BUSINESS TENDENCY STATISTICS FIRST QUARTER 2016

Business Tendency Statistics presents data on the business performance based on the Business Tendency Survey which is conducted quarterly. The main objective of this survey is to measure the current business performance in Malaysia as well as expectation for the upcoming three and six months.

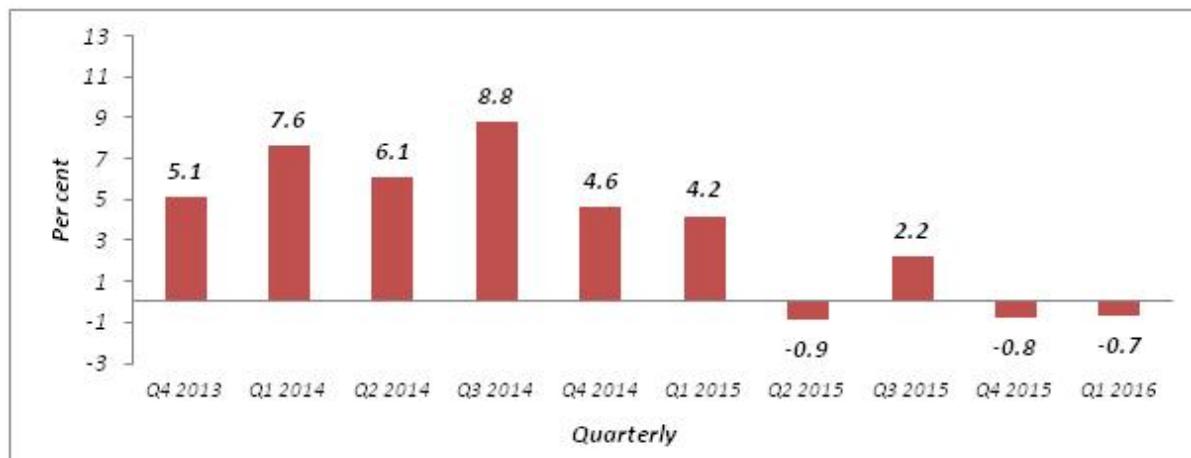

This report publishes the statistics of current business situation for the fourth quarter of 2015, business expectation for the first quarter of 2016 and the upcoming six months period of January to June 2016.

FORECAST OF BUSINESS PERFORMANCE FOR THE FIRST QUARTER 2016

Business performance in the first quarter 2016 is expected to slow down, as shown by the confidence indicator of -0.7 per cent.

Confidence indicator is an indicator that summaries the overall views on short-term business situation in various sectors in Malaysia. The confidence indicator is computed as the average of the net balance for selected variables.

Chart I: Confidence Indicator, 2013-2016

The business performance by sector shows the industry and services sectors are expected to grow in the first quarter of 2016 with confidence indicator +1.8 per cent and +1.7 per cent respectively. However, the business performance of construction and wholesale & retail trade sectors are expected to drop with confidence indicator -1.5 percent and -15.2 percent respectively (Chart II).

Chart II: Confidence Indicator by Sector, 2013-2016
