

PADI

PADDY

PENANAMAN PADI

Nota Keterangan

1. Sebelum tahun 1991, data kadar hasil diperoleh daripada Jabatan Perangkaan Malaysia melalui ujian tuaian padi bagi tanaman musim utama dan tanaman luar musim semenjak tahun 1964 dan 1969.

2. Mulai tahun 1991, data penanaman padi diperoleh daripada Jabatan Pertanian Malaysia. Sumber pengumpulan data diambil daripada Penyiasatan Hasil Padi dan Penyiasatan Keluasan Aktiviti Tanaman Padi.

3. Data tahunan padi bagi sesuatu tahun merujuk kepada jumlah data yang dilaporkan bagi dua musim, iaitu Musim Utama dan Luar Musim. Contohnya, data bagi tahun 2000, merujuk kepada data Musim Utama 1999/2000 dan Luar Musim 2000. Data ini dilaporkan di dalam laporan sebagai **Semua Musim**.

4. Musim Utama

Musim utama ditakrifkan sebagai tempoh bila padi ditanam yang mana tarikh mula ditanam jatuh antara 1hb Ogos hingga 28hb/29hb Februari tahun berikutnya.

5. Pengeluaran Padi

Pengeluaran padi merujuk kepada maklumat jumlah pengeluaran padi sawah dan padi huma.

PADDY PLANTATION

Explanatory Notes

1. Prior to 1991, yield data were obtained from the Department of Statistics, Malaysia through the annual crop-cutting test on main season wet paddy crop and off-season crop since 1964 and 1969 respectively.

2. Since 1991, the paddy planting data are provided by Department of Agriculture Malaysia. The source of data gathered are taken from Paddy Yield Survey and Paddy Cultivation Activities Area Survey.

3. Yearly data for paddy refers to the summation of data reported in the Main Season and Off Season. For example, data for 2000 refers to the compiled Main Season 1999/2000 data and Off Season 2000 data; and are reported in the report as **All Season**.

4. Main Season

Main season is defined as the period when paddy is planted in which the commence date of planting falls between 1st August to 28th/29th February of the following year.

5. Paddy Production

Paddy production refers to the total production wetland paddy data and dryland paddy.

6. Purata Hasil Padi

Purata hasil padi (Kg/Ha) adalah purata hasil padi selepas pengeringan, dibersihkan dan apabila kandungan kelembapan wap basah tepat pada 14 peratus.

7. Padi Sawah

Padi Sawah adalah jenis padi yang utama ditanam di Malaysia dan terdiri dari pelbagai jenis padi yang berbeza.

8. Padi Huma

Padi Huma meliputi padi yang ditanam di kawasan kering sama ada di tanah tinggi atau di tanah rendah dan bergantung kepada air hujan.

9. Jelapang Padi

Jelapang Padi ialah skim pengairan yang besar (keluasan melebihi 4,000 hektar) dan diiktiraf oleh Kerajaan dalam Dasar Pertanian Negara sebagai kawasan utama pengeluaran padi.

Terdapat sepuluh kawasan Jelapang Padi di Malaysia iaitu Lembaga Kemajuan Pertanian Muda (MADA), Lembaga Kemajuan Pertanian Kemubu (KADA), Kawasan Pembangunan Pertanian Bersepadu Kerian, Kawasan Pembangunan Pertanian Bersepadu Barat Laut Selangor, Kawasan Pembangunan Pertanian Bersepadu Seberang Perak, Kawasan Pertanian Bersepadu Pulau Pinang, Kawasan Pembangunan Terengganu Utara (KETARA), Kawasan Pembangunan Pertanian Bersepadu Kemasin Semerak, Kawasan Pembangunan Pertanian Bersepadu Pekan dan Kawasan Pembangunan Pertanian Bersepadu Rompin.

6. Average Yield of Paddy

The average yield of paddy (Kg/Ha) is the average yield of paddy after drying, cleaning and when the moisture content is at exact 14 per cent.

7. Wetland Paddy

Wetland paddy is the primary paddy type planted in Malaysia and comprises of different varieties of paddy.

8. Dryland Paddy

Dryland paddy refers to paddy on dry areas whether on highland or lowland and depends purely on rainfall.

9. Granary Areas

Granary Areas refer to major irrigation schemes (areas greater than 4,000 hectares) and recognized by the Government in the National Agricultural Policy as the main paddy producing areas.

There are ten Granary Areas in Malaysia, namely Muda Agricultural Development Authority (MADA), Kemubu Agricultural Development Authority (KADA), Kerian Integrated Agriculture Development Area, Barat Laut Selangor Integrated Agriculture Development Area, Seberang Perak Integrated Agriculture Development Area, Pulau Pinang Integrated Agriculture Development Area, North Terengganu Integrated Agriculture Development (KETARA), Kemasin Semerak Integrated Agriculture Development Area, Pekan Integrated Agriculture Development Area and Rompin Integrated Agriculture Development Area.
