMENT RATE

- The proportion of the unemployed population to the total population in labour force.
- Percentage of the unemployed population in the labour force.

LABOUR FORCE PARTICIPATION RATE

- The economic activity of a population depends on the demographic characteristics of that population.
- The proportion of the economically active population, hence differs between sub-groups of that population.
- These variations are measured by specific activity rates termed as labour force participation rate.
- Labour force participation rate is defined as the ratio of the labour force to the working age population (15 to 64 years), expressed as a percentage.

SEASONAL ADJUSTMENT

- Time-series data are very useful for economist, policy & decision makers and time-series analysts to identify the important features of economics series such as direction, turning point and consistency between other economic indicators. Sometimes this feature is difficult to observe because of seasonal movements. Thus, if seasonal effect can be removed, the behaviour of the series would be better viewed. The estimation and removal of the seasonal effects is called seasonal adjustment.
- Seasonal adjustment is a process to identify and to remove the regular within-a-year seasonal pattern, which may also include the influences of moving holidays and working/trading days effect in each period. The ultimate objective of the process is to highlight the underlying trends and short-term movements in the series.
- In Malaysia, most of the time series data is affected by seasonal effects. Hence, to eliminate the seasonal effect as well as to seasonally adjust the Malaysian economic time series data, a standard seasonal adjustment package, X-12 ARIMA was used by the Department of Statistics Malaysia.

@StatsMalaysia

NOTA PENERANGAN

EXPLANATORY NOTES

Statistik Survei Tenaga Buruh (STB) bulanan bagi tahun 2026 dianggar menggunakan data unjuran berdasarkan anggaran penduduk semasa terkini.

Pada masa yang sama, pelarasan semula dilaksanakan bagi data STB bulanan secara berperingkat bermula dengan data Disember 2025 berdasarkan data anggaran penduduk semasa yang terkini.

The monthly Labour Force Survey (LFS) statistics for 2026 are estimated using projection data based on the latest current population estimates.

On the same note, revisions are carried out on monthly LFS data in stages beginning with December 2025 data based on the latest current population estimates.

1 Ringkasan Penemuan

Summary of Findings

Muka surat ini sengaja dibiarkan kosong
This page is deliberately left blank

SOROTAN UTAMA

- Bilangan **penduduk bekerja** pada Mei 2026 terus bertambah pada kadar sederhana, meningkat sebanyak **0.1 peratus (+9.0 ribu orang)** kepada **16.82 juta orang** berbanding bulan sebelumnya (April 2026: 16.82 juta orang). **Nisbah guna tenaga kepada penduduk**, yang menunjukkan keupayaan sesebuah ekonomi untuk mewujudkan pekerjaan, kekal tidak berubah iaitu **68.8 peratus** pada Mei 2026, sama seperti pada bulan sebelumnya.
- Dari perspektif sektor ekonomi, sektor Perkhidmatan terus menjadi penyumbang utama kepada jumlah guna tenaga pada bulan tersebut, dengan aktiviti Perdagangan borong dan runcit; aktiviti Penginapan dan perkhidmatan makanan & minuman; serta Maklumat & komunikasi meliputi sumbangan terbesar dalam guna tenaga. Sektor utama lain, termasuk Pembuatan, Pembinaan, Pertanian, serta Perlombongan & pengkuarian, turut mencatatkan peningkatan dalam bilangan penduduk bekerja pada Mei 2026.
- **Pekerja** kekal sebagai kategori guna tenaga terbesar, merangkumi **75.0 peratus** daripada jumlah penduduk bekerja pada Mei 2026. Bilangan pekerja meningkat sebanyak **0.04 peratus (+5.1 ribu orang)** kepada **12.61 juta orang** (April 2026: 12.61 juta orang). Sementara, bilangan **penduduk bekerja sendiri** meningkat **0.1 peratus (+3.2 ribu orang)** kepada **3.15 juta orang** (April 2026: 3.15 juta orang).
- Bilangan **penganggur** pada Mei 2026 meningkat sedikit kepada **513.4 ribu orang**, dengan pertambahan **0.3 peratus (+1.6 ribu orang)** daripada 511.8 ribu orang pada April 2026. **Kadar pengangguran** Mei kekal pada **3.0 peratus**, tidak berubah berbanding kadar yang direkodkan pada bulan sebelumnya.
- Pada Mei 2026, **tenaga buruh** terus mencatatkan peningkatan, bertambah sebanyak **0.1 peratus (+10.6 ribu orang)** kepada **17.34 juta orang** (April 2026: 17.33 juta orang). Sementara itu, **kadar penyertaan tenaga buruh (KPTB)** kekal tidak berubah pada **70.9 peratus**, sama seperti pada bulan April yang lalu.
- Bilangan penduduk di **luar tenaga buruh** pada Mei 2026 merekodkan peningkatan marginal **0.04 peratus (+2.6 ribu orang)** kepada **7.10 juta orang** (April 2026: 7.10 juta orang). Komponen terbesar luar tenaga buruh adalah **kerja rumah/tanggungjawab keluarga**, merangkumi **43.3 peratus**, diikuti oleh kategori **bersekolah/latihan** yang meliputi **40.5 peratus**.
- Pasaran buruh Malaysia dijangka terus kekal berdaya tahan dalam tempoh beberapa bulan akan datang, disokong oleh keadaan ekonomi domestik yang menggalakkan, aktiviti pelaburan yang berterusan serta kemajuan transformasi struktur ekonomi negara. Walaupun ketidakpastian luaran berpotensi mempengaruhi aktiviti pengambilan pekerja dalam industri tertentu, kedudukan pasaran buruh secara keseluruhannya dijangka terus stabil. Usaha berterusan untuk meningkatkan produktiviti buruh, memperkukuh pengadaptasian tenaga kerja serta mempertingkatkan padanan antara penawaran buruh dengan permintaan industri akan terus menjadi faktor penting dalam mengekalkan peluang pekerjaan yang berkualiti dan menyokong pertumbuhan ekonomi jangka panjang.

TENAGA BURUH MALAYSIA TERUS MEREKODKAN PERTUMBUHAN SEDERHANA PADA MEI 2026, SELARI DENGAN TRANSFORMASI BERTERUSAN KE ARAH STRUKTUR INDUSTRI BERTEKNOLOGI TINGGI DAN BERASASKAN KEMAHIRAN

Pasaran buruh Malaysia terus berkembang pada Mei 2026 selaras dengan prestasi ekonomi negara yang kekal positif, meskipun berdepan persekitaran global yang mencabar. Momentum pertumbuhan ekonomi disokong oleh aktiviti perdagangan luar negeri yang kukuh, dengan Malaysia merekodkan jumlah nilai perdagangan melebihi RM1 trilion bagi tempoh empat bulan pertama tahun 2026¹. Pencapaian ini mencerminkan pengukuhan sektor perdagangan dan perindustrian, yang terus menyokong pertumbuhan ekonomi serta mengekalkan permintaan terhadap tenaga buruh.

Dalam konteks ini, aliran masuk pelaburan langsung asing (FDI) ke dalam sektor berteknologi tinggi, ekonomi digital dan industri bernilai tambah tinggi, seperti semikonduktor serta teknologi hijau, terus memperkukuh pembentukan struktur ekonomi yang dipacu oleh teknologi². Pelaburan ini meningkatkan kapasiti pengeluaran industri di samping menggalakkan pembangunan ekosistem perindustrian dan rangkaian nilai berasaskan teknologi. Selain itu, aliran masuk FDI turut menyumbang kepada pewujudan peluang pekerjaan berkemahiran tinggi, khususnya dalam industri pembuatan berteknologi dan industri berkaitan digital yang memerlukan tenaga kerja berkemahiran tinggi serta berasaskan pengetahuan³.

