Balance of Payments

Suku Tahun Pertama | First Quarter

NOTA TEKNIKAL | TECHNICAL NOTES

A. PENGENALAN

Statistik Imbangan Pembayaran Malaysia mengukur transaksi ekonomi antarabangsa antara Malaysia dan negara-negara lain di dunia dari segi magnitud dan jenis transaksi dalam akaun semasa, akaun modal dan akaun kewangan. Penyusunan ini selaras dengan metodologi yang ditetapkan dalam Manual Imbangan Pembayaran dan Kedudukan Pelaburan Antarabangsa Edisi Keenam (BPM6) oleh Tabung Kewangan Antarabangsa (IMF).

B. KONSEP DAN LIPUTAN

1. Residen

Residen ialah:

- orang yang tinggal atau menetap di Malaysia bagi tempoh sekurang-kurangnya satu tahun; dan
- syarikat atau institusi yang berada/beroperasi di Malaysia di mana kepentingan ekonominya berpusat di Malaysia.

Satu unit institusi dikatakan mempunyai pusat kepentingan di wilayah ekonomi di sebuah negara apabila wujudnya lokasi seperti bangunan, tempat pengeluaran atau premis lain di mana atau dari mana unit tersebut mengusahakan atau bercadang untuk terus mengusahakan, sama ada untuk tempoh selama-lamanya atau tempoh yang panjang, di dalam aktiviti ekonomi dan dengan skala urusniaga yang signifikan.

Bukan residen merujuk kepada individu, syarikat atau institusi yang tinggal, atau berada/beroperasi di negara luar Malaysia.

Status residen perwakilan kerajaan asing, organisasi antarabangsa, pelajar asing dan pesakit asing, adalah seperti berikut:

- perwakilan kerajaan asing (kedutaan, konsulat, pangkalan ketenteraan, kerajaan asing) di Malaysia dianggap sebagai pihak luar-wilayah dan dengan itu dianggap sebagai bukan-residen;
- perwakilan kerajaan Malaysia di luar negeri dianggap sebagai residen Malaysia;
- organisasi antarabangsa tidak dianggap sebagai residen bagi mananya ekonomi/negara; dan
- pelajar asing dan pesakit asing dianggap sebagai residen negara asal mereka.

2. Sistem Catatan Beregu

Sistem ini berdasarkan prinsip perakaunan yang diterima di peringkat antarabangsa bagi merekodkan dua kemasukan yang sama bagi setiap urusniaga. Kemasukan kredit untuk merekodkan eksport barang dan perkhidmatan, pendapatan diterima dan urusniaga kewangan yang melibatkan pengurangan dalam aset kewangan atau meningkatkan liabiliti. Sebaliknya, kemasukan debit adalah digunakan untuk merekodkan import barang dan perkhidmatan, pendapatan yang akan dibayar dan urusniaga kewangan yang melibatkan peningkatan dalam aset atau pengurangan dalam liabiliti.

3. Konsep Pemilikan

Konsep pertukaran pemilikan ekonomi di antara residen dan bukan residen digunakan dalam pengiktirafan transaksi BOP terutamanya bagi akaun barang dan aset kewangan. Perubahan pemilikan dari sudut ekonomi bermaksud semua risiko, ganjaran, hak dan tanggungjawab pemilikan dipindahkan.

4. Akaun Semasa

Ia mengukur peruntukan bersih sumber sebenar iaitu barang, perkhidmatan, pendapatan primer dan sekunder kepada atau daripada seluruh dunia. Lebihan dalam akaun berlaku apabila pendapatan melebihi perbelanjaan, manakala defisit berlaku jika ia sebaliknya. Defisit dalam akaun semasa mungkin dibiayai oleh aliran masuk pelaburan asing atau pinjaman luar negara atau penggunaan dalam aset rizab.

i. Barang

Transaksi barang meliputi import dan eksport di mana pertukaran hak milik ekonomi di antara residen dan bukan-residen. Ia terdiri daripada barang dagangan am mengikut asas BOP, eksport bersih barang di bawah *merchanting* dan emas bukan monetari.

