Broad-Based Sectoral Growth Reflects Steady Economy

The Malaysian Economic Statistics Review (MESR) Volume 6/2026 edition focuses on the recent statistics released in April 2026 and some forthcoming statistics for May 2026. It also includes a special article titled **“From Forecast to Reality: Assessing the Capability of Leading Index in Providing Early Signals”**. The article assesses Malaysia’s economic outlook using the Leading Index (LI) alongside the Producer Price Index (PPI), Consumer Price Index (CPI), and Industrial Production Index (IPI), highlighting the LI’s ability to provide early signals on economic slowdowns and support timely policy interventions.