Dari perspektif penawaran tenaga buruh, usaha memperkasa kemahiran dan meningkatkan kebolehpasaran tenaga buruh terus dipergiat, termasuk dalam kalangan peserta ekonomi gig⁴. Inisiatif ini menyokong pembangunan ekosistem pekerjaan berasaskan kemahiran di samping memperluas akses kepada peluang pekerjaan berkemahiran dalam pasaran buruh⁵. Secara keseluruhannya, perkembangan ini mencerminkan daya tahan tenaga buruh Malaysia yang terus merekodkan pertumbuhan sederhana pada bulan tersebut, selaras dengan transformasi berterusan ke arah struktur industri berteknologi tinggi dan berasaskan kemahiran.

Di samping itu, prospek ekonomi Malaysia dalam tempoh terdekat kekal optimistik, seperti yang ditunjukkan oleh Indeks Pelopor (IP), yang meningkat sebanyak 1.29 peratus kepada 115.0 mata pada April 2026 berbanding 113.5 mata pada bulan yang sama tahun sebelumnya. Dari segi bulan ke bulan, IP meningkat sebanyak 1.25 peratus pada April 2026 berbanding bulan sebelumnya. Sementara itu, trend jangka panjang terlicin IP pada April 2026 kekal berada di bawah paras 100.0 mata, mengisytiharkan penyederhanaan momentum pertumbuhan berikutan ketidakpastian global, termasuk tekanan inflasi yang berterusan. Walau bagaimanapun, aktiviti pelaburan yang berterusan serta permintaan terus terhadap teknologi digital dan pusat data dijangka akan menjadi pemangkin kepada pertumbuhan ekonomi negara.

Sementara itu, prestasi perdagangan luar negeri Malaysia menunjukkan pertumbuhan yang lebih sederhana pada Mei 2026, berbanding pertumbuhan kukuh dua digit yang direkodkan pada bulan sebelumnya. Eksport meningkat sebanyak 0.4 peratus (April 2026: 23.2%), manakala import menurun 6.8 peratus setelah mencatatkan pertumbuhan 23.9 peratus pada April 2026.

2 PENDUDUK BEKERJA

Bilangan penduduk bekerja pada Mei 2026 terus bertambah pada kadar yang sederhana

Bilangan **penduduk bekerja** pada Mei 2026 terus bertambah pada kadar sederhana, meningkat sebanyak **0.1 peratus (+9.0 ribu orang)** kepada **16.82 juta orang** berbanding bulan sebelumnya (April 2026: 16.82 juta orang). Berdasarkan anggaran pelarasan bermusim, bilangan penduduk bekerja merekodkan peningkatan kecil 0.04 peratus bulan ke bulan.

Dari perspektif sektor ekonomi, sektor Perkhidmatan terus menjadi penyumbang utama kepada jumlah guna tenaga pada bulan tersebut, dengan aktiviti Perdagangan borong dan runcit; aktiviti Penginapan dan perkhidmatan makanan & minuman; serta Maklumat & komunikasi meliputi sumbangan terbesar dalam guna tenaga. Sektor utama lain, termasuk Pembuatan, Pembinaan, Pertanian, serta Perlombongan & pengkuarian, turut mencatatkan peningkatan dalam bilangan penduduk bekerja pada Mei 2026.

Nisbah guna tenaga kepada penduduk, yang menunjukkan keupayaan sesebuah ekonomi untuk mewujudkan pekerjaan, kekal tidak berubah iaitu **68.8 peratus** pada Mei 2026, sama seperti pada bulan sebelumnya [Paparan 1].

Paparan 1: Penduduk bekerja dan nisbah guna tenaga kepada penduduk, April dan Mei 2026

Pekerja kekal sebagai kategori guna tenaga terbesar, merangkumi **75.0 peratus** daripada jumlah penduduk bekerja pada Mei 2026. Bilangan pekerja meningkat sebanyak **0.04 peratus (+5.1 ribu orang)** kepada **12.61 juta orang** (April 2026: 12.61 juta orang). Sementara, bilangan **penduduk bekerja sendiri** meningkat **0.1 peratus (+3.2 ribu orang)** kepada **3.15 juta orang** (April 2026: 3.15 juta orang). Kumpulan ini terdiri daripada individu yang berpendapatan harian yang terlibat dengan aktiviti berskala kecil seperti peruncit, penjaja, peniaga pasar dan gerai, serta pekebun kecil [Carta 1].

Carta 1: Penduduk bekerja mengikut taraf pekerjaan, April dan Mei 2026

Pada masa yang sama, bilangan **penduduk bekerja yang tidak bekerja buat sementara waktu** pada Mei 2026 meningkat sebanyak **3.6 peratus (+3.2 ribu orang)** kepada **93.7 ribu orang** (April 2026: 90.5 ribu orang). Kumpulan ini merangkumi individu yang tidak bekerja buat sementara waktu tetapi tidak diklasifikasikan sebagai penganggur, kerana mereka masih mempunyai pekerjaan untuk kembali bekerja.

3 PENGANGGURAN

Kadar pengangguran Mei kekal pada 3.0 peratus

Bilangan **penganggur** pada Mei 2026 meningkat sedikit kepada **513.4 ribu orang**, dengan pertambahan **0.3 peratus (+1.6 ribu orang)** daripada 511.8 ribu orang pada April 2026. **Kadar pengangguran** Mei kekal pada **3.0 peratus**, tidak berubah berbanding kadar yang direkodkan pada bulan sebelumnya. Berdasarkan terma pelarasan bermusim, bilangan penganggur juga merekodkan peningkatan 0.3 peratus, sekali gus mencatatkan kadar pengangguran 3.0 peratus [Paparan 2].

Paparan 2: Pengangguran, April dan Mei 2026

Mengikut kategori pengangguran, **79.5 peratus** daripada jumlah penganggur pada Mei 2026 adalah mereka yang sedang aktif mencari pekerjaan, atau **penganggur aktif**. Kategori ini naik **0.2 peratus (+0.9 ribu orang)** kepada **408.0 ribu orang** (April 2026: 407.1 ribu orang). Dalam kalangan penganggur aktif, **63.9 peratus** merupakan mereka yang **menganggur kurang daripada tiga bulan**, manakala mereka yang telah **menganggur melebihi setahun**⁶ merangkumi **5.0 peratus**.

Pada masa yang sama, mereka yang percaya bahawa tiada pekerjaan tersedia, atau **penganggur tidak aktif**, turut mencatatkan peningkatan, naik **0.7 peratus (+0.8 ribu orang)** kepada **105.5 ribu orang** berbanding 104.7 ribu orang pada April 2026 [Carta 2].

⁶ Merujuk kepada orang yang menganggur selama setahun atau lebih (Sumber: KILM: Long-term unemployment)
https://www.ilo.org/wcmsp5/groups/public/---dgreports/---stat/documents/publication/wcms_422451.pdf

Carta 2: Kategori penganggur dan tempoh menganggur bagi penganggur aktif, April dan Mei 2026

Kadar pengangguran bagi belia berumur **15 hingga 24 tahun** kekal pada **10.2 peratus**, dengan bilangan penganggur belia berjumlah **291.6 ribu orang** pada Mei 2026 (April 2026: 290.8 ribu orang). Begitu juga, kadar pengangguran dalam kalangan belia berumur **15 hingga 30 tahun** tidak berubah pada **6.3 peratus**, mencatatkan seramai **396.0 ribu penganggur belia** (April 2026: 394.7 ribu orang) [Carta 3].

Carta 3: Bilangan penganggur dan kadar pengangguran mengikut kumpulan umur terpilih, April dan Mei 2026

4 TENAGA BURUH

KPTB bagi Mei 2026 kekal tidak berubah pada 70.9 peratus

Pada Mei 2026, **tenaga buruh** terus mencatatkan peningkatan, bertambah sebanyak **0.1 peratus (+10.6 ribu orang)** kepada **17.34 juta orang** (April 2026: 17.33 juta orang). Sementara itu, **kadar penyertaan tenaga buruh (KPTB)** kekal tidak berubah pada **70.9 peratus**, sama seperti pada bulan April yang lalu. Berdasarkan pelarasan bermusim, tenaga buruh merekodkan sedikit peningkatan bulan-ke-bulan sebanyak 0.03 peratus, manakala KPTB kekal berada pada paras 70.9 peratus [Paparan 3].