Barangan dinilai berdasarkan harga pasaran. Secara amnya, nilai pasaran yang dilaporkan oleh pengeksport dan pengimport (untuk perangkaan perdagangan barangan) adalah diukur seperti berikut:

- Eksport f.o.b. merujuk kepada nilai barangan di pasaran di sempadan kastam, termasuk semua kos pengangkutan barangan ke sempadan kastam, eksport dan duti lain yang perlu dibayar, dan juga kos pemunggahan ke atas kenderaan pengangkutan.
- Import c.i.f. merujuk kepada nilai barangan di pasaran di sempadan kastam, termasuk semua caj pengangkutan dan insurans ketika dalam perjalanan tidak termasuk kos pemunggahan daripada kapal, pesawat udara atau kenderaan.
- Bagi penyusunan BOP, kedua-dua eksport dan import dinilai pada f.o.b.

Nilai barangan yang diperoleh daripada pengisytiharan kastam (perangkaan perdagangan barangan) diselaraskan untuk liputan merangkumi urusniaga pesawat udara dan kapal komersial yang dihantar ke luar Malaysia dan eksport/import air ke/dari Singapura.

Sementara itu, item-item yang dikecualikan daripada barang am disebabkan tiada pertukaran hak milik adalah:

- barang untuk prosesan pemasangan, pembungkusan atau pelabelan (GFP);
- barang eksport/import untuk penyimpanan sementara;
- barang untuk pembaikan; dan
- barang yang dikembalikan.

Merchanting ditakrifkan sebagai pembelian barang oleh residen daripada bukan-residen dan menjual semula kepada bukan-residen lain tanpa barang tersebut perlu memasuki Malaysia. Perbezaan antara nilai pembelian dan jualan semula barang direkodkan sebagai eksport bersih barang di bawah *merchanting*.

ii. Perkhidmatan

a. Perkhidmatan Pembuatan Bagi Input Fizikal Dimiliki Pihak Lain

b. Perkhidmatan Penyenggaraan dan Pembaikan t.t.t.l.

c. Pengangkutan

Perkhidmatan adalah hasil daripada aktiviti pengeluaran yang melibatkan perubahan keadaan unit pengeluaran, atau memenuhi pertukaran produk atau aset kewangan. Perkhidmatan bukan secara umum dipisahkan kepada item dimana hak milik boleh diwujudkan dan tidak boleh secara umum dipisahkan daripada pengeluaran mereka.

Pengiktirafan terhadap perkhidmatan ini adalah selari dengan *treatment* pengecualian barang untuk prosesan (tanpa pertukaran hak milik) daripada akaun barang. Ia meliputi caj fi oleh pemproses kepada pemilik barang bagi aktiviti pembuatan (cth: pemprosesan, pengumpulan, pembungkusan atau relabelan).

Termasuk penyenggaraan dan kerja pemberian oleh residen ke atas barang yang dimiliki oleh bukan residen (dan sebaliknya). Kerja pemberian mungkin dilakukan di tempat pemberian atau di tempat lain. Ia termasuk penyenggaraan dan pemberian bagi kapal, pesawat dan kelengkapan pengangkutan lain.

Tidak termasuk:

- Pembersihan peralatan pengangkutan (termasuk dalam perkhidmatan pengangkutan);
- Pemberian pembinaan dan penyenggaraan (termasuk dalam pembinaan); dan
- Penyenggaraan dan pemberian komputer (termasuk dalam perkhidmatan komputer).

Pengangkutan meliputi semua jenis pengangkutan iaitu laut, udara, dan lain-lain (termasuk darat, jalan air dan saluran paip) serta perkhidmatan pos dan kurier. Ia melibatkan pengangkutan penumpang, tambang (pergerakan barang) dan aktiviti perkhidmatan sokongan dan tambahan. Berdasarkan kepada manual BPM6, perubahan dalam harga pasaran dan kadar pertukaran wang asing bagi aset rizab perlu dikeluarkan daripada penyusunan BOP. Oleh itu, bagi memenuhi praktis antarabangsa dan menambahbaik perekodan aset rizab dalam penyusunan, keuntungan atau kerugian dikeluarkan daripada data *flow* mulai penerbitan suku pertama 2018.

