# BACKGROUND

# DATA GROW EXPONENTIALLY

## DATA NEVER SLEEPS 6.0

How much data is generated *every minute*?

There's no way around it: big data just keeps getting bigger. The numbers are staggering, but they're not slowing down. By 2020, it's estimated that for every person on earth, 1.7 MB of data will be created every second. In our 6th edition of Data Never Sleeps, we once again take a look at how much data is being created all around us every single minute of the day—and we have a feeling things are just getting started.

- **1.7MB of data created every second**
- **Crucial to turn data into useful insights**
  - ✓ Better business problem solution
  - ✓ More competitive advantage
  - ✓ Increase efficiency & effectiveness
  - ✓ Better informed decisions
  - ✓ Generate value
  - ✓ Impact on citizen well being