Paparan 3: Tenaga buruh dan KPTB, April dan Mei 2026

Mengikut jantina, kedua-dua tenaga buruh lelaki dan perempuan merekodkan sedikit peningkatan pada Mei 2026. **Tenaga buruh lelaki** naik kepada **10.79 juta orang** (April 2026: 10.78 juta orang), manakala **tenaga buruh perempuan** bertambah sedikit kepada **6.55 juta orang** (April 2026: 6.55 juta orang).

Sementara itu, kadar penyertaan tenaga buruh (KPTB) bagi kedua-dua jantina kekal tidak berubah daripada April 2026, dengan **KPTB lelaki** kekal pada paras **82.9 peratus**, manakala **KPTB perempuan** pada **57.3 peratus** [Paparan 4].

Paparan 4: Tenaga buruh dan KPTB mengikut jantina, April dan Mei 2026

5 LUAR TENAGA BURUH

Komponen terbesar luar tenaga buruh adalah kerja rumah/tanggungjawab keluarga

Bilangan penduduk di **luar tenaga buruh** pada Mei 2026 merekodkan peningkatan marginal **0.04 peratus (+2.6 ribu orang)** kepada **7.10 juta orang** (April 2026: 7.10 juta orang). Komponen terbesar luar tenaga buruh adalah **kerja rumah/tanggungjawab keluarga**, merangkumi **43.3 peratus**, diikuti oleh kategori **bersekolah/latihan** yang meliputi **40.5 peratus** [Carta 4].

Carta 4: Peratus sumbangan luar tenaga buruh mengikut sebab tidak mencari pekerjaan, April dan Mei 2026

6 MENUJU KE HADAPAN

Pasaran buruh Malaysia dijangka terus kekal berdaya tahan dalam tempoh beberapa bulan akan datang, disokong oleh keadaan ekonomi domestik yang menggalakkan, aktiviti pelaburan yang berterusan serta kemajuan transformasi struktur ekonomi negara

Persekitaran ekonomi global dijangka terus berdepan ketidaktentuan dalam tempoh terdekat berikutan konflik geopolitik yang berlanjutan, ketegangan perdagangan antarabangsa serta turun naik harga tenaga dunia. Walaupun tekanan inflasi di kebanyakan negara menunjukkan tanda-tanda semakin mereda, risiko yang berkaitan dengan gangguan bekalan tenaga, perubahan harga komoditi dan kelembapan pertumbuhan ekonomi global dijangka terus mempengaruhi keyakinan pelabur serta prospek perdagangan antarabangsa. Situasi ini dijangka akan terus menjadi cabaran utama kepada ekonomi yang bergantung kepada sektor perdagangan dan permintaan luar⁷.

Di sebalik ketidaktentuan persekitaran global, ekonomi Malaysia dijangka kekal berdaya tahan dan mampu meneruskan pertumbuhan yang mampan. Keadaan ini didorong oleh permintaan domestik yang kukuh, pelaburan yang terus berkembang serta prestasi positif dalam pelbagai sektor ekonomi utama. Struktur ekonomi negara yang lebih pelbagai, disokong oleh pelaksanaan projek pembangunan strategik dan peningkatan pelaburan dalam industri bernilai tambah tinggi, dijangka akan terus menyokong pertumbuhan ekonomi domestik. Faktor-faktor ini dijangka membantu mengurangkan sebahagian daripada kesan kelembapan ekonomi global sekali gus mengekalkan prospek pertumbuhan negara pada landasan yang positif dalam tempoh terdekat⁸.

Indikator ekonomi semasa turut memperkukuh keyakinan terhadap daya tahan ekonomi negara. Keluaran Dalam Negeri Kasar (KDNK) Malaysia berkembang sebanyak 5.4 peratus pada suku pertama 2026, melepasi jangkaan awalan, didorong oleh pertumbuhan yang lebih menyeluruh dalam sektor Perkhidmatan, Pembuatan dan Pembinaan. Kedudukan pasaran buruh yang stabil terus menyokong perbelanjaan isi rumah, manakala aktiviti pelaburan swasta kekal rancak hasil keyakinan pelabur, peluasan kapasiti pengeluaran serta pelaksanaan projek pembangunan utama. Secara

⁷ <https://www.reuters.com/business/outgoing-imf-chief-economist-sees-risks-shifting-trade-ties-continued-2026-06-26/>

⁸ <https://www.bnm.gov.my/-/monetary-policy-statement-07052026>

keseluruhannya, perkembangan ini menunjukkan bahawa asas ekonomi domestik kekal kukuh untuk menyokong pertumbuhan ekonomi sehingga separuh kedua tahun ini⁹.

Dalam tempoh yang akan datang, pelaburan dijangka terus menjadi antara pemacu utama kepada pertumbuhan ekonomi negara. Pengembangan industri elektrik dan elektronik (E&E), pembuatan semikonduktor, perkhidmatan digital, kecerdasan buatan (AI), pengkomputeran awan serta pembangunan pusat data dijangka akan terus meningkatkan daya saing Malaysia dalam rantai bekalan serantau sambil mewujudkan peluang baharu untuk pengembangan perniagaan. Pada masa yang sama, pelaksanaan pelan induk kebangsaan dan inisiatif pelaburan strategik dijangka mewujudkan kesan limpahan yang lebih luas kepada industri sokongan, seterusnya merangsang aktiviti ekonomi domestik dalam jangka sederhana¹⁰.

Namun begitu, konflik geopolitik yang semakin memuncak di Asia Barat dijangka terus mempengaruhi kestabilan pasaran tenaga global. Gangguan berterusan terhadap rantai bekalan tenaga serta peningkatan harga minyak mentah dan gas asli telah menyebabkan kos pengangkutan, logistik dan pengeluaran meningkat merentasi pelbagai ekonomi¹¹. Sekiranya keadaan ini berlanjutan, tekanan kos yang dihadapi oleh sektor perniagaan dijangka semakin ketara dan berpotensi mempengaruhi keputusan pelaburan, kapasiti pengeluaran serta prestasi operasi syarikat sepanjang baki tahun 2026.

Bagi Malaysia, kesan daripada perkembangan tersebut dijangka berbeza mengikut industri. Sebagai pengeksport bersih minyak mentah dan gas asli cecair (LNG), peningkatan harga tenaga berpotensi menyumbang kepada pertumbuhan hasil eksport negara. Namun begitu, industri yang bergantung kepada penggunaan tenaga yang tinggi, bahan mentah import serta rangkaian logistik antarabangsa dijangka berdepan peningkatan kos operasi dan margin keuntungan yang lebih kecil. Oleh itu, syarikat mungkin memberi penekanan yang lebih besar kepada meningkatkan kecekapan operasi, mempercepatkan pelaburan meningkatkan produktiviti dan mengoptimumkan penggunaan sumber sebagai tindak balas kepada persekitaran kos yang lebih mencabar. Walaupun pelarasan ini tidak mungkin mengubah trajektori pertumbuhan keseluruhan Malaysia dengan ketara, ia mungkin menyumbang kepada prestasi perniagaan dan sentimen pelaburan yang berbeza merentas sektor ekonomi pada bulan-bulan akan datang¹².

Sejajar dengan asas ekonomi yang kekal kukuh, kedudukan pasaran buruh Malaysia dijangka kekal menggalakkan dalam beberapa bulan akan datang, walaupun kadar pertumbuhan guna tenaga dijangka kembali kepada tahap yang lebih sederhana. Dalam persekitaran ekonomi yang semakin mencabar, majikan dijangka mengambil pendekatan yang lebih berhati-hati dalam membuat keputusan pengambilan pekerja dengan memberi tumpuan kepada keperluan perniagaan, peningkatan produktiviti dan penggunaan teknologi. Walau bagaimanapun, permintaan domestik yang kekal kukuh serta aktiviti pelaburan yang berterusan dijangka akan terus menyokong permintaan terhadap tenaga buruh di kebanyakan sektor ekonomi.