Aset rizab ini terdiri daripada pegangan BNM terhadap SDR, Kedudukan dana rizab Malaysia, emas & tukaran asing dan sumber IMF.

SDR – SDR ialah aset yang diwujudkan oleh IMF untuk memenuhi keperluan global apabila ia diperlukan. Ia diwujudkan sebagai tambahan kepada aset rizab yang sedia ada.

Kedudukan Rizab IMF – Kedudukan rizab Malaysia di IMF dirujuk dalam terma SDR, yang mencerminkan urusniaga dengan IMF dalam suatu tempoh. IMF akan membernarkan Malaysia untuk membeli SDR atau matawang negara lain sebagai pertukaran kepada Ringgit. Pembelian (atau pengeluaran) matawang negara lain daripada IMF menyebabkan kedudukan rizab Malaysia di IMF akan berkurangan sebaliknya penjualan semula (pembayaran balik) akan menyebabkan kesan sebaliknya.

Emas & Tukaran Asing – Pegangan emas merujuk kepada emas monetari yang dipegang oleh BNM. Rizab pertukaran asing yang dipegang biasanya dalam bentuk mata wang utama digunakan untuk tujuan bayaran perdagangan. Rizab ini juga diperlukan dalam memenuhi keperluan permintaan matawang asing, daripada residen dan bukan residen, yang bukan hanya untuk pembayaran perdagangan tetapi juga untuk pembayaran perkhidmatan, pelaburan dan pembayaran lain.

Sumber IMF – IMF mengekalkan sumber kewangan yang besar bagi membiayai ketidakseimbangan sementara Imbangan Pembayaran atau kedudukan rizab negara ahlinya. Sumber ini bersifat pusingan dan ia diwujudkan daripada matawang negara ahli sebagai kuota langganan. IMF boleh menambahkan sumber tersebut melalui pinjaman.

8. Kesilapan dan Ketinggalan Bersih

Kesilapan dan ketinggalan bersih berlaku disebabkan terkurang atau terlebih anggaran pada setiap item dalam BOP. Perbezaan terjadi berikutan penggunaan pelbagai sumber data dalam penyusunan, perbezaan masa perekodan dan faktor penilaian harga (keuntungan atau kerugian atas tukaran wang asing).

C. SUMBER DATA

Penyusunan Anggaran Imbangan Pembayaran menggunakan sumber data berikut:

(I) Sumber Primer:

- Survei Kedudukan Pelaburan Antarabangsa – usaha sama antara BNM

dan Jabatan Perangkaan Malaysia;

- Survei Perkhidmatan Antarabangsa yang dijalankan oleh Jabatan; dan

- Data disemak bagi tahun sebelumnya akan diterbitkan pada suku pertama tahun semasa; dan
- Data akhir akan diterbitkan setahun selepas data disemak diterbitkan.

Semakan adalah disebabkan oleh pelaporan dan maklumat terkini oleh pembekal data.

E. PEMBUNDARAN

Sebarang perbezaan pada data yang dilaporkan adalah disebabkan oleh pembundaran.

A. INTRODUCTION

Malaysia's Balance of Payments statistics measure the international economic transactions between Malaysia and the rest of the world in terms of magnitude and types of transactions in current, capital, and financial accounts. The compilation is in accordance with the methodology set forth in the Sixth Edition of the Balance of Payments and International Investment Position Manual (BPM6) of the International Monetary Fund (IMF).

B. CONCEPT AND COVERAGE

1. Resident

A resident is:

- *a person who has stayed or lived in Malaysia for at least one year; and*
- *a company or institution located/operating in Malaysia where its centre of predominant economic interest is in Malaysia.*

Centre of predominant economic interest of an institutional unit in an economic territory existed where some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

A non-resident refers to a person, company or institution that lives in, or is located/ operating in a country outside Malaysia.

