MINISTRY OF ECONOMY
DEPARTMENT OF STATISTICS MALAYSIA

MEDIA STATEMENT MALAYSIA INPUT-OUTPUT TABLES 2021

Total Supply and Use recorded RM4.6 trillion in 2021, a 13.2 per cent increase from 2020, reflecting Malaysia's ability to withstand the continuous economic challenges.

PUTRAJAYA, 15 December 2023 - The Department of Statistics Malaysia today released the **Malaysia Input-Output Tables 2021**. The Input-Output Tables (IOTs) provide detailed information on the flow of goods and services within the economy, as these tables quantify the supply chain for various sectors. Furthermore, IOTs offer valuable insights on the economic performance and illustrate the interdependent relationship between producers, consumers, and industries.

Chief Statistician Malaysia, Dato' Sri Dr. Mohd Uzir Mahidin said, "The Malaysian supply and use registered RM4.6 trillion in 2021, up from RM4.1 trillion in 2020 (**Exhibit 1**). This 13.2 per cent double-digit annual growth reflected a gradual recovery from the COVID-19 pandemic as the Malaysian economy reopened. Summarising the performance of 2021, on the supply side, the increase was propelled by domestic production which registered a value of RM3,607.3 billion (a growth of 10.6%) and imports posted a value of RM981.9 billion (a growth of 25.4%). In terms of contribution, domestic production contributed significantly at 78.0 per cent in 2021, while imports and net taxes on products recorded a share of 21.2 per cent and 0.8 per cent, respectively. The domestic production was driven by the Manufacturing sector with 45.0 per cent".

In view of use side, final use recorded 54.7 per cent (2020: 53.9%) while intermediate use posted 45.3 per cent (2020: 46.2%). The final use rose 15.0 per cent from

RM2,201.2 billion in 2020 to RM2,530.8 billion in 2021. Within the component of final use, exports contributed the most with 43.2 per cent and followed by private consumption with 35.5 per cent. Simultaneously, intermediate use increased 11.0 per cent to RM2,097.0 billion (2020: RM1,888.5 billion).

In the context of linkages analysis, the Manufacturing sector exhibited values of 1.97 and 1.76 for backward and forward linkages, respectively. The Manufacturing sector and Utilities sub-sector were the key sectors in the economy. The growth experienced in these key sectors will foster growth in other sectors, given the key sectors' high dependence in both the supply and consumption chains in the economy.

In terms of multiplier analysis, the Construction sector retained its position as the leading output multiplier with a value of 1.98 in 2021. This indicates that the Construction sector will stimulate domestic production in the overall economy. In view of value added, the Mining and quarrying sector registered the highest value added multiplier of 0.92.

The Department of Statistics Malaysia (DOSM) has launched OpenDOSM NextGen as a medium that provides a catalog of data and visualisations to facilitate users' analysis of various data and can be accessed through <https://open.dosm.gov.my>.

DOSM will conduct the Agricultural Census in 2024. Please visit <https://www.myagricensus.gov.my/> for more information. The theme is "Agriculture Census, Key to Agriculture Development".

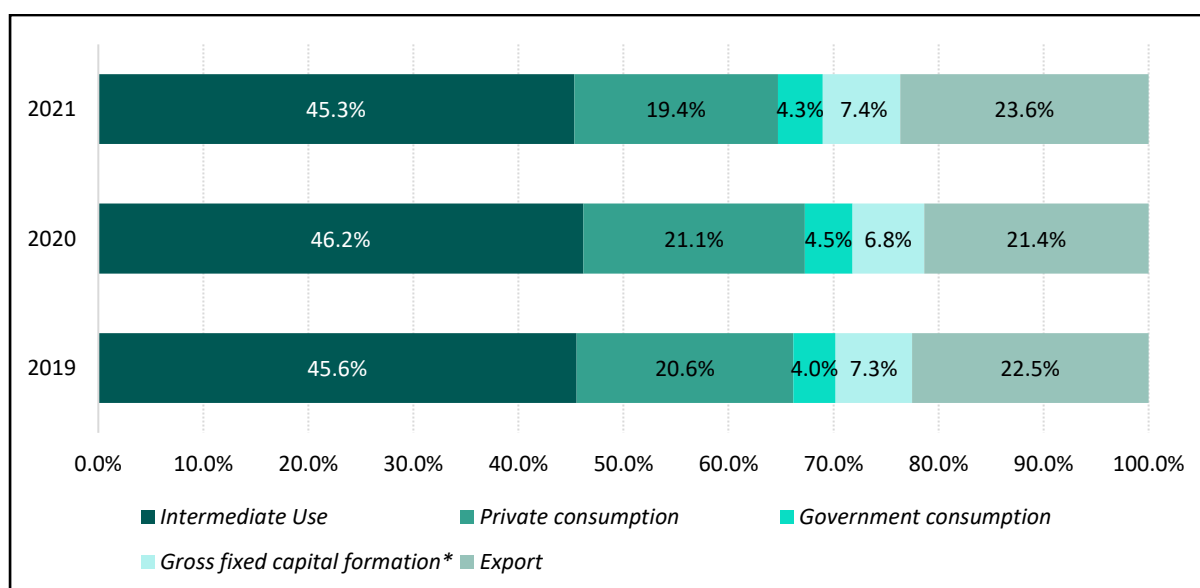

The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20th each year. MyStats Day theme is "**Statistics is the Essence of Life**".
