Department of Statistics Malaysia

E-Commerce continues to drive Malaysia's digital economy with RM937.5 billion in revenue for the first three quarters of 2025

- *Malaysia's e-commerce revenue for the first nine months of 2025 reached RM937.5 billion, an increase of 1.9 per cent compared to the same period in 2024. The highest e-commerce revenue was recorded in the second quarter of 2025 at RM313.8 billion, while the third quarter registered a marginal moderation to RM312.6 billion*.

- *ICT and e-commerce collectively accounted for 23.4 per cent of the economy, equivalent to RM451.3 billion in 2024, up from RM429.3 billion in 2023.*

- *E-commerce income rising to RM1.18 trillion in 2023 was led by the Manufacturing sector (RM587.3 billion) and the Services sector (RM583.0 billion), alongside continued improvements in Construction and Agriculture.*

- *Business-to-Business (B2B) transactions remained the largest contributor to e-commerce revenue, reaching RM817.1 billion. The most notable gains were observed in Business-to-Consumer (B2C) transactions, which increased to RM336.6 billion, and Business-to-Government (B2G) transactions, which rose to RM30.4 billion. Domestic e-commerce income expanded to RM1.05 trillion, while international income reached RM131.1 billion.*

- *E-commerce expenditure also increased to RM571.4 billion, driven by both domestic and international transactions. B2B transactions remained the dominant expenditure component at RM443.4 billion, while stronger momentum was seen in B2C and B2G expenditure.*