Selain itu, transformasi struktur ekonomi negara dijangka terus mempengaruhi corak permintaan terhadap tenaga kerja. Peningkatan penggunaan automasi, pendigitalan dan kecerdasan buatan (AI) yang semakin meluas dijangka akan mempercepatkan peralihan kepada pekerjaan yang berasaskan pengetahuan dan kemahiran tinggi, di samping mengurangkan kebergantungan terhadap pekerjaan rutin dan berkemahiran rendah dalam beberapa industri tertentu¹³. Berikutan perniagaan terus mengutamakan inovasi dan kecekapan operasi, keperluan tenaga kerja dijangka berkembang selaras dengan perubahan proses pengeluaran dan kemajuan teknologi.

⁹ <https://www.bharian.com.my/bisnes/lain-lain/2026/05/1555487/ekonomi-berkembang-54-peratus-pada-suku-pertama-atas-anggaran-awal>

¹⁰ <https://www.bharian.com.my/berita/nasional/2026/06/1568965/selepas-100-hari-konflik-asia-barat-terus-mengancam-bekalan-dunia>

¹¹ <https://www.mida.gov.my/announcement-media-release/announcement-media-release/>

¹² <https://www.bnm.gov.my/-/gdp1q26pr>

¹³ <https://www.nimp2030.gov.my/>

Tambahan pula, usaha memperkukuh pembangunan modal insan akan terus menjadi keutamaan bagi memastikan penawaran tenaga buruh selari dengan perubahan struktur ekonomi. Pelaksanaan inisiatif Pendidikan dan Latihan Teknikal dan Vokasional (TVET), program peningkatan kemahiran (*upskilling*) dan latihan semula (*reskilling*), serta kerjasama yang lebih erat antara institusi pendidikan dan industri dijangka memainkan peranan penting dalam meningkatkan kebolehpasaran tenaga kerja¹⁴. Langkah-langkah ini bukan sahaja dapat memenuhi keperluan industri yang semakin kompleks, malah turut memperkukuh daya saing Malaysia dalam menarik pelaburan berkualiti tinggi.

Secara keseluruhannya, pasaran buruh Malaysia dijangka terus kekal berdaya tahan dalam tempoh beberapa bulan akan datang, disokong oleh keadaan ekonomi domestik yang menggalakkan, aktiviti pelaburan yang berterusan serta kemajuan transformasi struktur ekonomi negara. Walaupun ketidaktentuan luaran berpotensi mempengaruhi aktiviti pengambilan pekerja dalam industri tertentu, kedudukan pasaran buruh secara keseluruhannya dijangka terus stabil. Usaha berterusan untuk meningkatkan produktiviti buruh, memperkukuh pengadaptasian tenaga kerja serta mempertingkatkan padanan antara penawaran buruh dengan permintaan industri akan terus menjadi faktor penting dalam mengekalkan peluang pekerjaan yang berkualiti dan menyokong pertumbuhan ekonomi jangka panjang.

¹⁴ https://www.miti.gov.my/miti/resources/NSS_141024.pdf

KEY REVIEWS

- The number of **employed persons** in May 2026 continued to expand at a moderate pace, increasing by **0.1 per cent (+9.0 thousand persons)** to **16.82 million persons**, from the previous month (April 2026: 16.82 million persons). The **employment-to-population ratio**, which indicates an economy's capacity to create jobs, remained unchanged at **68.8 per cent** in May 2026, the same as in the previous month.
- From a sectoral perspective, the Services sector continued to be the main contributor to total employment in the current month, with Wholesale & retail trade; Accommodation and Food & beverage service activities; and Information & communication activities accounting for the largest share of the employment. Other major sectors, including the Manufacturing, Construction, Agriculture, and Mining & Quarrying, also registered increases in the number of employed persons in May 2026.
- The **employees'** remained as the largest employment category, accounting for **75.0 per cent** from the total employed persons in May 2026. The number of employees' edged up by **0.04 per cent (+5.1 thousand persons)** to **12.61 million persons** (April 2026: 12.61 million persons). Meanwhile, the number of **own-account workers** increased by **0.1 per cent (+3.2 thousand persons)** to **3.15 million persons** (April 2026: 3.15 million persons).
- The number of **unemployed persons** in May 2026 rose slightly to **513.4 thousand persons**, with an addition of **0.3 per cent (+1.6 thousand persons)** from 511.8 thousand persons in April 2026. May's **unemployment rate** stood at **3.0 per cent**, unchanged from the rate recorded in the preceding month.
- In May 2026, the **labour force** continued its upward trend, expanding by **0.1 per cent (+10.6 thousand persons)** to **17.34 million persons** (April 2026: 17.33 million persons). Meanwhile, the **labour force participation rate (LFPR)** remained unchanged at **70.9 per cent**, the same as in April last month.
- The number of persons **outside the labour force** in May 2026 recorded a marginal increase of **0.04 per cent (+2.6 thousand persons)** to **7.10 million persons** (April 2026: 7.10 million persons). The largest component of the outside labour force was **housework/family responsibilities**, accounting for **43.3 per cent**, followed by the **schooling/training** category which constituted **40.5 per cent**.
- Malaysia's labour market is expected to remain resilient in the coming months, supported by favourable domestic economic conditions, sustained investment activity and ongoing structural transformation. Despite external uncertainties that may affect hiring activities in some industries, overall labour market stability is expected to be sustained. Continued efforts to enhance labour productivity, strengthen workforce adaptability and better align labour supply with industry demand will be essential in sustaining quality employment and supporting long-term economic growth.

1 INTRODUCTION

MALAYSIA'S LABOUR FORCE CONTINUED TO RECORD MODERATE GROWTH IN MAY 2026, IN LINE WITH THE ONGOING TRANSFORMATION TOWARDS A HIGH-TECHNOLOGY AND SKILLS-BASED INDUSTRIAL STRUCTURE

Malaysia's labour market continued to expand in May 2026, in line with the country's positive economic performance, despite a challenging global environment. Economic momentum was supported by robust external trade activity, with Malaysia recording a total of trade value exceeding RM1 trillion during the first four months of 2026¹. This achievement reflects the strengthening of the trade and industrial sectors, which continued to underpin economic growth and sustain labour demand.

In this context, inflows of foreign direct investment (FDI) into high-technology sectors, the digital economy, and high value-added industries, such as semiconductors and green technology, continued to support the strengthening of a technology-driven economic structure². These investments enhanced industrial production capacity while fostering the development of industrial ecosystems and technology-based value chains. Furthermore, FDI inflows contributed to the creation of high-skilled employment opportunities, particularly in technology manufacturing and digital-related industries, which require a highly skilled and knowledge-based workforce³.

From the labour supply perspective, efforts to enhance skills and improve labour employability continued to gain momentum, including among participants in the gig economy⁴. These initiatives supported the development of a skills-based employment ecosystem while expanding access to skilled job opportunities in the labour market⁵. Overall, these developments reflect the resilience of Malaysia's labour force, which continued to record moderate growth during the month, in line with the ongoing transformation towards a high-technology and skills-based industrial structure.

Moreover, Malaysia's near-term economic outlook remained optimistic, as indicated by the Leading Index (LI), which increased by 1.29 per cent to 115.0 points in April 2026 compared with 113.5 points in the same month of the previous year. On a month-on-month basis, the LI rose by 1.25 per cent in April 2026 relative to the preceding month. In the meantime, the smoothed long-term trend of the LI in April 2026 remained below the 100.0 point, signalling a moderation in growth momentum amid global uncertainties, including persistent inflationary pressures. Nevertheless, continued investment activities and sustained demand associated with digital technology and data centres are expected to remain catalysts for the country's economic growth.

Meanwhile, Malaysia's external trade performance moderated in May 2026, compared with the strong double-digit growth recorded in the previous month. Exports increased by 0.4 per cent (April 2026: 23.2%), while imports decreased by 6.8 per cent following a growth of 23.9 per cent in April 2026.