Residency status of foreign official representatives, international organizations, foreign students and medical patients, are as follows:

- *foreign official representatives (embassies, consulates, military bases, foreign general government) in Malaysia are considered as extra-territorial and, therefore are treated as non-residents;*
- *Malaysia's official representatives abroad are treated as residents of Malaysia;*
- *international organisations are not considered as residents of any economy/country; and*
- *foreign students and foreign patients are treated as resident of their country of origin.*

2. Double Entry System

A system that follows the internationally accepted accounting principle of recording two equal entries for each transaction. Credit entries are used to record exports of goods and services, income receivable and financial transactions involving reductions in financial assets or increase in liabilities. Conversely, debit entries are used to record imports of goods and services, income payable and financial transactions involving increase of assets or decrease in liabilities.

3. Ownership Concept

The concept of change of economic ownership between a resident and non-residents is used in recognizing BOP transactions particularly in goods and

financial assets. A change in ownership from economic point of view means that all risks, rewards and rights and responsibility of ownership in practice are transferred.

4. Current Account

It measures net provision of real resources namely goods, services, primary and secondary income to or from the rest of the world. A surplus in current account arises when earnings exceed spending, while a deficit occurs when it reversed. A deficit in the current account may be financed by foreign investment inflows or external borrowings or a draw downs on reserve assets.

i. Goods

Transactions of goods cover imports and exports which economic ownership is changed between residents and non-residents. It consists of general merchandise on a BOP basis, net exports of goods under merchanting, and nonmonetary gold.

The goods are valued at market price. Generally, the market value reported by exporters and importers (for merchandise trade statistics) are measured as follows:

- *Exports f.o.b. refer to the value of the goods in the market at the customs frontier, including all costs of transporting the goods to the customs frontier, exports and other duties payable as well as the cost of loading the goods onto the carrier.*
- *Imports c.i.f. refer to the value of the goods in the market at the customs frontier, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the ship, aircraft or vehicle.*
- *For the BOP compilation, both exports and imports are valued at f.o.b.*

The value of goods as obtained from customs declarations (merchandise trade statistics) is adjusted for coverage to include transactions of commercial ships and aircrafts, which are delivered outside Malaysia and exports/imports of water to/from Singapore.

While, items to be excluded from general merchandise on a BOP basis due to no change of ownership are:

- *goods for processing, assembly, packing or labelling (GFP);*
- *goods temporarily exported/imported for storage*
- *goods for repair; and*
- *returned goods.*

Merchanting is defined as purchase of goods by a resident from a non-resident combined with the subsequent resale to another non-resident without the goods being present in Malaysia. The difference between the purchase and resale values of the goods is recorded as net exports of goods under merchanting.

ii. Services Services are the result of a production activity that changes the conditions of the consuming units, or facilitates the exchange of products or financial assets. Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production.

a. Manufacturing Services on Physical Inputs Owned by Others Recognition of this services are parallel with the treatment of exclusion goods for processing (with no change of ownership) from goods account. It covers fees charged by the processor to owner of the goods for manufacturing activities done (i.e., processing, assembly, packing or labelling).

b. Maintenance and Repair Services n.i.e. Includes maintenance and repair works by residents on goods owned by non-resident (and vice versa). The repairs may be performed at the site of the repairer or elsewhere. Maintenance and repairs on ships, aircraft and other transport equipment are included.

 - residents on merchandise and most other movable goods acquired or owned by non-residents (on Malaysia's exports); and

- non-residents on merchandise and most other movable goods acquired or owned by residents (on Malaysia's imports).
- b). Transport of goods is always considered to begin at the customs frontier of the exporting country. The main purpose of specifying a convention is to provide a basis for recording the transport of goods, consistent with a uniform free on board (f.o.b.) valuation basis for the goods component. The procedures for compilation are as follows:
 - to enter as exports all services performed by residents on Malaysia's other countries' exports, once these have been loaded on board the carrier at the customs frontier of Malaysia/other countries from which the goods are being exported; and
 - to enter as imports all services performed by foreign residents on Malaysia's imports, once these have been loaded on board the carrier at the customs frontier of the country from which they are imported.
 - c). Freight payments to non-resident shipping and airline companies for services rendered in connection with Malaysia's imports. Freight earnings by resident carriers for the carriage of Malaysia's imports are excluded based on the underlying conventional assumption that all freight expenses incurred on imports are borne by residents.
