PPI for Local Production by Stage of Processing

The PPI for local production by stage of processing (SOP) declined by 1.0 per cent in November 2015 compared to previous month. This declination was due to the decreases in the two stages of processing that is Crude materials for further processing (-3.7%) and Intermediate materials, supplies and components (-0.6%). While, the index for Finished goods increased by 0.1 per cent.

As compared with the same month a year ago, the PPI for local production by SOP for November 2015 dropped by 5.3 per cent. This was due to decreases in index for Crude materials for further processing (-11.1%), followed by index for Intermediate materials, supplies and components (-6.4%). However, index for Finished goods increased by 1.5 per cent.