2 EMPLOYED PERSONS

The number of employed persons in May 2026 continued to expand at a moderate pace

The number of **employed persons** in May 2026 continued to expand at a moderate pace, increasing by **0.1 per cent (+9.0 thousand persons)** to **16.82 million persons**, from the previous month

(April 2026: 16.82 million persons). On a seasonally adjusted estimates, the number of employed persons recorded a slight month-on-month increase of 0.04 per cent.

From a sectoral perspective, the Services sector continued to be the main contributor to total employment in the current month, with Wholesale & retail trade; Accommodation and Food & beverage service activities; and Information & communication activities accounting for the largest share of the employment. Other major sectors, including the Manufacturing, Construction, Agriculture, and Mining & Quarrying, also registered increases in the number of employed persons in May 2026.

The **employment-to-population ratio**, which indicates an economy's capacity to create jobs, remained unchanged at **68.8 per cent** in May 2026, the same as in the previous month **[Exhibit 1]**.

Exhibit 1: Employed persons and employment-to-population ratio, April and May 2026

The **employees'** remained as the largest employment category, accounting for **75.0 per cent** from the total employed persons in May 2026. The number of employees' edged up by **0.04 per cent (+5.1 thousand persons)** to **12.61 million persons** (April 2026: 12.61 million persons). Meanwhile, the number of **own-account workers** increased by **0.1 per cent (+3.2 thousand persons)** to **3.15 million persons** (April 2026: 3.15 million persons). This group consist of daily income earners engaged in small-scale activities such as retailers, hawkers, market and stall vendors, and smallholders **[Chart 1]**.

Chart 1: Employed persons by status in employment, April and May 2026

At the same time, the number of **employed persons who were temporarily not working** in May 2026, rose by **3.6 per cent (+3.2 thousand persons)** to **93.7 thousand persons** (April 2026: 90.5 thousand persons). This group comprises of individuals who were temporarily not working but were not classified as unemployed, as they had jobs to return to.

3 UNEMPLOYMENT

May's unemployment rate stood at 3.0 per cent

The number of **unemployed persons** in May 2026 rose slightly to **513.4 thousand persons**, with an addition of **0.3 per cent (+1.6 thousand persons)** from 511.8 thousand persons in April 2026. May's **unemployment rate** stood at **3.0 per cent**, unchanged from the rate recorded in the preceding month. Based on seasonally adjusted terms, the number of unemployed also recorded an increase of 0.3 per cent, resulting in an unemployment rate of 3.0 per cent [**Exhibit 2**].

Exhibit 2: Unemployed and unemployment rate, April and May 2026

By unemployment category, **79.5 per cent** of the total unemployed persons in May 2026 were those who were actively seeking jobs, or the **actively unemployed**. This category increased by **0.2 per cent (+0.9 thousand persons)** to **408.0 thousand persons** (April 2026: 407.1 thousand persons). Among the actively unemployed, **63.9 per cent** were those who were **unemployed for less than three months**, while those who had been **unemployed for more than a year⁶** comprised **5.0 per cent**.

On the same note, those who believed that no jobs were available, or the **inactively unemployed**, also posted an increase, edged up by **0.7 per cent (+0.8 thousand persons)** to **105.5 thousand persons**, compared to 104.7 thousand persons in April 2026 [**Chart 2**].

⁶ Referring to a person who has been unemployed for one year or longer (Source: KILM: Long-term unemployment)

Chart 2: Unemployed category and duration of unemployment for the actively unemployed, April and May 2026

The youth unemployment rate for those aged **15 to 24 years** stood at **10.2 per cent**, with the number of unemployed youths totalling **291.6 thousand persons** in May 2026 (April 2026: 290.8 thousand persons). Likewise, the unemployment rate among youth aged **15 to 30 years** was unchanged at **6.3 per cent**, registering **396.0 thousand unemployed youths** (April 2026: 394.7 thousand persons) [Chart 3].

Chart 3: The number of unemployed persons and unemployment rate by selected age groups, April and May 2026

4 LABOUR FORCE

The LFPR for May 2026 remained unchanged at 70.9 per cent

In May 2026, the **labour force** continued its upward trend, expanding by **0.1 per cent (+10.6 thousand persons)** to **17.34 million persons** (April 2026: 17.33 million persons). Meanwhile, the **labour force participation rate (LFPR)** remained unchanged at **70.9 per cent**, the same as in April last month. On a seasonally adjusted basis, the labour force registered a slight month-on-month increase of 0.03 per cent, while the LFPR stood at 70.9 per cent [Exhibit 3].

Exhibit 3: Labour force and LFPR, April and May 2026

By gender, both the male and female labour force recorded slight increases in May 2026. The **male labour force** edged up to **10.79 million persons** (April 2026: 10.78 million persons), while the **female labour force** rose marginally to **6.55 million persons** (April 2026: 6.55 million persons).

Meanwhile, the LFPR for both genders remained unchanged from April 2026, with the **male LFPR** stood at **82.9 per cent**, while the **female LFPR** at **57.3 per cent** [Exhibit 4].

Exhibit 4: Labour force and LFPR by sex, April and May 2026

5 OUTSIDE LABOUR FORCE

The largest component of the outside labour force was housework/family responsibilities

The number of persons **outside the labour force** in May 2026 recorded a marginal increase of **0.04 per cent (+2.6 thousand persons)** to **7.10 million persons** (April 2026: 7.10 million persons). The largest component of the outside labour force was **housework/family responsibilities**, accounting for **43.3 per cent**, followed by the **schooling/training** category which constituted **40.5 per cent** [Chart 4].

Chart 4: Share of outside labour force by reasons for not seeking work, April and May 2026

6 LOOKING AHEAD

Malaysia's labour market is expected to remain resilient in the coming months, supported by favourable domestic economic conditions, sustained investment activity and ongoing structural transformation

The global economic environment is expected to remain highly fluid in the coming months as geopolitical tensions, persistent trade-related uncertainties and renewed volatility in energy markets continue to influence business confidence and investment decisions worldwide. Although inflationary pressures in most countries are showing signs of abating, changes in commodity prices and slowing global economic growth are expected to continue to affect investor confidence as well as the outlook for international trade. This situation is expected to continue to be a major challenge to economies that are highly dependent on international trade and external demand⁷.

Against this external backdrop, Malaysia's economy is expected to remain relatively well-positioned to sustain its economic expansion, supported by resilient domestic demand, continued investment activity and broad-based growth across key economic sectors. The country's diversified economic structure, together with ongoing infrastructure development and investment in strategic industries, is expected to provide sufficient support to domestic economic growth. These factors are expected to help mitigate some of the impact of the global economic slowdown thereby keeping the country's growth prospects on a positive track in the near term⁸.

Recent economic indicators continue to reflect the resilience of the domestic economy. Malaysia's Gross Domestic Product (GDP) expanded by 5.4 per cent in the first quarter of 2026, exceeding earlier expectations and reflecting sustained growth across the Services, Manufacturing and Construction sectors. Household expenditure remains supported by favourable labour market conditions, while private investment continues to benefit from healthy investor confidence, expansion of productive capacity and the implementation of major development projects. Collectively, these developments suggest that domestic economic fundamentals remain sufficiently robust to sustain growth into the second half of the year⁹.

⁷ <https://www.reuters.com/business/outgoing-imf-chief-economist-sees-risks-shifting-trade-ties-continued-2026-06-26/>

⁸ <https://www.bnm.gov.my/-/monetary-policy-statement-07052026>

⁹ <https://www.bnm.gov.my/-/gdp1q26pr>

Moving forward, investment is expected to remain one of the principal drivers of economic growth. Continued expansion in high value-added industries, including electrical and electronics (E&E), semiconductor manufacturing, digital services, artificial intelligence (AI), cloud computing and data centre development is anticipated to strengthen Malaysia's competitiveness within regional supply chains while creating new opportunities for business expansion. At the same time, the implementation of national master plans and strategic investment initiatives is expected to generate broader spillover effects across supporting industries, reinforcing domestic economic activity over the medium term¹⁰.

