Domestic Activity Continues to Support Economic Growth Amid Global Challenges

The Malaysian Economic Statistics Review (MESR) Volume 4/2026 edition focuses on the recent statistics released in February 2026 and some forthcoming statistics for March 2026. It also includes a special article titled "Impact of Electric Vehicles on Domestic Vehicle Production". The article examines how the rapid growth of electric vehicle (EV) registrations in Malaysia has coincided with lower domestic vehicle production and weaker factory sales performance in 2025. It also highlights changing consumer preferences towards EVs, while underscoring the opportunities for greater local manufacturing participation and the future growth of Malaysia's automotive industry.

This MESR will assist users in obtaining the latest detailed information on economic performance.

The full publication of the **MESR Volume 4/2026** can be downloaded through [eStatistik](#) portal.
