PRESS RELEASE
SERVICES STATISTICS HEALTH (PRIVATE SECTOR) 2015

SNAPSHOT OF HEALTH 2014

INTRODUCTION

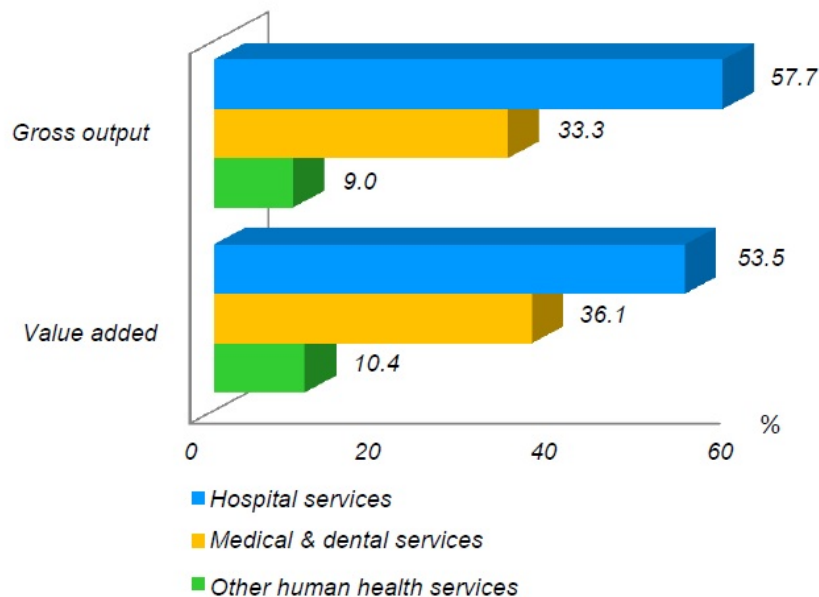

This publication presents statistics on private health services which includes hospital services, medical & dental services and other human health services for reference year 2014. The statistics presented were compiled based on the Annual Survey of Services conducted in 2015.

PERFORMANCE OF HEALTH SERVICES BY ACTIVITY

The highest **gross output** for private health services was contributed by hospital services registering RM8.3 billion (57.7%) to the total gross output. This was followed by medical & dental services, RM4.8 billion (33.3%) and other human health services, RM1.3 billion (9.0%) as shown in Chart 1.

Value added showed the same structure as gross output where hospital services was the highest contributor with RM3.7 billion (53.5%) of total value added. This was followed by medical & dental services which recorded RM2.5 billion (36.1%) and other human health services registering RM0.7 billion (10.4%) as illustrated in Chart 1.

Chart 1 : Percentage distribution of gross output and value added of health services by activity, 2014