Nevertheless, the recent escalation of geopolitical conflicts in the West Asia has heightened uncertainty surrounding global energy markets. Continued disruptions to energy supply routes, coupled with elevated crude oil and natural gas prices, have contributed to higher transportation, logistics and production costs across many economies¹¹. Should these conditions persist, businesses may face increasing cost pressures that could influence investment decisions, production planning and overall operating performance during the remainder of the year.

For Malaysia, the impact of these developments is expected to vary across industries. While firmer energy prices may continue to support export earnings from petroleum and liquefied natural gas (LNG), businesses operating in energy-intensive industries or those that rely heavily on imported intermediate inputs may experience higher production costs and tighter operating margins. Consequently, firms may place greater emphasis on improving operational efficiency, accelerating productivity-enhancing investments and optimising resource utilisation in response to a more challenging cost environment. Although these adjustments are unlikely to significantly alter Malaysia's overall growth trajectory, they may contribute to differing business performance and investment sentiment across economic sectors in the months ahead.

Building on the country's resilient economic fundamentals, labour market conditions are expected to remain favourable in the coming months, although the pace of employment expansion may gradually normalise amid a more challenging external environment. While businesses are likely to remain supportive of workforce growth, hiring decisions are expected to become increasingly measured as employers continue to balance business expansion plans against higher operating costs, evolving market conditions and productivity objectives. Nevertheless, sustained domestic demand and ongoing investment activities are anticipated to provide sufficient support for continued labour demand across most sectors of the economy.

Apart from that, the ongoing transformation of Malaysia's economic structure is expected to further reshape labour demand. The increasing adoption of automation, digital technologies and artificial intelligence (AI) is likely to accelerate the shift towards higher-skilled and knowledge-intensive occupations, while reducing reliance on routine and lower-skilled jobs in selected industries¹². As businesses continue to prioritise innovation and operational efficiency, workforce requirements are expected to evolve in line with changing production processes and technological advancement.

Furthermore, continuous investment in human capital development will remain essential to ensuring that labour supply keeps pace with industry requirements. Efforts to strengthen Technical and Vocational Education and Training (TVET), expand upskilling and reskilling initiatives, and foster closer collaboration between industry and education providers are expected to play an increasingly important role in improving workforce adaptability and supporting productivity-driven economic growth¹³. A skilled and future-ready workforce will also enhance Malaysia's attractiveness as a destination for quality investment while reinforcing long-term labour market resilience.

¹⁰ <https://www.mida.gov.my/announcement-media-release/announcement-media-release/>

¹¹ <https://www.mida.gov.my/announcement-media-release/announcement-media-release/>

¹² <https://www.nimp2030.gov.my/>

¹³ https://www.miti.gov.my/miti/resources/NSS_141024.pdf

Overall, Malaysia's labour market is expected to remain resilient in the coming months, supported by favourable domestic economic conditions, sustained investment activity and ongoing structural transformation. Despite external uncertainties that may affect hiring activities in some industries, overall labour market stability is expected to be sustained. Continued efforts to enhance labour productivity, strengthen workforce adaptability and better align labour supply with industry demand will be essential in sustaining quality employment and supporting long-term economic growth.

Nota/ Notes:

1. Statistik Survei Tenaga Buruh bagi tahun 2019 dan sebelumnya dianggar berdasarkan Banci Penduduk dan Perumahan Malaysia 2010
The Labour Force Survey statistics for 2019 and preceding years are estimated based on the Population and Housing Census of Malaysia 2010

2. Statistik Survei Tenaga Buruh bagi tahun 2020 dan seterusnya dianggar berdasarkan data Banci Penduduk dan Perumahan Malaysia 2020
The Labour Force Survey statistics for 2020 and onwards are estimated based on the Population and Housing Census of Malaysia 2020

3. ¹Bagi 1982 - 2000, industri dikelaskan mengikut "Buku Penjenisan Perusahaan Malaysia (Dikemaskini) 1972" seperti berikut:
¹For 1982 - 2000, industry was classified according to the "Malaysia Industrial Classification, (Updated) 1972" as follows:

A: Pertanian, perhutanan, penternakan dan perikanan/ Agriculture, forestry, livestock and fishing
B: Perlombongan dan kuari/ Mining and quarrying
C: Pembuatan/ Manufacturing
D: Elektrik, gas dan air/ Electricity, gas and water
E: Pembinaan/ Construction
F: Perdagangan borong dan runcit, restoran dan hotel/ Wholesale and retail trade, restaurants and hotels
G: Pengangkutan, penyimpanan dan perhubungan/ Transport, storage and communications
H: Perkhidmatan kewangan, insurans, hartanah dan perniagaan/ Finance, insurance, real estate and business services
I: Perkhidmatan masyarakat, sosial dan persendirian/ Community, social and personal services

4. ²Bagi 2001 - 2009, industri dikelaskan mengikut "Piawaian Klasifikasi Industri Malaysia (MSIC) 2000" seperti berikut:
²For 2001 - 2009, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2000" as follows:

A: Pertanian, pemburuan dan perhutanan/ Agriculture, hunting and forestry
B: Perikanan/ Fishing
C: Perlombongan dan kuari/ Mining and quarrying
D: Pembuatan/ Manufacturing
E: Bekalan elektrik, gas dan air/ Electricity, gas and water supply
F: Pembinaan/ Construction
G: Perdagangan borong dan runcit; pembaikan kenderaan bermotor, motosikal dan barangan persendirian dan isi rumah/ Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H: Hotel dan restoran/ Hotels and restaurants
I: Pengangkutan, penyimpanan dan komunikasi/ Transport, storage and communications
J: Pengantaraan kewangan/ Financial intermediation
K: Aktiviti hartanah, penyewaan dan perniagaan/ Real estate, renting and business activities
L: Pentadbiran awam dan pertahanan; keselamatan sosial wajib/ Public administration and defence; compulsory social security
M: Pendidikan/ Education
N: Kesihatan dan kerja sosial/ Health and social work
O: Aktiviti perkhidmatan komuniti, sosial dan persendirian lain/ Other community, social and personal service activities
P: Isi rumah persendirian dengan pekerja bergaji/ Private households with employed persons

5. ³Bagi 2010 - 2022, industri dikelaskan mengikut "Piawaian Klasifikasi Industri Malaysia (MSIC) 2008" seperti berikut:
³For 2010 - 2022, industry was classified according to the "Malaysia Standard Industrial Classification (MSIC) 2008" as follows:

A: Pertanian, perhutanan dan perikanan/ Agriculture, forestry and fishing
B: Perlombongan dan pengkuari/ Mining and quarrying
C: Pembuatan/ Manufacturing
D: Bekalan elektrik, gas, wap dan pendingin udara/ Electricity, gas, steam and air conditioning supply
E: Bekalan air; pembentungan, pengurusan sisa dan aktiviti pemulihan/ Water supply; sewerage, waste management and remediation activities
F: Pembinaan/ Construction
G:Perdagangan borong dan runcit, pembaikan kenderaan bermotor dan motosikal/ Wholesale and retail trade, repair of motor vehicles and motorcycles
H: Pengangkutan dan penyimpanan/ Transportation and storage
I: Penginapan dan aktiviti perkhidmatan makanan dan minuman/ Accommodation and food service activities
J: Maklumat dan komunikasi/ Information and communication
K: Aktiviti kewangan dan insurans/takaful/ Financial and insurance/takaful activities
L: Aktiviti hartanah/ Real estate activities
M: Aktiviti profesional, saintifik dan teknikal/ Professional, scientific and technical activities
N: Aktiviti pentadbiran dan khidmat sokongan/ Administrative and support service activities
O: Pentadbiran awam dan pertahanan; aktiviti keselamatan sosial wajib/ Public administration and defence; compulsory social security
P: Pendidikan/ Education
Q: Aktiviti kesihatan kemanusiaan dan kerja sosial/ Human health and social work activities
R: Kesenian, hiburan dan rekreasi/ Human health and social work activities
S: Aktiviti perkhidmatan lain/ Others service activities
T: Aktiviti isi rumah sebagai majikan/ Activities of households as employers

6. ⁴Bagi tahun 2011-2019 & 2021-2025, jumlah termasuk 'Aktiviti badan dan pertubuhan luar wilayah'
⁴For year 2011-2019 & 2021-2022, total includes 'Activities of extraterritorial organizations and bodies'

1. Pengenalan

- 1.1 Statistik yang diterbitkan dalam laporan ini adalah berdasarkan Survei Tenaga Buruh (STB) yang dilaksanakan oleh Jabatan Perangkaan Malaysia (DOSM). STB dilaksanakan berdasarkan garis panduan dan syor *International Labour Organization (ILO)* dengan merujuk kepada *Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Methods*.
- 1.2 Survei yang dijalankan setiap bulan melalui pendekatan isi rumah ini menyediakan statistik tenaga buruh, guna tenaga dan pengangguran di peringkat nasional.
- 1.3 Pengumpulan dan prosesan data mengekalkan pendekatan yang menyeluruh dan sistematik dari semasa ke semasa untuk mendapatkan perbandingan statistik siri masa.
- 1.4 Maklumat yang dikumpul melalui STB adalah mengikut peruntukan **Akta Perangkaan 1965 (Disemak 1989)**. **Seksyen 6** dibawah Akta ini mengkehendaki mana-mana individu perlu memberikan butiran maklumat sebenar atau anggaran terbaik kepada DOSM. Sementara itu, **Seksyen 7** dalam Akta yang sama memperuntukan denda kepada responden yang gagal memberi kerjasama dalam pelaksanaan penyiasatan oleh DOSM. Mengikut Akta ini, maklumat terperinci yang dikumpul adalah sulit dan hanya angka agregat diterbitkan.
- 1.5 Nota teknikal ini menyediakan penerangan terperinci mengenai metodologi yang digunakan dalam pelaksanaan STB bagi membantu pengguna untuk memahami dengan lebih mendalam berkaitan maklumat pasaran buruh yang dipungut melalui pendekatan isi rumah.

2. Objektif survei

- 2.1 Objektif utama STB ialah:
 - i. Mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran; dan
 - ii. Menyediakan statistik terkini berkaitan situasi pasaran buruh dari aspek penawaran tenaga buruh
- 2.2 Statistik daripada survei ini digunakan terutamanya oleh kerajaan sebagai input dalam merangka strategi pembangunan negara; begitu juga ahli ekonomi, ahli akademik, sektor swasta dan individu sebagai tujuan penyelidikan dan analisis.

3. Kaedah pengumpulan data

- 3.1 STB menggunakan kaedah temu ramah bersemuka dengan responden. Dalam tempoh survei, penemuramah terlatih melawat isi rumah di tempat kediaman (TK) yang terpilih untuk memperolehi maklumat demografi semua ahli isi rumah dan maklumat terperinci berkaitan butir-butir tenaga buruh bagi ahli isi rumah yang berumur 15 tahun dan lebih.

- 3.2 Semakan kerja luar dibuat untuk mengesan dan memperbaiki kemungkinan maklumat yang salah atau tertinggal semasa penyiasatan ini dijalankan. Di samping itu, isi rumah terpilih juga ditemuramah semula untuk menyemak kualiti operasi pungutan data.
- 3.3 Sebanyak 25 peratus daripada panel ulangan terpilih ditemuramah menggunakan **kaedah Temuramah Melalui Telefon**.

4. Skop dan liputan

- 4.1 STB meliputi kedua-dua kawasan bandar dan luar bandar bagi daerah pentadbiran dalam semua negeri di Malaysia.
- 4.2 Definisi populasi survei meliputi penduduk yang tinggal di TK persendirian dan **tidak termasuk** mereka yang tinggal di TK institusi seperti hotel, asrama, hospital, penjara, rumah tumpangan dan pekerja yang tinggal di rumah kongsi.
- 4.3 Tiada penyelarasan dilakukan kepada penduduk yang tinggal di TK institusi untuk diasingkan daripada anggaran penduduk pertengahan tahun selepas banci walaupun STB tidak meliputi penduduk tersebut. Berdasarkan Banci Penduduk dan Perumahan semasa, penduduk yang tinggal di TK institusi adalah kurang daripada empat peratus daripada jumlah penduduk. Peratusan ini adalah kecil dan tidak mempengaruhi anggaran statistik tenaga buruh.
- 4.4 STB merangkumi penduduk yang aktif dan tidak aktif dalam ekonomi yang berumur **15 hingga 64 tahun**¹. Penduduk yang aktif dalam ekonomi terdiri daripada mereka yang bekerja atau menganggur, manakala mereka yang tidak aktif dikelaskan sebagai di luar tenaga buruh.

5. Rangka dan pensampelan

- 5.1 Rangka yang digunakan bagi pemilihan sampel STB bulanan adalah berdasarkan Rangka Pensampelan Isi Rumah yang terdiri daripada blok penghitungan (BP) yang diwujudkan untuk pelaksanaan Banci Penduduk dan Perumahan 2020 dan dikemas kini dari semasa ke semasa.
- 5.2 BP merupakan suatu kawasan muka bumi yang diwujudkan untuk tujuan pelaksanaan operasi pungutan data yang secara puratanya mengandungi antara 80 hingga 120 TK. Semua BP dibentuk dalam lingkungan sempadan yang diwartakan iaitu di dalam mukim atau kawasan majlis tempatan.
- 5.3 BP dalam rangka pensampelan dikelaskan mengikut kawasan bandar dan luar bandar².

- i. **Kawasan bandar**

Kawasan yang diwartakan serta kawasan tepu bina yang bersempadan dengannya dan gabungan kedua-dua kawasan ini mempunyai penduduk seramai 10,000 orang atau lebih semasa Banci Penduduk dan Perumahan 2020.

1. Had umur bekerja bagi sesebuah negara ditentukan berdasarkan struktur umur penduduk negara tersebut.

2. Taburan Penduduk dan Ciri-Ciri Asas Demografi, Banci Penduduk dan Perumahan 2020.

- **Kawasan tepu bina**

Kawasan yang terletak bersebelahan kawasan yang diwartakan dan mempunyai sekurang-kurangnya 60 peratus penduduk (berumur 15 tahun dan lebih) yang terlibat dalam aktiviti bukan pertanian.

Definisi kawasan bandar juga mengambil kira kawasan pembangunan khusus iaitu kawasan pembangunan yang tidak diwartakan dan boleh dikenal pasti serta terpisah dari kawasan yang diwartakan atau kawasan tepu bina melebihi 5 km dan mempunyai penduduk sekurang-kurangnya 10,000 orang dengan 60 peratus penduduk (berumur 15 tahun dan lebih) terlibat dalam aktiviti bukan pertanian.

- ii. **Kawasan luar bandar**

Kawasan selain yang diwartakan dan mempunyai jumlah penduduk kurang daripada 10,000 orang serta kawasan yang tidak diwartakan.

- 5.4 Pembandaran merupakan proses yang dinamik dan sentiasa berubah mengikut kemajuan dan pembangunan. Oleh itu, kawasan bandar bagi Banci Penduduk dan Perumahan yang dilaksanakan oleh DOSM tidak semestinya merujuk kepada kawasan yang sama kerana kawasan yang memenuhi kriteria bandar akan terus bertambah dan berkembang mengikut masa.

6. Prosedur penganggaran

- 6.1 Anggaran penduduk semasa mengikut ciri-ciri kumpulan umur, jantina, kewarganegaraan, etnik dan negeri digunakan sebagai penanda aras dalam penyediaan statistik tenaga buruh melalui **kaedah anggaran nisbah bergabung** iaitu *adjusted weight* dan faktor penduduk.