Total gross output : RM14.5 billion

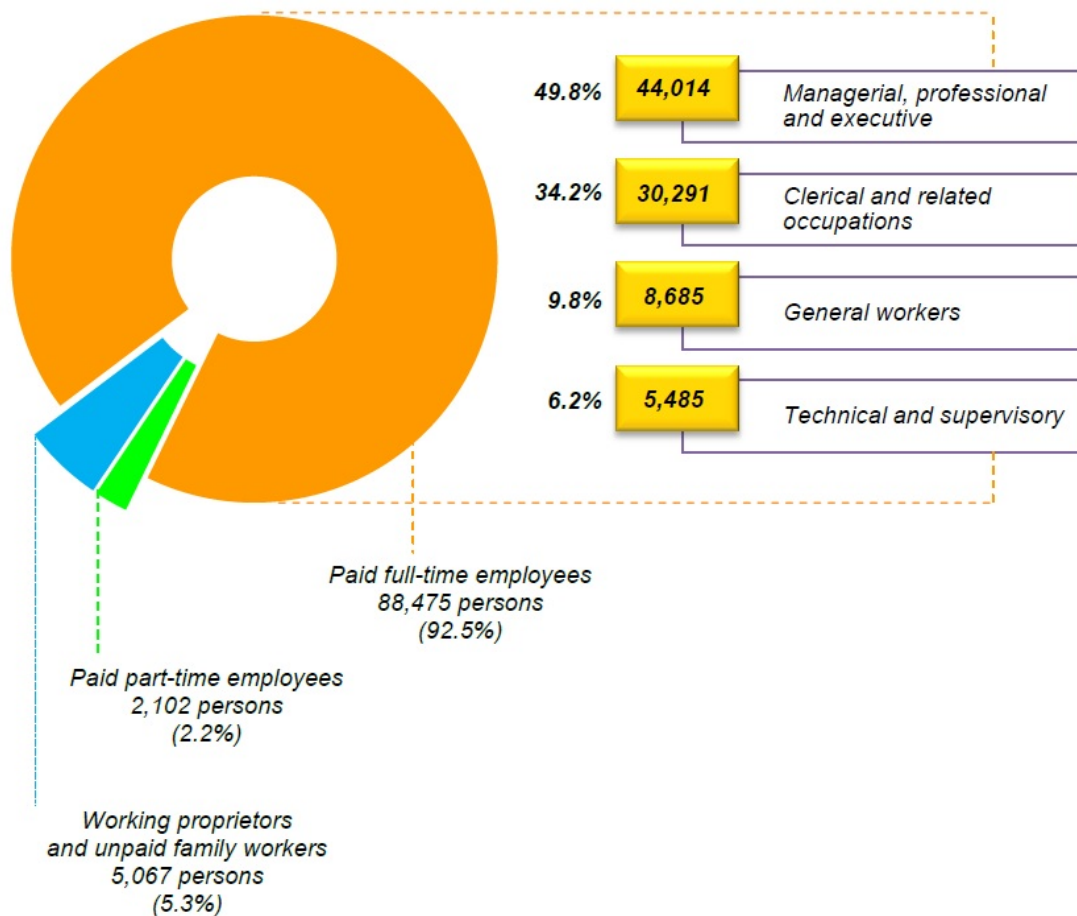

Total value added : RM7.0 billion

Value of fixed assets owned by the establishments in private health services amounted to RM7.5 billion in 2014. Hospital services posted the highest value of fixed assets of RM5.6 billion (74.7%).

In 2014, the **total number of persons engaged** in private health services were 95,644 persons of which 46,426 persons (48.5%) were hired in the hospital services while 38,239 persons (40.0%) in medical & dental services and 10,979 persons (11.5%) in other human health services. Out of the total number of persons engaged, 88,475 persons (92.5%) were paid full-time employees whereas 5,067 persons (5.3%) were working proprietors and unpaid family workers. The remaining 2,102 persons (2.2%) were paid part-time employees.

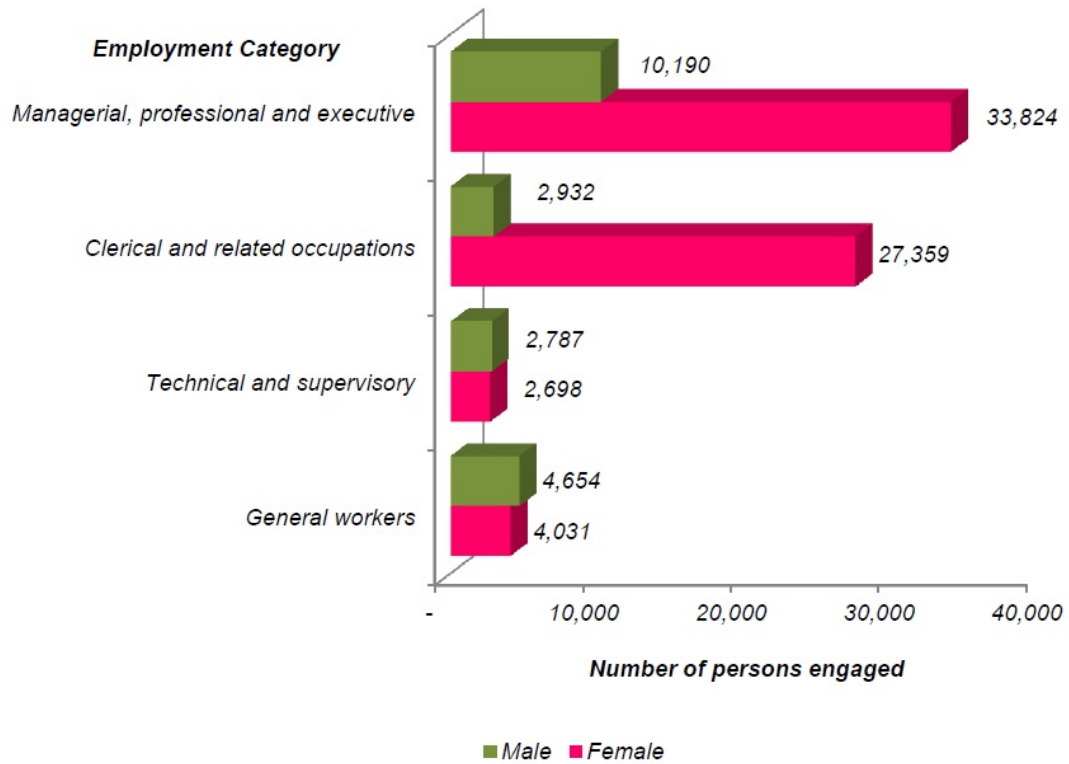

Managerial, professional and executive category of paid full-time employees constituted the highest number with 44,014 persons (49.8%) followed by clerical and related occupations (34.2%), general workers (9.8%) and technical and supervisory (6.2%). The distribution of the total number of persons engaged by category of workers for the year 2014 is shown in Chart 2.

Chart 2 : Total number of persons engaged by category of workers, 2014