- i. ***Adjusted weight***

Adjusted weight digunakan bagi mengambil kira kes tidak respons.

- ii. **Faktor penduduk**

Dalam reka bentuk pensampelan berperingkat, saiz sampel adalah pembolehubah rawak dan jumlah agregat yang dianggar daripada survei boleh menghasilkan ralat pensampelan yang tinggi. Wajaran *external* digunakan untuk memberikan ralat pensampelan yang minimum. Wajaran *external* yang digunakan dalam Survei Tenaga Buruh ialah faktor penduduk. Faktor penduduk diperolehi melalui anggaran terkini jumlah penduduk yang mana ia digunakan untuk mengubahsuai kadar dan nisbah yang dianggarkan daripada survei.

- 6.2 Dua jenis statistik penduduk disediakan oleh DOSM iaitu:

- i. **unjuran penduduk** bagi menunjukkan saiz dan struktur penduduk jangka panjang berasaskan andaian tertentu mengenai trend kesuburan, mortaliti dan migrasi. Statistik ini digunakan sebagai input dalam membuat perancangan dan penggubalan dasar pada masa hadapan.
- ii. **anggaran penduduk** semasa bagi menggambarkan saiz populasi pada masa kini dan disediakan secara tahunan berasaskan data semasa kelahiran, kematian dan migrasi.

- 6.3 STB Bulanan bagi tahun 2026 dianggar menggunakan data unjuran berdasarkan anggaran penduduk semasa berasaskan Banci Penduduk dan Perumahan Malaysia 2020.

Justeru, semakan semula bagi statistik tenaga buruh bulanan bagi tahun 2020 sehingga 2025 perlu dilaksanakan bagi memastikan statistik tenaga buruh yang diterbitkan selari dengan maklumat demografi dan sosio-ekonomi semasa penduduk Malaysia.

Sehubungan dengan itu, pelaksanaan semakan semula STB bulanan akan dilaksanakan secara berperingkat. Pelarasan semula telah dilaksanakan bagi data STB bulanan bagi tahun 2025 bermula dengan data Disember 2025 berdasarkan anggaran penduduk semasa yang terkini.

1. Introduction

- 1.1 The statistics published in this report is based on the Labour Force Survey (LFS) conducted by Department of Statistics, Malaysia. The implementation of the LFS is based on the guidelines and recommendations of the **International Labour Organization (ILO)** with reference to the **Surveys of Economically Active Population, Employment, Unemployment and Underemployment: An ILO Manual on Concepts and Method**.
- 1.2 The survey is carried out every month through a household approach to provide statistics of labour force, employment and unemployment at the national.
- 1.3 The comprehensive and systematic approach in data collection and processing has been maintained over a period of time in order to obtain comparable time series statistics.
- 1.4 The information obtained from LFS is gathered under the provisions of the **Statistics Act 1965 (Revised 1989)**. **Section 6** of this Act requires any individuals to provide actual information or best estimates to DOSM. Meanwhile, **Section 7** of this Act allows respondents whom refuse to cooperate in the undertaking of the survey to be penalised. The Act stipulated that the detailed information gathered is confidential and only aggregated figures are published.
- 1.5 This technical note comprises of detailed explanation on concepts, definition and methodology used to conduct LFS to assist users to better understand labour market information obtained via household approach.

2. Objectives of the survey

- 2.1 The main objectives of LFS are:
 - i. To collect information on the structure and distribution of labour force, employment and unemployment; and
 - ii. To provide the latest statistics in relation to labour market situation from the perspective of labour supply.
- 2.2 The statistics from this survey is utilised especially by the government as input in planning national developments strategies; as well as by economists, academicians, private sector and individuals for the purpose of research and analysis.

3. Method of data collection

- 3.1 The LFS used the personal interview method. During the survey period, trained interviewers visit households in selected living quarters (LQs) to collect demographic information on all household members and labour force particulars of household members aged 15 years and over.
- 3.2 Field checks are undertaken to identify and correct any possibility of errors or omissions at the time when the survey is conducted. In addition to this, selected households are interviewed again to check the quality of data collection operation.

- 3.3 A total of 25 per cent of the selected repeated panels were interviewed using the **Telephone Interviewing method**.

4. Scope and coverage

- 4.1 The LFS covers both urban and rural areas for all administrative districts within all states in Malaysia.
- 4.2 The survey population is defined to cover persons who live in private LQs; hence **excludes** persons residing in institutional LQs such as hotels, hostels, hospitals, prisons, boarding houses, and workers residing in construction work site.
- 4.3 There is no attempt was made to adjust the exclusion of the population living in institutional LQs from the independent mid-year post census population estimates, although the LFS did not cover that population. Based on the current Population and Housing Census, those living in institutional LQs was less than four per cent of the total population. This percentage was small and did not affect the estimates of labour force statistics.
- 4.4 This survey comprises the economically active and inactive population between the age of **15 to 64 years**¹. The economically active population are those who are either employed or unemployed while those who are inactive are classified as outside labour force.

5. Sampling frame

- 5.1 The frame used for the selection of sample for monthly LFS is based on the Household Sampling Frame which is made up of renumeration blocks (EBs) created for the 2020 Population and Housing Census and was updated from time to time.
- 5.2 EBs are geographically contiguous areas of land with identifiable boundaries created for survey operation purposes, which on average contains about 80 to 120 LQs. All EBs are formed within gazetted boundaries, i.e. within mukim or local authority areas.
- 5.3 The EBs in the sampling frame are also classified into urban and rural areas².

i. Urban areas

Gazetted areas with their adjoining built-up areas with combined population of 10,000 or more at the time of the 2020 Population and Housing Census.

- **Built-up areas**

Areas contiguous to a gazetted area with at least 60 per cent of the population (aged 15 years and over) engaged in non-agricultural activities.

The definition of urban areas also takes into account the special development area namely the development area which is not gazetted and can be identified and separated from the gazetted area or built-up area of more than 5 km with

1. Working age limit for a country is determined based on the age structure of the population of the country.

2. Population Distribution and Basic Demographic Characteristics, 2020 Population and Housing Census.

population of at least 10,000 persons where 60 per cent of the population (aged 15 years and over) were involved in non-agricultural activities.

ii. **Rural areas**

All other gazetted areas with population of less than 10,000 persons and non-gazetted areas.

- 5.4 Urbanisation is a dynamic process and keeps changing in line with progress and development. Thus, the urban areas for the Population and Housing Census conducted by DOSM do not necessarily refer to the same areas, as areas fulfilling the criteria of urban continue to increase or grow with time.

6. **Estimation Procedures**

- 6.1 Current population estimates by age group, sex, citizenship, ethnicity and state were used as the benchmark to produce labour statistics through **combined ratio estimated method** which are adjusted weight and population factor.

i. **Adjusted weight**

Adjusted weight is used to take into account the non-response cases.

ii. **Population factor**

In multi-stage sampling design, the sample size is a random variable and aggregates directly estimated from the survey can have large sampling errors. External weight is used to minimise sampling error. The external weight used in Labour Force Survey is the population factor. The population factor is obtained through up-to-date estimates of population totals which is used to inflate the various rates and ratios estimated from the survey.

- 6.2 Two types of population statistics produced by DOSM are:

- i. **population projection** to indicate the size and structure of the population in the long term based on certain assumption on the trend of fertility, mortality and migration. These statistics are used as input to formulate future plans and policies.
- ii. **current population** estimates to illustrate the size of the current population and is prepared annually based on the recent data on birth, death and migration.

- 6.3 The monthly LFS statistics for 2026 statistics are estimated using the current population estimates based on the Population and Housing Census of Malaysia 2020.

Therefore, rebasing of the monthly labour force statistics for 2020 until 2025 needs to be implemented to ensure that the published labour force statistics are in line with the current demographic and socio-economic information of the Malaysian population.

In this regard, the implementation of the revision of monthly LFS statistics will be implemented in stages. The revisions are carried out on the monthly LFS data for 2025, beginning with the December 2025 data based on the latest current population estimates.
